The Post-Earthquake City Paul Cloke, David Conradson, Eric Pawson, Harvey C. Perkins, 2023-02-15 This book critically assesses Christchurch, New Zealand as an evolving post-earthquake city. It examines the impact of the 2010-13 Canterbury earthquake sequence, employing a chronological structure to consider 'damage and displacement', 'recovery and renewal' and 'the city in transition'. It offers a framework for understanding the multiple experiences and realities of post-earthquake recovery. It details how the rebuilding of the city has occurred and examines what has arisen in the context of an unprecedented opportunity to refashion land uses and social experience from the ground up. A recurring tension is observed between the desire and tendency of some to reproduce previous urban orthodoxies and the experimental efforts of others to fashion new cultures of progressive place-making and attention to the more-than-human city. The book offers several lessons for understanding disaster recovery in cities. It illuminates the opportunities disasters create for both the reassertion of the familiar and the emergence of the new; highlights the divergence of lived experience during recovery; and considers the extent to which a post-disaster city is prepared for likely climate futures. The book will be valuable reading for critical disaster researchers as well as geographers, sociologists, urban planners and policy makers interested in disaster recovery.

Lethal Force and New Zealand Police Richard S. Shortt, 2022-08-22 This book challenges the notion that the New Zealand Police are one of only four global police services that does not have routinely armed officers, using arguments and facts drawn from 2000 to 2019, a period of important change for the organisation and its relationship with firearms, particularly following the outrages of the Christchurch mosques terrorist massacres in 2019, and the 2020 shooting death of a young police constable in Aotearoa New Zealand. This book provides a brief history of the Police from its beginnings to the present day with a specific focus on its relationship with firearms, which contextualize the law that justifies use of lethal force in a country that has abolished the death penalty. It examines police policies, procedures, training and structures governing deployment and use of firearms in Aotearoa New Zealand, and the independent oversight that now applies to fatal and non-fatal shootings by Police. Using 43 publicly released oversight agency reports and data directly related to police shootings, such as who is being shot, this book investigates how the police are using lethal force, who is being affected, and what this might mean for the service with regards to the operational deployment of firearms and the potential for use of lethal force within the community into the future.

Standing up for a Sustainable World Claude Henry, Johan Rockström, Nicholas Stern, 2020-12-25 The world has witnessed extraordinary economic growth, poverty reduction and increased life expectancy and population since the end of WWII, but it has occurred at the expense of undermining life support systems on Earth and subjecting future generations to the real risk of destabilising the planet. This timely book exposes and explores this colossal environmental cost and the dangerous position the world is now in. *Standing up for a Sustainable World* is written by and about key individuals who have not only understood the threats to our planet, but also become witness to them and confronted them.

Business and Post-disaster Management C. Michael Hall, Sanna Malinen, Rob Vosslander, Russell Wordsworth, 2016-01-29 This book provides a comprehensive examination of the effects of a natural disaster on businesses and organisations, and on a range of stakeholders, including employees and consumers. Research on how communities and businesses respond to disasters can inform policy and mitigate the cost and impacts of future disasters. This book discusses how places recover following a disaster and the vital roles that business and other

organisations play. This volume gives a detailed understanding of business, organisational and consumer responses to the Christchurch earthquake sequence of 2010-2011, which caused 185 deaths, the loss of over 70 per cent of buildings in the city's CBD, major infrastructure damage, and severely affected the city's image. Despite the devastation, the businesses, organisations and people of Christchurch are now undergoing significant recovery. The book sheds significant new light not only on business and organisation response to disaster but on how business and urban systems may be made more resilient.

Urban Planning for Disaster Recovery Alan March, Maria Kornakova, 2017-05-10 Urban Planning for Disaster Recovery focuses on disaster recovery from the perspective of urban planning, an underutilized tactic that can significantly reduce disaster risks. The book examines disaster risk reduction (DRR), in particular, the recovery stage of what is widely known as the disaster cycle. The theoretical underpinning of the book derives from a number of sources in urban planning and disaster management literature, and is illustrated by a series of case studies. It consists of five sections, each of which opens with a conceptual framework that is followed by a series of supporting and illustrative cases as practical examples. These examples both complement and critique the theoretical base provided, demonstrating the need to apply the concepts in location-specific ways. Examines disaster recovery from an urban planning perspective Illustrates key concepts with real-world case studies Explores the contributions of experts, urban planners, NGOs, and community members

Small and Medium Sized Enterprises and the COVID-19 Response Etemad, Hamid, 2022-04-19 The international cast of authors in this important book explore how internationalizing small and medium sized enterprises (iSMEs) face major crises, such as COVID-19, and have managed them to

reach a stable and desired state post-crisis. Chapter orientations vary from theoretical to empirical. Each focuses on issues related to a major crisis, and present already-deployed success strategies in 14 different country environments. The rich diversity of chapters offers a highly significant and timely contribution to the field.

