The Geography of Tourism and Recreation C.
Michael Hall,Stephen J. Page,2014-05-09 This
fourth edition of *The Geography of Tourism and
Recreation* provides students with a comprehensive
introduction to the interrelationship between
tourism, leisure and recreation from geographical
and social science perspectives. It still remains
the only book to systematically compare and
contrast in a spatial context, tourism and
recreation in relation to leisure time, offering
insight into the demand, supply, planning,
destination management and impacts of tourism and
recreation. Whilst retaining its accessible style
and approach this edition has been significantly
updated to reflect recent developments and new
concepts from geography which are beginning to
permeate the tourism and recreational field. New
features include: Content on the most recent
developments, climate change, sustainability,
mobilities and crisis management in time and space
as well as trends such as low cost airlines and
the control of land transport by transnational
operators in the EU such as Arriva. More attention

to management issues such as innovation and the spatial consequences for tourism and leisure development. New case studies and examples to showcase real life issues, from both developed and developing countries, especially the US, China and South Africa. Completely revised and redeveloped to accommodate new, user- friendly features: case studies, insights, summary points and learning objectives. Written by leading academics, this is essential reading for all tourism, geography, leisure and recreation students.
