**Understanding and Controlling Strobe Lighting** John Siskin,2010-11 John Siskin lays out a simple process for designing effective strobe-lighting setups for portraits, architecture, still-life images and more. According to Siskin, the most important skill is pre-visualisation. After exploring the quality, quantity, value, versatility and ease of use of many modifiers and sources, including less-traditional laptop screens, flashlights and slide projectors, Siskin moves on to using the correct exposure and camera settings.

Crafting the Natural Light Look Sandra Coan,2020-01-31

Learn to use a one-light approach for recreating the look of beautiful, natural window light for portraiture!

At its best, natural light is magical for portraiture. The quality of natural light streaming through a window can be extraordinary—gorgeous, wrapping light that flatters your subject and can be used to create multiple looks. For years, photographer Sandra Coan exclusively used natural light in her portraiture work. And while the results could be magnificent, she also learned that she could not rely on it to build a business and create consistently great photographs. That’s because natural light is frustratingly unpredictable: sometimes it rains, sometimes the light is too harsh when your clients are available, and sometimes—depending on the time of year—it’s just too dark.

In order to grow her business with dependably great results and a high level of professionalism, Sandra finally decided to tackle artificial light. She spent years honing her ability to use artificial light to recreate the look of beautiful, natural light. And now, with a simple one-light approach, she produces “natural” light whenever and wherever she likes, creating great portraits in any situation, at any time of day or night. It’s an approach that has led to a successful career spanning two decades and a signature look to her work. Here, in *Crafting the Natural Light Look*, Sandra shares her knowledge and

techniques so that you, too, can learn to quickly and dependably create the look of natural light in your own portraiture. Unlike other books that address artificial light, Sandra's tone is conversational and easygoing, and she does not cover everything there is to know about artificial light. In fact, there are no two- or three-light setups here. Instead, Sandra's method is straightforward and easily actionable. She covers:

- The key characteristics of light (intensity, distance, direction)
- Equipment: strobes, flashes, light meters, triggers, receivers, modifiers, reflectors, and light stands—including what she uses, and what she recommends if starting out on a budget
- Shutter speed and its relationship with artificial light
- Where to position the light and the subject for consistent, flattering results
- Creating four lighting patterns and looks with one setup—flat light, loop light, side light, and

backlight

- Using a light meter to determine the perfect flash power (whether you shoot film or digital)
- Working with individuals, families, and groups
- The role of shadows in its contribution to the drama and mood of a portrait
- Common mistakes and how to avoid them
- What she does in post-production (very little!)

Finally, in a series of case studies, she brings it all together and shares her thought process as she works through a number of real-world portrait shoots from start to finish. If you're a "natural light photographer" who's been either struggling with flash or reluctant to learn it at all, *Crafting the Natural Light Look* is exactly the book you need to improve the quality and consistency of your portraiture.

**SPIN** ,1996-11 From the concert stage to the dressing room, from the recording studio to the

digital realm, SPIN surveys the modern musical landscape and the culture around it with authoritative reporting, provocative interviews, and a discerning critical ear. With dynamic photography, bold graphic design, and informed irreverence, the pages of SPIN pulsate with the energy of today's most innovative sounds. Whether covering what's new or what's next, SPIN is your monthly VIP pass to all that rocks.

*ABCs of Beautiful Light* Rosanne Olson, 2014-07-21 Everything we see is lit by one source or another. The questions are: what and how? That is what this book is designed to teach you. Through Rosanne Olson's tried-and-true course on lighting principles for photography, video, and art in general, you will discover how the angles and heights of your light sources affect your pictures. You will learn how to work with light modifiers to change the quality of your light, and how to control light to create a feeling of depth and dimension—whether you're shooting with natural light, continuous artificial light, studio strobes, dedicated flash, or a combination of sources. Assignments are included to help you put each concept into practice as you perfect your skills and train your eyes to see the subtleties of light.

You will never look at a photograph or painting in the same way after you read this book!

**Sketching Light** Joe McNally, 2011-12-06 Following up on the great success of *The Moment It Clicks* and *The Hot Shoe Diaries: Big Light from Small Flashes*, legendary magazine photographer Joe McNally takes us on another memorable ride with *Sketching Light*, another trip into the land of light--but this time running the gamut from small flash to big flash, and everywhere in between. Of course, Joe includes coverage of Nikon Speedlights, but he also covers big flash, as well as in-between lights as the Elinchrom Quadra. The exploration of new technology, as well as the explanation of older technology. No matter what equipment Joe uses and discusses, the most important element of Joe's instruction is that it is straightforward, complete, and honest. No secrets are held back, and the principles he talks about apply generally to the shaping and quality of light, not just to an individual model or brand of flash. He tells readers what works and what doesn't via his let's-see-what-happens approach, he shows how he sets up his shots with plentiful sketches and behind-the-scenes production shots, and he does it all with the intelligence, clarity, and wisdom that can only come from shooting in the field for 30 years for the likes of National Geographic, Time, Life, and Sports Illustrated-

-not to mention the wit and humor of a clearly warped (if gifted) mind.
