Construction Materials Manual Manfred Hegger, Volker Auch-Schwelk, Matthias Fuchs, Thorsten Rosenkranz, 2013-02-12 Eine Übersicht für Architekten, die auch die Bedeutung der Baustoffwahl für die sinnliche Wahrnehmung von Architektur wie Haptik, Geruch, Farbe, Oberflächenstruktur berücksichtigt, gab es bisher nicht. Mit dem Baustoff Atlas wird diese Lücke nun geschlossen. Als ein auf die Interessen von Architekten und Bauingenieuren gleichermaßen abgestimmtes Grundlagenwerk wird er alle genannten Betrachtungsebenen vereinen. Dabei werden sowohl grundsätzliche Nachhaltigkeitsfragen wie Lebensdauer, Umweltbelastung und Stoffkreisläufe erörtert als auch Materialinnovationen vorgestellt. Alle wesentlichen herkömmlichen und neuartigen Baustoffe werden hinsichtlich Herstellung, Verarbeitung, Oberflächen, Anschlüssen und Kenndaten umfassend dokumentiert. Internationale Beispiele, deren Erscheinungsbild sich häufig aus jeweils einem Material definiert, veranschaulichen die Anwendung in der Architektur. Der Baustoff Atlas unterstützt damit die tägliche Arbeit von Architekten und Ingenieuren bei der Baustoffauswahl auf eine umfassende, zugleich anschauliche und anregende Weise.

Dr. Vodder's Manual Lymph Drainage Hildegard Wittlinger, Dieter Wittlinger, Andreas Wittlinger, Maria Wittlinger, 2018-11-07 Fully updated guide to the theory and practice of Dr. Vodder's Manual Lymph Drainage Written by the world's leading authorities on Dr. Emil Vodder's techniques for manual lymph drainage (MLD), this lavishly illustrated guide provides step-by-step descriptions of how to massage the lymph vessels to stimulate smooth lymphatic flow. A concise text describing the basic anatomy and physiology of the circulatory and lymphatic systems is supplemented by full-color photographs and revelatory schematic drawings. The authors discuss indications and contraindications for the treatment techniques, based on the various types of swelling caused by lymphedema, as well as the ways in which Dr. Vodder's method affects different regions of the body. Key Features: The latest information on complete decongestive therapy (CDT), including coverage of compression therapy, taping, respiratory treatment, and other complementary methods More than 200 color photographs demonstrate the therapist's application of manual pressure and movement patterns Each chapter includes numerous practical tips and sufficient space for personal notes 56 review questions enable self-study Dr. Vodder's Manual Lymph Drainage: A Practical Guide is a comprehensive, one-stop reference for students, therapists, and practitioners of lymphology, manual medicine, or physical therapy.

The FLP Microsatellite Platform Jens Eickhoff, 2015-12-10 This book represents the Flight Operations Manual for a reusable microsatellite platform – the “Future Low-cost Platform” (FLP), developed at the University of Stuttgart, Germany. It provides a basic insight on the onboard software functions, the core data handling system and on the power, communications, attitude control and thermal subsystem of the platform. Onboard failure detection, isolation and recovery functions are treated in detail. The platform is suited for satellites in the 50-150 kg class and is baseline of the microsatellite “Flying Laptop” from the University. The book covers the essential information for ground operators to controls an FLP-based satellite applying international command and control standards (CCSDS and ECSS PUS). Furthermore it provides an overview on the Flight Control Center in Stuttgart and on the link to the German Space Agency DLR Ground Station which is used for early mission phases. Flight procedure and mission planning chapters complement the book.

Industrial Parsing of Software Manuals Sutcliffe, 2023-11-27 The task of language engineering is to develop the technology for building computer systems which can perform useful linguistic tasks such as machine assisted translation, text retrieval, message classification and document summarisation. Such systems often require the use of a parser which can extract specific types of grammatical data from pre-defined classes of input text. There are many parsers already available for use in language engineering systems. However, many different linguistic formalisms and parsing algorithms are employed. Grammatical coverage varies, as does the nature of the syntactic information extracted. Direct comparison between systems is difficult because each is likely to have been evaluated using different test criteria. In this volume, eight different parsers are applied to the same task, that of analysing a set of sentences derived from software instruction manuals. Each parser is presented in a separate chapter. Evaluation of performance is carried out using a standard set of criteria with the results being presented in a set of tables which have the same format for each system. Three additional chapters provide further analysis of the results as well as discussing possible approaches to the standardisation of parse tree data. Five parse trees are provided for each system in an appendix, allowing further direct comparison between systems by the reader. The book will be of interest to students, researchers and practitioners in the areas of computational linguistics, computer science, information retrieval, language engineering, linguistics and machine assisted translation.

