The Streaming Media Guide Michael D'Oliveiro,2019-06-03 Streaming media has irreversibly revolutionised the ways in which media is transmitted and consumed. Most of us engage with streaming media on a daily basis via platforms that deliver our entertainment: Spotify, YouTube and Netflix are new brands which many of us engage with daily for our information and entertainment. It has created upheaval in the entire value chain and wiped out industries slow to adapt to it (like the video store rental chain). And it continues to evolve. Streaming media is transforming business communications in myriad ways, and it is becoming almost as crucial for project managers and marketers to understand streaming technology as it is for media professionals. The Streaming Media Guide demystifies the technology and features behind a successful streaming media service, especially in the context of how it is used by broadcasters and other media organisations. Common terms and systems being used in this space are presented and defined

simply and clearly for non-technical readers. Best practice examples from Michael D'Oliveiro's experiences demonstrate how this technology can be successfully implemented. This book equips any media professional with the most basic of traditional media knowledge to enable confident conversations in the typical media organisation they work in. For technology-based graduates or dedicated broadcast professional seeking to refresh their understanding, this book provides enough information to form a solid foundation for day-to-day work. Finally, for leaders in cross-functional senior management matrices, information is provided to enable you to understand and exploit streaming media capabilities as a business. This will be the ultimate reference source, guaranteed to be bedside reading for anyone serious about using streaming media.

Streaming and Copyright Law Lasantha Ariyarathna,2022-09-05 This book examines the challenges posed to Australian copyright law by streaming, from the end-user perspective. It compares the Australian position with the European Union and United States to draw lessons from them, regarding how they have dealt with streaming and copyright. By critically examining the technological functionality of streaming and the failure of copyright enforcement against the masses, it argues for strengthening end-user rights. The rising popularity of streaming has resulted in a revolutionary change to how digital content, such as sound recordings, cinematographic films, and radio and television broadcasts, is used on the internet. Superseding the conventional method of downloading, using streaming to access digital content has challenged copyright law, because it is not clear whether end-user acts of streaming constitute copyright infringement. These prevailing grey areas between copyright and streaming often make end-users feel doubtful about accessing digital content through streaming. It is uncertain whether exercising the right of reproduction is appropriately suited for streaming, given the ambiguities of "embodiment" and scope of "substantial part". Conversely, the fair dealing defence in Australia cannot be used aptly to defend end-users' acts of streaming digital content, because end-users who use streaming to access digital content can rarely rely on the defence of fair dealing for the purposes of criticism or review, news reporting, parody or satire, or research or study. When considering a temporary copy exception, end-users are at risk of being held liable for infringement when using streaming to access a website that contains infringing digital content, even if they lack any knowledge about the content's infringing nature. Moreover, the grey areas in circumventing geo-blocking have made end-users hesitant to access websites through streaming because it is not clear whether technological protection measures apply to geo-blocking. End-users have a severe lack of knowledge about whether they can use circumvention methods, such as virtual private networks, to access streaming websites without being held liable for copyright infringement. Despite the intricacies between copyright and access to digital content, the recently implemented website-blocking laws have emboldened copyright owners while suppressing end-users' access to digital content. This is because the principles of proportionality and public interest have been given less attention when determining website-blocking injunctions.
