Bad Breath Cure David a Osei,2019-11-20 IThere are over 90 million people who suffer from simple bad breath or from more severe halitosis. For most people the cause of their bad breath will emanate from their teeth, gums, and tongue. The bad odor will come from bacteria in the mouth that is the result of food particles left in the mouth after eating. Poor dental habits can also be a major contributing cause of bad breath. Decay in the mouth will produce a sulphur compound which leaves behind a bad smell.If you have bad breath you'll want to take a look at your oral hygiene habits. When you brush your teeth make sure that you also brush your tongue, the inside of your cheeks, and the roof of your mouth. You want to be sure to remove all the food particles and bacteria from your mouth. You'll also want to make sure that you floss your teeth to remove any food particles that are trapped between your teeth. Use a mouthwash as a temporary solution to your bad breath, however if the problem is still there make sure that you talk to your dentist to see if you have gum disease or tooth decay.Bad breath can also occur for other reasons that include a dry mouth, diabetes, infection, liver problems, or kidney failure. Smoking is another contributing factor. Many cancer patients will find that they have a dry mouth after they have undergone radiation therapy. Lack of saliva in the mouth can lead to bad breath since food particles won't be washed away. Other reasons why you may experience bad breath include stress, dieting, your age, hormonal problems, and snoring.If you have an odor that emanates from the back of your mouth you may have post-nasal drip. Post-nasal drip occurs when the mucus that is secreted from your nose moves into your throat. The mucus then gets stuck on your tongue and this can produce a foul smell.The number one thing that you need to keep mouth odors under control is an ample amount of saliva. Saliva is needed to wash away the bacteria and food particles that become stuck in your mouth. As you sleep the amount of saliva that is produced will lessen. This is why most people wake up with some level of morning breath. To get rid of morning breath you simply need to brush and floss your teeth so that the odor is washed away. Eating a morning meal is another way to get rid of morning breath since this will get the saliva flowing once again.

HOME REMEDIES FOR BAD BREATH (HALITOSIS) Temilola Globalwalyy,2014-10-16 Halitosis also known as Bad Breath is an oral health problem where the main symptom is bad smelling breath. In most cases, finding the cause of the bad breath is the first step toward treating this preventable condition. More than 80 million people suffer from chronic halitosis, or bad breath. Halitosis! : . the Ultimate Guide to Get Rid of Halitosis Without Delay... Including the Simple Secrets on How to Get Rid of Bad Breath with Home Remedies for Bad Breath Cure Today Brian Jeff,2016-06-25 We all one way or the other have experienced or encountered someone with a bad breath issue... Yes, and in fact, bad breath otherwise known as Halitosis is the commonest condition faced by most people whether young or old. But specifically, Halitosis is a term that is usually used to describe a situation where the mouth or buccal cavity emits unpleasant odor. Therefore, in this book, I will be using the term halitosis and bad breath interchangeably as both mean the same thing. Besides that, other terms like breath odor or oral malodor can also be used to describe the same situation where strikingly nasty odors are exhaled during breathing process. Well, in its simplicity, Halitosis is known to be caused by the occurrence of enormous cluster of bacteria that are present in the mouth; without doubt, this ultimately needs to be treated continuously if the affected individual is hoping to be rid of the bad breath. Now, even though, the details for bad breath are not wholly understood, but it has been made obvious that retaining food particle in between the teeth have been identified to be one of the most common causes. More so, research has shown that about 400 different species or varieties of bacteria are present in a regular mouth or oral cavity. Yes, these bacteria are responsible for the transformation of those food particles into what we get as bad breath or mouth odor. Now, to be upfront with you, it is important for us to know that the problem starts when an individual's oral hygiene is so poor that it allows many of these bacteria to begin to reproduce in their thousands which will eventually give rise to bad breath or halitosis. And I must say here that, several varieties of such bacteria are typically found behind the individual's tongue which protects them from regular mouth activities as the brush hardly reach the nether parts of the tongue. What this means is that these bacteria will then have a filled day multiplying without any inhibitions. Well, at this moment I want you to take the step while you are here to get the book and avail yourself the opportunity of all the tips keep bad breath at bay.