Shooting the Messenger Andrew Fowler, 2018-04-17 If the Al-Qaeda terrorists who attacked the United States in 2001 wanted to weaken the West, they achieved their mission by striking a blow at the heart of democracy. Since 9/11 governments including those of the USA, the UK, France and Australia have introduced tough, intimidating legislation to discourage the legitimate activities of a probing press, so greatly needed after the Iraq War proved that executive government could not be trusted. Often hiding behind arguments about defending national security and fighting the war on terror, governments criminalised legitimate journalistic work, ramping up their attacks on journalists' sources, and the whistle-blowers who are so essential in keeping governments honest. Through detailed research and analysis, this book, which includes interviews with leading figures in the field, including Edward Snowden, explains how mass surveillance and anti-terror laws are of questionable value in defeating terrorism, but have had a 'chilling effect' on one of the foundations of democracy: revelatory journalism.

Paradoxes of Professional Regulation Michael J. Trebilcock, 2022-03-01 Occupational licensure, including regulation of the professions, dates back to the medieval period. While the guilds that performed this regulatory function have long since vanished, professional regulation continues to this day. For instance, in the United States, 22 per cent of American workers must hold licenses simply to do their jobs. While long-established professions have more settled regulatory paradigms, the case studies in *Paradoxes of Professional Regulation* explore other professions,

taking note of incompetent services and the serious risks they pose to the physical, mental, or emotional health, financial well-being, or legal status of uninformed consumers. Michael J. Trebilcock examines five case studies of the regulation of diverse professions, including alternative medicine, mental health care provision, financial planning, immigration consulting, and legal services. Noting the widely divergent approaches to the regulation of the same professions across different jurisdictions – paradoxes of professional regulation – the book is an attempt to develop a set of regulatory principles for the future. In its comparative approach, *Paradoxes of Professional Regulation* gets at the heart of the tensions influencing the regulatory landscape, and works toward practical lessons for bringing greater coherence to the way in which professions are regulated.

Multidisciplinary Perspectives on Women, Voice, and Agency Yan?kkaya, Berrin,Nairn, Angelique Margarita,2020-07-31 Across the world, it has remained a significant challenge for women to be heard within crucial components of society. Male domination has a vast history of restricting the visibility and voices of women in areas including economics and politics. In recent years, however, those longstanding barriers are beginning to crumble as feminism and women's rights have become vital areas of research. Understanding the importance of having a voice and its relation to the construction of women's empowerment, as well as existing limitations in global regions, is imperative. *Multidisciplinary Perspectives on Women, Voice, and Agency* is a collection of innovative research on the examination of giving voice to women's issues in the contemporary world and their increasing impact within the various pillars of society. While highlighting topics including social change, digital activism, and inclusion, this book is ideally designed for researchers, activists, policymakers, practitioners, politicians, advocates, educators, and students seeking current research on women empowerment and the interpretation of women's voices throughout the globe.

New Zealand's Global Responsibility László Szöllősi-Cira, 2022-01-01 New Zealand often plays leading roles in implementing progressive ideas. This book investigates what explanatory factors facilitated the country to become such a relevant normative actor. New Zealand's case suggests that democratic institutions, skilled bureaucracy, and ambitious politicians play the crucial roles to create global influence. The case studies included in this book develop the argument that small states can better influence international politics by focusing on domestic issues. In contributing to discourses on New Zealand's possible future role, the book is an invaluable resource to intellectuals, researchers, and students alike.

Routledge Handbook of Football Studies John Hughson, Kevin Moore, Ramón Spaaij, Joseph Maguire, 2016-10-04 Football is unquestionably the world's most popular and influential sport. There is no corner of the globe in which the game is not played or followed. More countries are affiliated to FIFA, football's governing body, than to the United Nations. The sport has therefore become an important component of our social, cultural, political and economic life. The Routledge Handbook of Football Studies is a landmark work of reference, going further than any other book in considering the historical and contemporary significance of football around the world. Written by a team of leading sport scholars, the book covers a broad range of disciplines from history, sociology, politics and business, to philosophy, law and media studies. The central section of the book examines key themes and issues in football studies, such as the World Cup and international competition,

governance and ownership, fandom and celebrity. The concluding section offers in-depth surveys of the culture and organisation of football in each of the regional confederations, from UEFA to CONCACAF. This book will be fascinating reading for any serious football fan and an essential resource for advanced students or scholars undertaking research in football or sport studies, and any practitioner or policy-maker working in football.

