The Emergence of Start-ups David Heller, Sylvain de Chadirac, Lana Halaoui, Camille Jouvet, 2019-04-29 In France, the number of young start-ups has soared since the beginning of the 2010s, leading the government to encourage their development and make France the "start-up nation". This book contributes to a better understanding of the emergence of these companies by studying the influence of the ecosystem on their development and the modes of financing that they use. The financing of start-ups remains a major challenge insofar as they are often faced with refusal from the banks. Successful financing depends largely on the geopolitical and economic environment. Through a comparative study of models from both France and English-speaking countries, the authors explore possible

financing solutions for France. The book concludes with a discussion of equity crowdfunding, which proves to be a successful financing alternative. Including theoretical and empirical studies, this book provides concrete solutions aimed at developing innovative entrepreneurship in France.

People often spend years on working on startup ideas that fail—and they could have known long before, had they asked the hard questions earlier. Five-time tech founder Dave Parker has been there, and in Trajectory: Startup he offers a path to get you from ideation to launch and revenue in just six months. With a track record of starting companies from scratch, raising both angel and venture capital, and participating in eight exits as founder, operator, and board member, Parker's experience is practical and actionable. Having sold three of his own startups and closed two, Parker learned just as much from his failures as from his successes, and he brings this wit and wisdom into his writing in a transparent way. Parker shares advice on:

- What makes a good idea that makes money
- Recruiting and working with cofounders
- Asking customers what product they want (customer development)
- How to build a tech product even as a non-tech founder
- How to get out of your head, ship a product, and make your first sale

Entrepreneurship and Innovation Education Marcos Lima, 2021-03-03 This book is a compilation of tools, techniques and frameworks for use in the field of entrepreneurship and innovation (E&I) education. Developed and honed over the past two decades, these teaching approaches are combined with well-versed practical insight. As professors know all too well, the human brain cannot articulate more than three or four dimensions of a problem without the aid of what could be referred to as checklists for thinking: frameworks (visual or otherwise) that help students think in terms of multiple variables affecting a problem. Entrepreneurship and Innovation Education provides a toolbox of more than 50 frameworks for analyzing entrepreneurship and innovation problems, and for enabling effective decision-making. It is a useful guide for professors and students alike who are looking for an overview of available tools, methods and approaches to actively learn how to go from the visionary idea to the market.

Capital-risque et financement de l'innovation : Évaluation des startups modes de financement montages Faÿcal Hafied, 2019-02-26 L'ouvrage présente les méthodes d'évaluation attachées à cette classe d'actifs et éclaire le lecteur sur les singularités du montage d'une opération de capital-risque, en replaçant l'industrie du capital-risque dans sa perspective théorique. Le capital-risque est une industrie qui a vocation à soutenir financièrement les entreprises innovantes. Elle est constituée d'un large périmètre d'acteurs (business angels, financement participatif, sociétés d'investissement spécialisées, structures de corporate venture adossées à une grande entreprise). Les investissements en capital-risque s'effectuent en effet sur des projets incertains et volatils, ce qui implique des montages financiers différents de ceux employés pour des entreprises plus matures (prêt bancaire, LBO, etc.), ainsi que l'utilisation de méthodes d'évaluation d'entreprises particulières. Cet ouvrage présente les techniques d'évaluation des startups risquées (méthodes de scoring, Venture Capital Method, First Chicago Bank Method, options réelles) utilisées par les sociétés de capital-risque. Il explique la façon dont ces sociétés structurent les montages lorsqu'elles investissent dans une startup innovante (logique de l'investissement séquentiel pour tours de table successifs, techniques de relution en cas de défaillance de la startup, mécanismes de la cession préférentielle). Il est également à jour des nouveaux modes de financement des startups (Venture loan, Initial Coin Offering) et détaille les principales stratégies de croissance (growth hacking, lean startup) déployées par celles-ci afin de rendre leur business model scalable. Il expose les nouvelles métriques de suivi de la performance associées à ces stratégies (customer acquisition cost, customer retention rate, customer lifetime value, etc.) et couvre les modes de sortie du capital-risque (introduction en bourse, sortie industrielle, reclassement des participations entre actionnaires, liquidation). Les aspects légaux (principales clauses des pactes d'actionnaires) et fiscaux sont également mentionnés. De nombreuses études de cas accompagnées de calculs détaillés permettront au lecteur de se familiariser avec ces montages et méthodes d'évaluation particuliers.

