Start Me Up Victoria Dahl, 2012-11-15 Lori had always planned to get out of tiny Tumble Creek, Colorado, but when her late dad left her his beloved auto body shop, she'd stayed. Now, according to her crazy best friend, Molly, what Lori needs is some excitement, in the form of hot, no-strings-attached sex...and lots of it. Quinn Jennings has buildings on the brain--not love and romance. A serious architect, he's delighted to discover that Lori is willing to skip dating protocols and head straight for the sheets. And aided by the steamy books on Lori's bedside table, he's busy indulging both of their wildest fantasies. But when life in Tumble Creek takes a dangerous turn for Lori, Quinn's protective instincts kick in. Suddenly he cares. More than either of them ever expected...

The Cold Start Problem Andrew Chen,2021-12-07 A startup executive and investor draws on expertise developed at the premier venture capital firm Andreessen Horowitz and as an executive at Uber to address how tech's most successful products have solved the dreaded cold start problem"—by leveraging network effects to launch and scale toward billions of users. Although software has become easier to build, launching and scaling new products and services remains difficult. Startups face

daunting challenges entering the technology ecosystem, including stiff competition, copycats, and ineffective marketing channels. Teams launching new products must consider the advantages of “the network effect,” where a product or service’s value increases as more users engage with it. Apple, Google, Microsoft, and other tech giants utilize network effects, and most tech products incorporate them, whether they’re messaging apps, workplace collaboration tools, or marketplaces. Network effects provide a path for fledgling products to break through, attracting new users through viral growth and word of mouth. Yet most entrepreneurs lack the vocabulary and context to describe them—much less understand the fundamental principles that drive the effect. What exactly are network effects? How do teams create and build them into their products? How do products compete in a market where every player has them? Andrew Chen draws on his experience and on interviews with the CEOs and founding teams of LinkedIn, Twitch, Zoom, Dropbox, Tinder, Uber, Airbnb, and Pinterest to offer unique insights in answering these questions. Chen also provides practical frameworks and principles that can be applied across products and industries. The Cold Start Problem reveals what makes winning networks thrive, why some startups fail to successfully scale, and, most crucially, why products that create and compete using the network effect are vitally important today.

Start Small, Stay Small Rob Walling, 2010 Start Small, Stay Small is a step-by-step guide to launching a self-funded startup. If you're a desktop, mobile or web developer, this book is your blueprint to getting your startup off the ground with no outside investment. This book intentionally avoids topics restricted to venture-backed startups such as: honing your investment pitch, securing funding, and figuring out how to use the piles of cash investors keep placing in your lap. This book assumes: You don't have \$6M of investor funds sitting in your bank account You're not going to relocate to the handful of startup hubs in the world You're not going to work 70 hour weeks for low pay with the hope of someday making millions from stock options There's nothing wrong with pursuing venture funding and attempting to grow fast like Amazon, Google, Twitter, and Facebook. It just so happened that most people are not in a place to do this. Start Small, Stay Small also focuses on the single most important element of a startup that most developers avoid: marketing. There are many great resources for learning how to write code, organize source control, or connect to a database. This book does not cover the technical aspects developers already know or can learn elsewhere. It focuses on finding your idea, testing it before you build, and getting it into the hands of your customers.

From table settings to party favors, floral arrangements to nursery décor, there is no project her creativity and a glue gun can't tackle. But dating? That's a whole 'nother story. Case in point: Mike Everett. He's a gorgeous mechanic and known car-whisperer, a man who can work with auto parts like nobody's business. And he has thrown a monkey wrench into Anne's carefully-crafted life... WHEN YOU CAN DO IT TOGETHER? One look at Anne is enough for Mike to know that she's no fixer-upper. She's perfect just the way she is—and the chemistry between them works like a charm. Mike's always been a no-strings kind of guy, but Anne's impressive self-reliance—and gorgeous exterior—gives him pause. This time, a fast joyride just doesn't seem like enough. But first he has to convince Anne that he means to take her all the way...
