Cultural Perspectives on Indigenous Students' Reading Performance Gui Ying Annie Yang-

Heim, 2023-03-21 This book explores the contextual, particularly cultural-related, factors that may impact reading outcomes of young Indigenous learners in their early years, underpinned by the conceptual framework of cultural capital originated by Bourdieu. By drawing upon a participatory and exploratory case study, conducted at a regional school in Australia over a period of six months, it highlights the challenges that Indigenous students face in reading, and how the contextual factors contribute to Indigenous students' development in reading skills and their reading performance. This book helps readers to gain a better and deeper understanding of Indigenous culture, the importance of the role that culture plays in Indigenous children's literacy education, and how it shapes the way they learn and think.

Models of Brushless Synchronous Generator for Studying Autonomous Electrical Power System Filip Kutt, 2020-07-15 This is a PhD dissertation. The work presented in this monograph was carried out at the Department of Power Electronics and Electrical Machines, Faculty of Electrical and Control Engineering at the Gdansk University of Technology. Developed during the research models

of brushless synchronous generator were verified using FEM based simulations and measurements conducted on the prototype generator. The main focus of the research was toward a brushless synchronous generator in variable frequency modern more electric aircraft power systems. The generator prototype was developed and its performance was analyzed with the focus on the higher rotational velocity of the prototype components and the generated power quality. For this FEM based and circuit models of the generator were developed and the machine performance was measured and simulated. The proposed circuit model allowed for the inclusion of nonsinusoidal spatial distribution of the magnetic flux along the air gap which in turn allowed for simulation-based power quality analysis.

An Introduction to Programming with ActionScript

3.0 Trish Cornez, Richard Cornez, 2013 An Introduction to Programming with ActionScript 3.0 provides an introduction to computer programming by employing an example-based methodology involving animation, sound, graphics, and interactivity. This text covers all key topics required for any introductory level programming course.

Foundation Game Design with ActionScript 3.0 Rex van der Spuy, 2012-03-28 In response to the success of the first edition of Foundation Game Design with Flash, Rex van der Spuy has revised and updated all the code to meet current programming best practices, and the focus is now on accurate ActionScript 3.0, regardless of the IDE that you use. We've all sneaked the odd five minutes here

or there playing the latest Flash game that someone sent around the office, but creating those games is trickier than it looks. The aim of Foundation Game Design with ActionScript 3.0 is to take you, even if you've minimal multimedia or programming experience, through a series of step-by-step examples and detailed case studies—to the point where you'll have the skills to independently design any conceivable 2D game using Flash and ActionScript. Foundation Game Design with ActionScript 3.0 is a non-technical one-stop shop for all the most important skills and techniques a beginning game designer needs to build games with Flash from scratch. Whether you're creating quick blasts of viral amusement, or more in-depth action or adventure titles, this is the book for you. Focused and friendly introduction to designing games with Flash and ActionScript Detailed case studies of Flash games Essential techniques for building games, with each chapter gently building on the skills of preceding chapters Modern best practices and new content on ActionScript 3.0 Also covers asset creation in Photoshop and Illustrator
