*Royal Artillery: Glossary of Terms and Abbreviations* Philip Jobson,2016-09-02 Since its creation in 1716, the Royal Artillery has been a cornerstone of the British Armed Forces, as their motto Ubique, 'Everywhere' implies. In this book Philip Jobson has collated the enormous and complex artillery lexicon which has accumulated since that day, as dynamic as its subject to keep pace with technical and tactical innovation. The development of indirect fire, counter battery, anti-tank and anti-aircraft fire all required a novel vocabulary, as did advances in survey and locating. Changes in communication from shouts, to flags, to line, to radio, to compressed data transmission all left their mark on the language. Epic in scope and detail, even the most expert Gunner would be likely to fail an unseen test based on this work. It will therefore be a pleasure to those who think themselves expert to browse this volume, and will serve as an invaluable reference for historians and researchers to ensure that they use the correct term and understand its true meaning.

**The Fragile Balance of Terror** Vipin Narang,Scott D. Sagan,2023-01-15 In *The Fragile Balance of Terror*, the foremost experts on nuclear policy and strategy offer insight into an era rife with more nuclear powers. Some of these new powers suffer domestic instability, others are led by pathological personalist dictators, and many are situated in highly unstable regions of the world—a volatile mix of variables. The increasing fragility of deterrence in the twenty-first century is created by a confluence of forces: military technologies that create vulnerable arsenals, a novel information ecosystem that rapidly transmits both information and misinformation, nuclear rivalries that include three or more nuclear powers, and dictatorial decision making that encourages rash choices. The nuclear threats posed by India, Pakistan, Iran, and North Korea are thus fraught with danger. *The Fragile Balance of Terror*, edited by Vipin Narang and Scott D. Sagan, brings together a diverse collection of rigorous and creative scholars who analyze how the nuclear landscape is changing for the worse. Scholars, pundits, and policymakers who think that the spread of nuclear weapons can create stable forms of nuclear deterrence in the future will be forced to think again. Contributors: Giles David Arceneaux, Mark S. Bell, Christopher Clary, Peter D. Feaver, Jeffrey Lewis, Rose McDermott, Nicholas L. Miller, Vipin Narang, Ankit Panda, Scott D. Sagan, Caitlin Talmadge, Heather Williams, Amy Zegart

Radar Man Edward Lovick,2010-10-07 During the 1950s, the United States and the Soviet Union teetered on the brink of nuclear devastation. Americas hope for national security relied solely upon aerial reconnaissance. Radar Man is the fascinating memoir of a physicist who, with his colleagues, developed the stealth technology that eventually created radar-invisible aircraft. Edward Lovick shares a compelling story from the perspective of an enthusiastic scientist that highlights his pioneering experiences in an innovative, secret world as he helped create stealth aircraft such as the A-12 OXCART, SR-71 Blackbird, and F-117 Nighthawk. From the moment in 1957 when Lockheeds famous aircraft designer Clarence L. 'Kelly' Johnson invited Lovick to join his Skunk Works, Lovick details how he helped the CIA eventually perform vital, covert reconnaissance flights over Soviet-held territory during the Cold War, saved Lockheed ADPs A-12 from cancellation, and provided key design input to the SR-71 and F-117. Lovicks autobiography describing his career as an engineering physicist in the Skunk Works not only draws attention to the insurmountable challenges that accompanied the task of developing radar-invisible aircraft, but also the importance of the monumental task these young scientists fulfilledall with the hope of creating a secure future for their beloved country.

**Good Derivatives** Richard L Sandor,2012-04-03 Through the eyes of an inventor of new markets, Good Derivatives: A Story of Financial and Environmental Innovation tells the story of how financial innovation - a concept that is misunderstood and under attack - has been a positive force in the last four decades. If properly designed and regulated, these "good derivatives" can open vast possibilities to address a variety of global problems. Filled with provocative ideas, fascinating stories, and valuable lessons, it will provide both an insightful interpretation of the last forty years in capital and environmental markets and a vision of world finance for the next forty years. As a young economist at the Chicago Board of Trade, Richard Sandor helped create interest rate futures, a development that revolutionized worldwide finance. Later, he pioneered the use of emissions trading to reduce acid rain, one of the most successful environmental programs ever. He will provide unique insights into the process of creating these new financial products. Covering successes and failures, the story describes the tireless process of inventing, educating and creating support for these new inventions in places like Chicago, New York, London, Paris and how it is unfolding today in Mumbai, Shanghai and Beijing. The book will tell the story of the creation of the Chicago Climate Exchange and its affiliated exchanges (European Climate Exchange, Chicago Climate Futures Exchange and Tianjin Climate Exchange, located in China). The lessons learned in these markets can play a critical role in effectively addressing global climate change and other pressing environmental issues. The author argues that market-based trading systems are a far more effective means of reducing pollutants than "command-and-control". Environmental markets may ultimately help to find solutions to issues such as rainforest destruction, water problems and biodiversity threats. Written in an engaging, narrative style, Good Derivatives will be of interest to both practitioners and general readers who want to better understand the creative process of financial innovation. In the middle of so much distrust of markets, it is also a recipe of how transparent, well-regulated markets can be a force for good in the environmental, health, and social areas.
