Building Insanely Great Products David Fradin, 2016-11-30 Building Insanely Great Products: Some Products Fail, Many Succeed... This is their Story is dedicated to one goal: To help you learn how you can enhance the chances of product success and reduce product failure. Steve Jobs coined the term “Building Insanely Great Products” and this book with many real-life examples tells the story of what he meant by that phrase and how every organization can build insanely great products and services. Building Insanely Great Products covers the six keys to success, how to do market research, the importance of customer loyalty, innovation and design, using personas for development and not just marketing, determining the product’s value proposition, the correct way to prioritize product features, market sizing that works, market segmentation, product positioning, distribution strategy, product lifecycle framework and process, and the customer journey and digital transformation. As Steve Johnson, the grandfather of product management training says: “... we’ve learned that companies often don’t know why they succeed and why they fail. Many rely on luck; too many rely on “HIPPO”—the highest paid person's opinion. And if you don’t know why you succeed, you won’t know how to succeed again.

Business Ideas Chad Grills,2015-06-10 Two Oxford University professors wrote a paper called, The Future of Employment: How Susceptible are Jobs to Computerization? In the paper, the professors show that 47% of jobs have a high likelihood of being replaced, automated, or outsourced over the coming years. It's a harsh reminder for us all that making more money or starting a business is now a necessity. In today's economy, with the right idea, it's an amazing time to start a business. Business Ideas offers over one hundred of those starting points designed to thrive during the coming technological age. These ideas are just waiting to be blended with your own expertise, research and work ethic. There is more noise than ever online. In the whirlwind of that noise are two voices. One voice says ideas are worthless while the other voice thinks they're priceless. The hard truth about any business or money making idea is that they're both worthless and priceless at the same time. They're worthless if they're bad ideas, or if you don't take the next step and execute on them. On the other hand, the person who takes an idea, executes, and builds it up has an opportunity to make them priceless. The ideas throughout this book are ready for you to put in the work necessary to make them priceless. I'm willing to bet that if you read these ideas and blend them with your own experience and expertise, you'll find a starting point uniquely suited for you. Business Ideas contains over a hundred ideas in different categories and industries, all of which are poised to expand in the new economy. These industries and categories include: New Media and Content Creation Mobile Advertising Design and Big Data Smart Homes and the Internet of Things RPAS and UAV's Events, Activities, and Meet-ups Consulting, Teaching, and Curation Location Independent Businesses Sales and E-Commerce Robotics and Security Plus way more! Use these ideas and starting points, blend them with your own expertise and experiences, and launch a new venture today!

*How to Validate Your Startup Business Idea* Ravi Kikan,2018-10-22 Many startups and entrepreneurs fail because they do not validate their startup business idea. I run some of the largest startup communities on LinkedIn. One of the largest communities that I moderate and engage on LinkedIn has around 300,000 global members including startups, venture capitalists, entrepreneurs, mentors and global experts. With my own experience of working with many startups, entrepreneurs, corporates and my regular interactions with successful business ventures I have understood the importance of validating your startup business idea before launching your product or services in the market. In this book not only have I collected my thoughts and experiences for validating a business idea but I have reached out to many experts globally to understand how to validate a business idea before going all out and launching your own business. Who Is This Book For ? It is extremely important that you validate your startup business idea in the market if you are a wannabe entrepreneur, a student, homemaker, professional, expert or anyone who is trying to launch a startup business This is extremely important for you to understand this right from the ideation stage itself. Sometimes in the enlightenment of the business idea or in the haste of getting things done faster with shortcuts (Howsoever the idea might be great), we end up doing the following: 1. We forget the simple basics 2. We tend to overlook similar experiences 3. We do not take stable advises 4. We rush into getting things done faster 5. We often get misguided 6. We overlook readily available data 7. We sometimes ONLY look at money and not the business process 8. We don't validate things before going all out Why This Book? Time and again I have seen my friends, colleagues, students, awesome entrepreneurs, startups (including myself) getting into a new business without validating their startup business idea. This often has led to extremely disastrous and sometimes fatal outcomes. Lot of things get on stake when you risk getting into a new business e.g. you risk your time, money, resources, relationships, career etc Never hurry into things. Always validate things from a rational and practical perspective. This will give you depth, more understanding and a far clearer picture of how, when, where and what to do while going ahead into a new venture This book is a step to overcome all those hassles and validate your awesome business idea. A huge thanks to all these awesome global experts, entrepreneurs who have also contributed their ideas with me on the topic: Tina Zurbi, Sandeep Balaji, Neeraj Saini, Praval Kant, Dr Aniruddha Malpani, Joseph Roos, Avigail Berg, Diana Palchik, Dr Rajeev Tewari, Patrick Osman, Tishana Simon, Dr Pranab Sen, Nitin Jain, Ed Zimmer, Andrea Sica, Zile Soilihi, Jeffrey Hilton, Guy Cleveland, Richard Coleness, Tabitha Jean Taylor, Andrew MacWhirter, Matt Kurlito, Daniel Leping I would also love to hear from you once you have read this book on your experiences and how you have dealt with validating your own startup business idea.
