Online Doping Jesper Andreasson, April Henning, 2023-06-29 This book examines the bodies, communities, and cultures that evolve in different online doping spaces. By engaging in critical analysis of the interrelatedness of online and offline doped realities, the book provides a comprehensive analysis influenced by digital sociology and feminist theory. It focuses on the intersection of doping, bodies, and technology, and is structured around three interconnected themes prominent in doping research but less acknowledged in online environments: doping spaces and communities; gender and power relationships; and the relationship between online activities and offline social life. Building on extensive online research with different drug communities and doping spaces, the authors illustrate how the online world of doping has developed into a digital ecosystem, and present an argument for understanding doping as a cyborgified concept. It will be of interest to students and researchers of sport and digital sociology, media studies, social work, drug studies and gender studies

The New Media Frontier John Mark Reynolds, Roger Overton, 2008 A Pew Study reports that only 2% of America's twelve million bloggers claim religion, spirituality or faith as their main topic. This leaves a great mission field in cyberspace, say contributors to *The New Media Frontier*, because the latest forms of communication present so many opportunities to promote the cause of Christ in other topics and fields. Before blindly jumping in, however, Christians need to weigh the possibilities against the consequences, and then proceed with the practical discernment and grace this book provides. With a foreword by national radio host Hugh Hewitt—who has been at the forefront of the new media movement among Christians—editors Roger Overton and John Mark

Reynolds (along with an impressive list of other new media experts) survey the current landscape and explore specific areas in which God's people can creatively expand their reach to a lost world. By stressing the urgency for Christian involvement, unearthing the dangers, and advising readers on how to use this media with different audiences, this book equips believers to advance, demonstrate, and utilize the Christian worldview in this exciting realm.

A Treatise on Topical Corticosteroids in Dermatology Koushik Lahiri, 2017-08-11 This treatise aims to fill up the lacuna and to contribute significantly to the dissemination of knowledge about the indication/contraindication, mechanism of action, ethical use, side-effects and various other facets related to topical corticosteroid. Topical corticosteroids (TC) have greatly enhanced dermatologists' ability to effectively treat several difficult dermatoses. The available range of formulations and potencies allows them to flexibly treat all groups of patients, different phases of disease, and different anatomic sites. Improper/incomplete knowledge about topical corticosteroids' mechanism of action, indications, classifications, and contraindications has produced a rapid rise in the incidence of improper use of these drugs, which could potentially bring disrepute to this entire group of amazing drugs. Responsibility for disseminating proper knowledge regarding when, where, and how to use TC both to internists and patients primarily rests with dermatologists. In this regard, the benefits of rational and ethical use and the potential harm of overuse and misuse for nonmedical, especially cosmetic purposes, should be clearly conveyed before prescribing TC.

Performance Cultures and Doped Bodies Jesper Andreasson, April

Henning, 2021-06-30 Why has doping, both as a practice and a social phenomenon, been approached largely as a question of context: sport or fitness? Individuals may use substances to enhance sporting performance or within the framework of gym and fitness culture to create a perfect body. But clearly, people who dope are not bound to a singular context. It is quite the opposite, as individuals weave between and move across various settings in their trajectories to and from doping, as goals, identities, ambitions, and lifestyles change over time. Still, these stark categorizations often made in public discourse – and reinforced by scholars – have continued to ignore these lived experiences and limited our understanding of doping. Building on data gathered through ethnographic fieldwork, studies of online doping communities, and in-depth case studies, this book embraces the challenge of moving beyond traditional and historical doping dichotomies – such as those of sport or fitness, online or offline, pleasure or harm, masculinity or femininity, and health or harm – and, in a sociologically informed analysis, it develops new terminology to understand trajectories to and from doping. It argues there are multiple ways to understand doped bodies and doping practices, and that we must approach these questions from the perspective of both/and rather than either/or. By imploding these divisions, it offers updated and nuanced ways of both empirically and theoretically rethinking doping use and experiences attached to the practice.

Multiple Streams of Internet Income Robert G. Allen, 2010-12-13 Following the success of the bestselling Multiple Streams of Income, Multiple Streams of Internet Income took the idea of making money on the Internet to the next level, by revealing how to deliver a marketing message faster, cheaper, and to a larger number of potential customers. This new updated edition includes

the same wisdom that made Allen one of the most influential financial advisors in the world, but also features updated information on everything readers need to know. The book features the original seven powerful methods that average people can use to make money on the Internet, and covers such topics as taking offline products online, niche marketing, successful Web-based business models, information marketing, affiliate programs, and more. There's plenty of new material in this Second Edition, including coverage of new federal and state laws covering spam and how to work around much of the new anti-spam technology active on the Internet. All the Web sites and online resources featured in the book have also been updated.