L'intelligence artificielle en action Damien Gromier, 2020-11-12 DANS LES COULISSES DES SUCCÈS DE L'INTELLIGENCE ARTIFICIELLE Tout le monde aujourd'hui parle de l'intelligence artificielle (IA). Fascinante pour certains, inquiétante pour d'autres, cette technologie véhicule de nombreux fantasmes. Souvent abordée sous l'angle exclusivement philosophique ou technique, elle l'est peu sous celui de ses bénéfices réels. Et pourtant, dans les domaines de la santé, de l'environnement, de l'assurance, de l'énergie, ses usages se révèlent plus que prometteurs. Qu'apporte-t-elle concrètement ? Comment les technologies d'IA sont-elles conçues, choisies, déployées, apprivoisées, améliorées ? Quelles sont les clés des projets d'IA réussis, positifs pour les usagers et pour l'organisation qui les met en œuvre ? Pour répondre à ces questions, l'auteur est allé à la rencontre de celles et ceux qui sont en prise au quotidien avec la réalité de l'IA : start-up, entreprises, institutions ou associations. Au travers d'une large sélection de cas d'usages, de retours d'expérience, de bonnes pratiques et de courtes fictions, cet ouvrage propose une véritable immersion dans la réalité de l'IA et permettra au lecteur d'appréhender tous les possibles qu'elle ouvre : Découvrir une grande diversité d'applications concrètes de l'IA. Avoir accès aux points de vue et recommandations des acteurs qui conçoivent et déploient l'IA dans l'entreprise, la recherche, les ONG (Implicitity, Hôpital Fondation Rothschild, Incepto, Société Générale, Dathena, Microsoft France, EDF, Namr, Atlan Space, Energency, Tunnel Lab Bouygues, BlueCargo, Scortex, Saagie, Health Data Hub, IBM, institut PRAIRIE, ONU). Maîtriser les enjeux des projets structurants de l'écosystème IA en France et en Europe.

The Chicago Handbook of University Technology Transfer and Academic Entrepreneurship Albert N. Link, Donald S. Siegel, Mike Wright, 2015-03-09 As state support and federal research funding dwindle, universities are increasingly viewing their intellectual property portfolios as lucrative sources of potential revenue. Nearly all research universities now have a technology transfer office to manage their intellectual property, but many are struggling to navigate this new world of university-industry partnerships. Given the substantial investment in academic research and millions of dollars potentially at stake, identifying best practices in university technology transfer and academic entrepreneurship is of paramount importance. The Chicago Handbook of University Technology Transfer and Academic Entrepreneurship is the first definitive source to synthesize state-of-the-art research in this arena. Edited by three of the foremost experts in the field, the handbook presents evidence from entrepreneurs, administrators, regulators, and professors in numerous disciplines. Together they address the key managerial and policy implications through chapters on how to sustain successful research ventures, ways to stimulate academic entrepreneurship, maintain effective open innovation strategies, and improve the performance of university technology transfer offices. A broad and ambitious work, the handbook offers comprehensive coverage for

universities of all types, allowing them to confidently handle technology commercialization and further cultivate innovation.

Digital Oratory as Discursive Practice Fiona Rossette-Crake, 2022-12-16 This book offers an appraisal of oratory, old and new, relating former discourse practice to a specific sub-set of contemporary, digital practices. The author explores the interface between language and society, providing an interdisciplinary study at the crossroads of discourse, linguistics, communication and rhetoric. The comparisons she draws are particularly pertinent in light of the steep rise in presentations given during video-conferences, webinars, and other online events during the COVID-19 pandemic, an event which accelerated previous moves towards digital communication and which is likely to have a long-term impact on communication styles. This book will be of interest to academics and students in fields including discourse analysis, applied linguistics, communication studies, digital studies and business studies.
