Rock and Roll Fantasy? Ronnie Phillips, 2012-11-19 We are in an era where

developments in both technology and musical style have coalesced to produce the greatest period of change in the music industry since the invention of recorded sound.

Globalization, the Internet, and digital technology are now opening up possibilities for more artists to be innovative and financially successful. But new music requires new ways of doing business. For more artists to be better off requires new business models to replace those that dominated the 20th century. Integrating insights from economics, management, and intellectual property law, the author explores the dynamics of entrepreneurship and innovation in the music industry, and offers such provocative assessments as these: · The Beatles might never have broken up if they had the kind of two-tier contracts – as band members and as solo artists – that are common in the music industry today. · Buddy Holly would likely have avoided his tragic death in a plane crash at age 22 if his 1959 tour had been sponsored by a company like Coca Cola because today's corporatized tours are vastly better financed and organized than the haphazard efforts of the 1950s. · The economic value of albums by the likes of Elvis and Michael Jackson has risen significantly since their deaths – the ironic byproduct of the way their behavior tarnished their own brands while they were alive. · Diana Ross might never have quit The Supremes if she had known that one-third of the artists in the 1960s who quit the group had charting careers of only one year. · Thomas Edison's invention of the phonograph led to the modern record industry, but he is really the godfather of computer programs like Garageband which have created home recording studios. The collapse of the Soviet Union threatened the sound of rock and roll but an American entrepreneur saved the day.

GarageBand for Mac. From Idea to Final Mastering Marco Perino, 2022-11-23
GarageBand allows you to be, or become, a Producer ! You only need to feel like playing. With this manual you will create an original song from scratch touching on all the production stages: from pre-production to drafting the piece from the Vocal Line to Intonation from Recording to Editing from Midi to Sound Design from Mix to Mastering... to the Release. Illustrated steps will show you in a PRACTICAL way, hands on the mouse, how

to produce a song from scratch, and you will also be taught how to avoid the most common mistakes. You'll learn to produce by producing! Do you know the demo buttons, the demos of keyboards sold in music stores or supermarkets? I always press them to understand what I can achieve with that particular model. They let you hear wonderful performances of harmonious sounds and rhythms. It's a pity that once I get home, the keyboard remains a Cinderella dressed in rags, with completely aseptic rhythms and sounds, making me feel partly inadequate, and partly fooled! I don't want to catch you, or make you feel fooled! Over the next pages, we're going to create a song together, from the beginning to the end, with hundreds of illustrated steps. I'm going to walk you through it with simple words, easily, the way I wish someone would have explained it to me... GarageBand is music! Music can be a hobby. Music can be a toy. Music can be a work... And with GarageBand Music can be you too !!! Compatible with all versions of GarageBand 10, with Downloadable Projects to follow the illustrated steps in the book. There are both projects created with the latest release of GarageBand, to be executed with the latest operating system, and projects created with GarageBand 10.2.0, to be executed on historic and stoic Macs with an operating system from El Capitan (macOS 10.11.6) and later. No user of GarageBand 10, of any version, will be left behind.