The Best Country to Give Birth? Linda Bryder, 2023-11-09 & ' In 2012, following his investigation of the deaths of two babies in childbirth at Waikato Hospital, Hamilton coroner Gordon Matenga asked, & ' Does New Zealand have the safe, world-leading system the Government says we do, or are we losing babies because the balance has swung too far towards the idea that because childbirth is natural, then the philosophy of " non-intervention" is best?' & ' Babies' deaths reignite maternity row' , the New Zealand Herald announced.' — from the introduction by Linda Bryder Is New Zealand & ' the best country to give birth' ? Historian of medicine Linda Bryder explores how New Zealand developed a unique approach to the role of midwives in childbirth in the 1990s, and analyses the consequences of that change for mothers and babies. The Best Country to Give Birth? traces the genesis of the 1990 Nurses Amendment Act, which allowed midwives to practise alone in the community, back to the homebirth movement of the 1970s, and explores the aftermath of the Act including the withdrawal of GPs from maternity care. In investigating the consequences of the reforms, it uncovers repeated criticism of services &- and what were deemed preventable deaths &- from coroners, commissioners for health and disability, other health professionals including some midwives, academic researchers, and parents and families. How and why does maternity care in Aotearoa differ from other countries? How has it shaped the equitable care of our mothers and babies? Why have critical reports had so little impact? This is a major historical account of an issue

at the heart of our maternity care.

A Decade of Disaster Experiences in Ōtautahi Christchurch Shinya Uekusa, Steve Matthewman, Bruce C. Glavovic, 2022-02-13 This book critically surveys a decade of disasters in Ōtautahi Christchurch. It brings together a diverse range of authors, disciplinary approaches and topics, to reckon with the events that commenced with the 2010-2011 Canterbury earthquake sequence. Each contribution tackles its subject matter through the frame of Critical Disaster Studies (CDS). The events and the subsequent recovery provide a once-in-a-lifetime opportunity to learn from a series of concatenating urban disasters in order to prepare us for our future on an urban planet facing unprecedented environmental pressures. The book focuses on the production of vulnerability, the human dimensions of disaster, the Indigenous response to disasters and the practical lessons that can be drawn from them.

Peter Jackson Alfio Leotta, 2015-12-17 Peter Jackson is one of the most acclaimed and influential contemporary film-makers. This is the first book to combine the examination of Jackson's career with an in-depth critical analysis of his films, thus providing readers with the most comprehensive study of the New Zealand film-maker's body of work. The first section of the book concentrates on Jackson's biography, surveying the evolution of his career from the director of cult slapstick movies such as *Meet the Feebles* (1989) and *Braindead* (1992) to an entrepreneur responsible for the foundation of companies such as Wingnut Films and Weta Workshop, and finally to producer and director of mega blockbuster projects such as *The Lord of the Rings* (2001-2003) and *The Hobbit* (2012-2013). The book further examines Jackson's work at the level of production, reception and textuality, along with key collaborative relationships and significant themes associated with Jackson's films. The examination of Peter Jackson's work and career ties into significant

academic debates, including the relationship between national cinema and global Hollywood; the global dispersal of film production; the relationship between film authorship and industrial modes of production; the impact of the creative industries on the construction of national identity; and new developments in film technology.

The Search for Better Educational Standards Martin Thrupp, 2017-08-22 This book deals with the development of New Zealand's standards system for primary school achievement, 'Kiwi Standards', which took effect from 2010 onwards and is becoming increasingly embedded over time. The approach, where teachers make 'Overall Teacher Judgements' based on a range of assessment tools and their own observations rather than using any particular national test, has created predictable problems with moderation within and across schools. It has been claimed that this 'bold' Kiwi Standards approach avoids the narrowed curriculum and mediocre outcomes of high-stakes assessment in other countries. Yet this book suggests it just produces another variant of the same problems and demonstrates that even a relatively weak high-stakes assessment approach still produces performative effects. The book provides a blow by blow account of the development of a policy including the continuous repositioning of New Zealand's Government as it has sought to justify the policy in the face of opposition from educators. Indeed the Kiwi Standards tale provides a world-class example of teachers fighting back against policy, with the help of academics. There is an indigenous Māori aspect to the story as well. Finally, this book also provides comparative international perspectives including responses from well-known US, English and Australian academics.

Media Industries in Crisis Vicki Mayer, Noa Lavie, Miranda Banks, 2024-04-02 This edited volume offers a global overview of the immediate impacts the COVID pandemic had on local and national

film, television, streaming, and social media industries—examining in compelling detail how these industries managed the crisis. With accounts from the frontlines, *Media Industries in Crisis* provides readers with a stakeholder framework, management lessons, and urgent commentaries to unpack the nature of crisis management and communications. The authors show how these industries have not only survived, but often thrive amidst a backdrop of critical national and regional emergencies, wars, financial meltdowns, and climate disasters. This international collection—featuring case studies from 16 countries—examines how media industries managed all of these crises, successfully rebranding themselves as “essential” while making power plays in politics, economics, and culture. The chapters reveal key lessons for the meltdowns, tectonic shifts, and struggles ahead. This collection will be of interest to media and communication students, particularly those focused on media industries, crisis communications, and management, as well as to practitioners working in media industries.