Fitness Doping Jesper Andreasson, Thomas Johansson, 2019-06-25 This book compiles several years of multi-faceted qualitative research on fitness doping to provide a fresh insight into how the growing phenomenon intersects with issues of gender, body and health in contemporary society. Drawing on biographical interviews, as well as online and offline ethnography, Andreasson and Johansson analyse how, in the context of the global development of gym and fitness culture, particular doping trajectories are formulated, and users come into contact with doping. They also explore users' internalisation of particular values, practices and communications and analyse how this influences understandings of the self, health, gender and the body, as well as tying this into wider beliefs regarding individual freedom and the law. This insight into doping goes beyond elite and organised sports, and will be of interest to students and scholars across the sociology of sport, leisure studies, and gender and body politics.

Understanding Drug Dealing and Illicit Drug Markets Tammy C. Ayres, Craig Ancrum, 2023-07-31 This book examines the drug dealer in contemporary society

from an interdisciplinary perspective and considers the increasingly blurred demarcation between illegitimate and legitimate drug markets. It explores the motives and drivers of those involved in drug supply and dispels common and stereotypical myths and misconceptions surrounding illegal drug markets and those who operate within them. The drug dealer has become one of our foremost contemporary 'folk devils'. Those who trade in substances prohibited by law are the subject of array of inaccurate myths and urban legends. Criminology has tended either to shoehorn drug dealers into neat typologies or portray them as 'victims' of an uncaring, predatory post-modern society. In reality, we know relatively little about the complex and diverse world of drug markets and our concentration inevitably falls on low-end 'retail' dealers who operate in the most visible sectors of the illegal economy. Bringing together an international group of experts, this book considers perspectives from around the world, including UK, USA, South America, Spain, India and Australia. This book will be of interest to students and researchers across criminology, law, sociology, criminal justice and public health, and will be essential reading for those taking courses on drugs, drug markets and substance misuse.

Hawking Hits on the Information Highway Laura L. Finley, 2008 This book examines the phenomenon of online drug and drug paraphernalia sales, drug recipes, and information about drugs. Discussing the availability of products and advice regarding prescription drugs, steroids, and illicit drugs, the book also offers a profile of who is buying, selling, and sharing these products and this information. Additionally, *Hawking Hits on the Information Highway* examines the rise of drug testing as a vehicle of the war on drugs, and looks at how the Web has been used to market products and tips for

cheating on drug tests. The book identifies the challenges for law enforcement and other bodies in policing the Web, and details how Internet-based sales are altering the war on drugs. This groundbreaking book will particularly benefit students in college courses specifically addressing drugs, criminology, and law enforcement, and will be useful in any course examining wider social issues.

Drugs and Sports Facts On File, Incorporated, 2007 Provides an overview of the issues associated with the use of drugs in sports, with a glossary of terms and a fully annotated bibliography.

Anabolics William Llewellyn, 2011 William Llewellyn's ANABOLICS is the most comprehensive guide to performance-enhancing drugs ever written. This monster encyclopedia covers it all, from steroids, to growth hormone, insulin, and just about every imaginable agent in-between. With over 800 medical citations, ANABOLICS cuts right to the science. You'll learn everything there is to know about this controversial subject, from one of the most trusted experts in the field

Routledge Handbook of Sport and Corporate Social Responsibility Juan Luis Paramio Salcines, Kathy Babiak, Geoff Walters, 2013-07-18 As the role of sport in society becomes ever more prominent and as sports organisations become increasingly influential members of the global community, so it has become more important than ever for sport to consider its wider social responsibilities. The Routledge Handbook of Sport and Corporate Social Responsibility is the first book to offer a comprehensive survey of theories and concepts of CSR as applied to sport, and the social, ethical and environmental aspects of sport business and management. It offers an overview of perspectives and approaches to CSR in sport, examines the unique features

of the sport industry in relation to CSR, explores the tools, models, common pitfalls and examples of best practice on which managers can draw, and discusses how CSR and corporate citizenship can be integrated into the sport management curriculum. The book covers every key issue and functional area, including implementation, strategic benefits, communication and corporate image, stakeholder engagement, and the measurement and evaluation of CSR policies and practices, and includes detailed international case studies, from the NBA and the Olympic Games to Japanese soccer. The Routledge Handbook of Sport and Corporate Social Responsibility is important reading for any student, researcher, manager or policy maker with an interest in sport business, management, ethics or development.

A World Gone Social Ted Coine, Mark Babbitt, 2014-09-17 Amazingly, what started out as an opportunity to link friends and to find out who's dating who has since made a meteor-like impact on the business world, and its ongoing effects throughout every single aspect of doing business cannot be overestimated. The world as we know it has changed forever. And it's not going back! A World Gone Social offers an eye-opening look at fundamental and powerful changes the social collaboration era has set in motion:• Customers now have the power--just watch what happens as more realize it!• Command-and-control leadership is now so inefficient, it is a liability.• Nimble and small is the new competitive advantage.• Recruiting is now a two-way proposition, with job seekers able to peek behind the corporate curtain.• Relationship and community-building is how customers are brand ambassadors are won--and retained.• Active engagement with partners, employees, and customers is no longer a luxury but a requirement. But this invaluable resource for any business wishing to remain relevant in this Social

Revolution doesn't stop with simply pointing out the changes that have evolved in recent years. More importantly, it provides critical guidance for navigating today's customer-driven, ultra-transparent, constantly evolving environment. With compelling stories and concrete examples of companies demonstrating enlightened business practices and doing Social right--and some that are not--readers will be able to learn from others' experiences and discover how to objectively assess their own company's culture and social presence. The world has gone social . . . don't get left behind!

