Street View Pascal Rabaté,2014 This unique and brilliant accordion book opens up in two directions to reveal a street scene during the day and night. A window may serve as a source of light and fresh air, but it also presents a view onto the life of a street and its many other windows, each a separate scene of its own, with its multitude of on-going stories developing before your eyes. Within those windows, you can witness the lives of single people, couples, families, stories of love, separation and maybe even murder!

Jon Rafman Joanne McNeil,Sohrab Mohebbi,2016 Nine Eyes documents screen captures taken from Google Street View. In 2007 Google began adding street views to its maps, photographs taken by a worldwide fleet of hybrid electric automobiles, each one bearing a nine-lensed camera mounted on a rooftop pole. This clothbound volume includes images from The Nine Eyes of Google Street View, an ongoing project by artist, filmmaker and essayist Jon Rafman (born 1981), whose work explores the impact of technology on consciousness. The photographs range from the beautifully symmetrical to the disturbingly violent--each, in some way, an extraordinary moment captured forever through a mapping service. Rafman's project reveals that while the world as presented by Google appears to be truthful and transparent, this way of photographing creates a cultural text like any other, a structured and structuring space whose codes and meaning the artist can assist in constructing and deciphering.

Street View Maryann Corbett,2017-09-11 Maryann Corbett's Street View is a panorama of views: suburban and urban avenues, shown in leaf and in snow; alleyways where misfits lurk in darkness, but also where "Adonis, charioteer of municipal waste collection, rides with the morning"; and boulevards of old buildings whose elegance remains undeniable, even when "prinked in the clown suit of commerce." Street View also navigates the resiliency and failings of the human body, and the memories of family and pivotal acquaintances that shape viewpoints for good or ill. This is the work of a seasoned poet in command of her craft, and deservedly, a finalist for the 2016 Able Muse Book Award. PRAISE FOR STREET VIEW: Assaulted, as we all are, by relentless, restless noise-throbbing subwoofers, urban construction, cynical marketing and violent news, even our own banal chitchat-Maryann Corbett "strafe[s] back with the whole Roget/ and gun[s her] engine to its own rough strife. . . ." Though her weapons, her engines, are stillness, insight, and rhythm, there is indeed a sense in which the poems in Street View wallop their subjects with language. The exquisite, seemingly effortless grace of these poems with their penetrating music and humor deserve a commendation like that the poet gives Veronese: "This is the catechesis/ we need now, for the kind of sight we work with/ here, where the world kabooms." -George David Clark Given her gift with detail, Maryann Corbett is the perfect person to offer a view, but an even more perfect person to offer a "street view," the title of her new collection. While Corbett has made a career of being precise, she can be whimsical as well, right down to the "Northrop Mall . . . as fixed and formal as an English sonnet." Yet perhaps her greatest strength is that she is not afraid to be the quiet steady gaze that takes in everything: all the things most people would miss. -Kim Bridgford Maryann Corbett takes the ode less traveled (not to mention the terzanelle less tried and the dactylic hexameter almost unheard of) to oddly familiar destinations: the West Side Y in New York City, Grand Avenue in St. Paul, the dentist's clinic. She is a rhapsodist of times past and places lost or endangered, but she also lives very much in the present. She examines experiences with shrewdness and fascination, crafting them into poems that are breathtaking in their intelligence and brio. -Susan McLean In Maryann Corbett's new book, we are given a Street View on the world, from Minneapolis to Jerusalem. These streets are populated with a variety of town characters, from the vagrant to the dangerous academic "Weirdo" with his void-sucked soul who makes one think of mass killings. Suffice it to say that the street view might be uglier than the view onto the mountains or the ocean, but in that ugliness can be found a clearer view on the truth of how we live today. -Tony Barnstone

Google and the Law Aurelio Lopez-Tarruella,2012-02-22 Google's has proved to be one of the most successful business models in today's knowledge economy. Its services and applications have become part of our day-to-day life. However, Google has repeatedly been accused of acting outside the law in the development of services such as Adwords, Googlebooks or YouTube. One of the main purposes of this book is to assess whether those accusations are well-founded. But more important than that, this book provides a deeper reflection: are current legal systems adapted to business models such as that of Google or are they conceived for an industrial economy? Do the various lawsuits involving Google show an evolution of the existing legal framework that might favour the flourishing of other knowledge-economy businesses? Or do they simply reflect that Google has gone too far? What lessons can other knowledge-based businesses learn from all the disputes in which Google has been or is involved? This book is valuable reading for legal practitioners and academics in the field of information technologies and intellectual property law, economists interested in knowledge-economy business models and sociologists interested in internet and social networks. Dr. Aurelio Lopez-Tarruella is Senior Lecturer in Private International Law at the University of Alicante, Spain.

Research Handbook on the Law of Virtual and Augmented Reality Woodrow Barfield,Marc Jonathan Blitz,2018-12-28 Virtual and augmented reality raise significant questions for law and policy. When should virtual world activities or augmented reality images count as protected First Amendment ‘speech’, and when are they instead a nuisance or trespass? When does copying them infringe intellectual property laws? When should a person (or computer) face legal consequences for allegedly harmful virtual acts? The Research Handbook on the Law of Virtual and Augmented Reality addresses these questions and others, drawing upon free speech doctrine, criminal law, issues of data protection and privacy, legal rights for increasingly intelligent avatars, and issues of jurisdiction within virtual and augmented reality worlds.