Single Family Houses Christian Schittich, 2012-12-17 The private single family house is still very much the preferred choice of home. Yet in recent years there have been many changes not only in the personal situations of the residents, their expectations and desires, but also in the rising costs of energy and raw materials. This has meant that issues such as multi-functionalism, the use of innovative building materials or energy-efficient building methods are increasing in significance. In this completely revised and expanded second edition these topical developments have been taken into consideration. The organisation and layout of the first volume, with its concise and detailed project documentation, has been retained. The authors introduce floor plan solutions using contemporary projects which bear in mind changing family structures. At the same time, the contributions provide an in-depth introduction to planning single family houses, from the design of the floor plan to useful tips for the realisation. In addition to this fundamental information, 22 projects are documented, providing ideas and inspiration for planners, students

and clients. The international selection of projects highlights current trends in planning and designing single family housing and reveals the tried and tested basics.

Corpus Linguistics and Linguistically Annotated Corpora Sandra Kuebler,Heike Zinsmeister,2014-12-18 Linguistically annotated corpora are becoming a central part of the corpus linguistics field. One of their main strengths is the level of searchability they offer, but with the annotation come problems of the initial complexity of queries and query tools. This book gives a full, pedagogic account of this burgeoning field. Beginning with an overview of corpus linguistics, its prerequisites and goals, the book then introduces linguistically annotated corpora. It explores the different levels of linguistic annotation, including morphological, parts of speech, syntactic, semantic and discourse-level, as well as advantages and challenges for such annotations. It covers the main annotated corpora for English, the Penn Treebank, the International Corpus of English, and OntoNotes, as well as a wide range of corpora for other languages. In its third part, search strategies required for different types of data are explored. All chapters are accompanied by exercises and by sections on further reading.

Symbolic and Algebraic Computation Patrizia Gianni,1989-08-23 The ISSAC'88 is the thirteenth conference in a sequence of international events started in 1966 thanks to the then established ACM Special Interest Group on Symbolic and Algebraic Manipulation (SIGSAM). For the first time the two annual conferences International Symposium on Symbolic and Algebraic Computation (ISSAC) and International Conference on Applied Algebra, Algebraic Algorithms and Error-Correcting Codes (AAECC) have taken place as a Joint Conference in Rome, July 4-8, 1988. Twelve invited papers on subjects of common interest for the two conferences are included in the proceedings and divided between this volume and the preceding volume of Lecture Notes in Computer Science which is devoted to AAECC-6. This book contains contributions on the following topics: Symbolic, Algebraic and Analytical Algorithms, Automatic Theorem Proving, Automatic Programming, Computational Geometry, Problem Representation and Solution, Languages and Systems for Symbolic Computation, Applications to Sciences, Engineering and Education.

A Question of Priorities Rebecca Boehling,1996-11-01 Over the last few years, there has been a noticeable increase in studies on the postwar period of Germany, reflecting the crucial importance of these years for an understanding of the developments in the two Germanys. With her study of U.S. occupation policy and its effects on German social and political developments in Frankfurt, Munich, and Stuttgart, Rebecca Boehling offers a most valuable contribution to this debate. She examines the decisions made by the U.S. Military Government regarding German municipal personnel from the first year of the occupation, when all city officials were appointed directly by Military Government of with its explicit approval, through the first postwar municipal elections in 1946 and 1948, when democratic self-government was gradually restored. Boehling explores the far-reaching effects of personnel decisions on German political life within the framework of U.S. policies intended to denazify and democratize Germany. The conclusion she draws is that the early local-level German developments under U.S. occupation facilitated economic recovery in a manner that restricted the implementation of political and social goals of democratization.