Uniting Marketing Efforts for the Common Good--A Challenge for the Fourth Sector Ana Maria Soares, Beatriz Casais, 2023-06-16 The convergence of profit, public, nonprofit and social organizations constitutes an increasingly important reality that has been labeled the fourth sector. This movement brings together talents, resources, and skills from governmental and non-governmental partners, corporations, and civil society at large to leverage well-being responses and develop new approaches to address social challenges. The diversity and complexity of these problems heightened by the COVID-19 pandemic call for a collective social effort and innovative solutions. Despite the growing importance and initiatives taking ownership of community well-being through fostering partnerships in which different stakeholders share responsibilities to build a better future and common good, this is an under-researched area. This edited book discusses the challenges and opportunities of the emerging fourth sector, and features selected papers

from XXI International Congress on Public and Nonprofit Marketing (IAPNM 2022) held at the University of Minho in Braga (Portugal) in July 2022.

Strategies for e-Business Tawfik Jelassi, Francisco J. Martínez-López, 2020-06-28 This is the fourth edition of a unique textbook that provides extensive coverage of the evolution, the current state, and the practice of e-business strategies. It provides a solid introduction to understanding e-business and e-commerce by combining fundamental concepts and application models with practice-based case studies. An ideal classroom companion for business schools, the authors use their extensive knowledge to show how corporate strategy can imbibe and thrive by adopting vibrant e-business frameworks with proper tools. Students will gain a thorough knowledge of developing electronic and mobile commerce strategies and the methods to deal with these issues and challenges.

Severe Community Acquired Pneumonia Jordi Rello, Kenneth V. Leeper, Kenneth Leeper, 2001-06-30 *Severe Community Acquired Pneumonia* is a book in which chapters are authored and the same topics discussed by North American and European experts. This approach provides a unique opportunity to view the different perspectives and points of view on this subject. Severe CAP is a common clinical problem encountered in the ICU setting. This book reviews topics concerning the pathogenesis, diagnosis and management of SCAP. The discussions on the role of alcohol in severe CAP and adjunctive therapies are important topics that further our understanding of this severe respiratory infection.

Legal Muscle Rick Collins, 2002 This book shatters the myths and misconceptions about steroid use in America. Authored by the nationally recognized legal authority on anabolics and founder of www.SteroidLaw.com,

it's essential reading for natural and juiced athletes alike, and for coaches, sports trainers, physicians, journalists, and anyone in the criminal justice system. Legal Muscle is the never-before-told truth!

Marketing For Competitiveness: Asia To The World - In The Age Of Digital Consumers Philip Kotler, Hermanwan Kartajaya, Den Huan Hooi, 2016-11-24 Asia is the most populated geographical region, with 50% of the world's inhabitants living there. Coupled that with the impressive economic growth rates in many Asian countries, the region provides a very attractive and lucrative market for many businesses, big and small and from all industries. In addition, Asia is also a dynamic market that significantly grows with developments in technology and digitalization. For example, a research by Google and Temasek shows that Southeast Asia is the world's fastest growing internet region. The internet economy in Southeast Asia is expected to grow by 6.5 times from US\$31 billion in 2015 to US\$197 billion in 2025. All these make it critical for marketers, whether domestic, regional or global, to stay in touch if not ahead, in their understanding of what is happening in Asia from a marketing perspective and what Asia has to offer to the world. One phenomenon happening in the Asian market and which marketers should pay utmost attention to, is the rapidly unfolding digital revolution that has fundamentally transformed not just the extent but also the nature of competition. What makes it even more challenging and complicating is also how such a revolution impacts on consumer and business buying behavior. Disruptive technologies supported by this digital revolution have brought in new competitors and enabled existing competitors to surpass the conventional boundaries which we may be quite familiar with. Asian consumers have become more educated and connected and have embraced newer ways of selecting, buying and using products and

services. In this book, the Father of Modern Marketing, Professor Philip Kotler has collaborated with two marketing experts from Asia, Hermawan Kartajaya from Indonesia and Hooi Den Huan from Singapore to publish a book on Marketing for Competitiveness: Asia to the World – In the Age of Digital Consumers. This book argues that marketing is no longer just vertical but has encompassed a new, more horizontal paradigm. In addition to many new concepts and frameworks, this book includes a plethora of real-world examples from various countries in Asia, which will help to shed light on how companies, both Asian and global, compete in Asia. Useful lessons can be drawn by all businesses in the world on how to win the mind, heart and spirit of the Asian consumer – digital and non-digital.
