**Reminiscences of a Stock Operator** Edwin Lefèvre,1923 There is nothing new in Wall Street. There can't be because speculation is as old as the hills. Whatever happens in the stock market today has happened before and will happen again. The desire for constant action irrespective of underlying conditions is responsible for many losses in Wall Street even among professionals. I never lose my temper over the stock market. I never argue the tape. Getting sore at the market doesn't get you anywhere. They say you can never go poor taking profits. No, you don't. But neither do you grow rich taking a four-point profit in a bull market. Where I should have made twenty thousand I made two thousand. That was what my conservatism did for me. Remember that stocks are never too high for you to begin buying or too low to begin selling. A man may see straight and clearly and yet become impatient or doubtful when the market takes its time about doing as he figured it must do. That is why so many men in Wall Street...nevertheless lose money. The market does not beat them. They beat themselves, because though they have brains they cannot sit tight. After spending many years in Wall Street and after making and losing millions of dollars I want to tell you this: It never was my thinking that made the big money for me. It always was the sitting. Got that? My sitting tight! Losing money is the least of my troubles. A loss never bothers me after I take it...But being wrong—not taking the loss—that is what does the damage to the pocketbook and to the soul. Prices, like everything else, move along the line of least resistance. They will do whatever comes easiest. The speculator's chief enemies are always boring from within. It is inseparable from human nature to hope and to fear. In speculation when the market goes against you hope that every day will be the last day—and you lose more than you should had you not listened to hope—the same ally that is so potent a success-bringer to empire builders and pioneers, big and little. And when the market goes your way you become fearful that the next day will take away your profit, and you get out—too soon. Fear keeps you from making as much money as you ought to. The successful trader has to fight these two deep-seated instincts...Instead of hoping he must fear; instead of fearing he must hope.

**How to Invest In the Stock Market: Learn to Trade, How to Make Money on the Stock Market ,**

Chronology of the Stock Market Russell O. Wright,2002 On May 17, 1792, a group of 24 U.S. merchant-brokers established a formal operation for trading securities (mostly bonds issued by Alexander Hamilton to raise money to redeem the paper money the Continental Congress printed to finance the Revolutionary War). The pact was called the Buttonwood Agreement (it was supposedly signed under a large buttonwood tree, a rarity in New York since the British had burned most of the trees during the war). On March 8, 1817, the turmoil of the War of 1812 led the signers of the Buttonwood Agreement to join with other traders to form the New York Stock & Exchange Board, which rented rooms at 40 Wall Street. This chronology covers early trading and the evolution of the stock exchange in the United States, the establishment of various market indexes and the development of market regulation, and reveals how the market was affected by historical events. Much attention is given to the New York Stock Exchange, since for most of its existence it has been much bigger than all other stock exchanges combined. Also included are appendices that cover such topics as basic investment risk, high growth from fixed rates, long term stock market drops, evaluating stocks, the dot.com phenomenon, market indexes, and axioms about the stock market.

Regularly priced at \$9.99. Read on your PC, Mac, smart phone, tablet or Kindle device Minervini tells about his thirty-plus years trading stocks starting in the 1980's and how he was a multi-millionaire by the time he was 34. He talks about his struggles stating that he didn't start out successful in fact he didn't make a significant return for six years However, the more he practiced his craft the better he got and the more return he made. He adds a quote by Laila Ali that says Impossible is just a big word thrown around by small men who find it easier to live in the world they've been given than to explore the power they have to change it. That attitude is evident in the following pages. He talks about how his real life education began when he was 15 and dropped out of school. He then realized he needed a way to make money, but didn't know who would hire a 15-year-old drop out. He began by reading the financial news and poring over stock market reports, as well as building himself an impressive library of over 1,000 investment books alone. Trading appealed to him because there was a lot of freedom. Freedom to stay at home and most of all freedom to use his talents to become a stock market Superperformer He talks about the difference between interest and commitment. While you need interest to start working towards something, you require commitment to become successful. He also states that there is no substitute for real life experience, he shares his tactics but there is no way to become a Superperformer without experiencing it yourself. One of the most important things he talks about is learning to be a great trader first, he states For me, the greatest success came when I finally decided to forget about the money and concentrate on being the best trader I could be. Then the money followed. **A Wealth of Common Sense** Ben Carlson,2015-06-22 A simple guide to a smarter strategy for the individual investor A Wealth of Common Sense sheds a refreshing light on investing, and shows you how a simplicity-based framework can lead to better investment decisions. The financial market is a complex system, but that doesn't mean it requires a complex strategy; in fact, this false premise is the driving force behind many investors' market mistakes. Information is important, but understanding and perspective are the keys to better decision-making. This book describes the proper way to view the markets and your portfolio, and show you the simple strategies that make investing more profitable, less confusing, and less time-consuming. Without the burden of short-term performance benchmarks, individual investors have the advantage of focusing on the long view, and the freedom to construct the kind of portfolio that will serve their investment goals best. This book proves how complex strategies essentially waste these advantages, and provides an alternative game plan for those ready to simplify. Complexity is often used as a mechanism for talking investors into unnecessary purchases, when all most need is a deeper understanding of conventional options. This book explains which issues you actually should pay attention to, and which ones are simply used for an illusion of intelligence and control. Keep up with—or beat—professional money managers Exploit stock market volatility to your utmost advantage Learn where advisors and consultants fit into smart strategy Build a portfolio that makes sense for your particular situation You don't have to outsmart the market if you can simply outperform it. Cut through the confusion and noise and focus on what actually matters. A Wealth of Common Sense clears the air, and gives you the insight you need to become a smarter, more successful investor.
