The Digital Scholar: Academic Communication in Multimedia Environment Irena Vassileva, Mariya Chankova, Esther Breuer, Klaus P. Schneider, 2020-02-07 The forms and genres of academic communication have changed considerably over the past decades – from standardised ways of producing texts on/for paper to a (less?) standardised way of communication in Web 2.0. Published papers are now available to a greater number of readers, interaction among colleagues can take place in real time via written, audio or visual formats, and it has become much more comfortable for students as well as for those outside the scientific community to access academic information and to contact its authors. It seems, however, that many aspects of academic communication have not yet changed, and its participants – either in the „old“ or in the „new“ generation – are ill-equipped to work within the multimedia context. This volume, therefore, takes a

look at academic communication in the multimedia environment, in order to throw light on how these processes are linked to new multimedia affordances, while at the same time encapsulating old genre conventions and participant interaction with the medium.

Become a SuperLearner Jonathan Levi,Lev Goldentouch,Anna Goldentouch,2015-04-01 Develop the Skills to Learn Anything Faster, Easier, and More Effectively Written by the creators of the #1 bestselling course of the same name, this book will teach you how to hack your learning, reading, and memory skills, empowering you to learn everything faster and more effectively. *What Would You Do If You Could Learn Anything 3 Times Faster?*In our rapidly changing and information-driven society, the ability to learn quickly is the single most important skill. Whether you're a student, a professional, or simply embarking on a new hobby, you are forced to grapple with an every-increasing amount of information and knowledge. We've all experienced the frustration

of an ever-growing reading list, struggling to learn a new language, or forgetting things you learned in even your favorite subjects. This Book Will Teach You 3 Major Skills: Speed reading with high (80%+) comprehension and understanding Memory techniques for storing and recalling vast amounts of information quickly and accurately Developing the cognitive infrastructure to support this flood of new information long-term However, the SuperLearning skills you'll learn in this course are applicable to many aspects of your every day life, from remembering phone numbers to acquiring new skills or even speaking new languages. Anyone Can Develop Super-Learning Skills This course is about improving your ability to learn new skills or information quickly and effectively. We go far beyond the kinds of speed reading (or glorified skimming) you may have been exposed to, diving into the actual cognitive and neurological factors that make learning easier and more successful. We also give you advanced memory techniques to grapple with the huge loads of information you'll soon be able to process. This book should be the go-to reference for anyone looking to upgrade their mind's firmware! -Benny Lewis, Language Learning Expert Learn How to Absorb and Retain Information in a Whole New Way - A Faster, Better Way The Authors' Proprietary Method for Teaching Speed Reading & Memory Improvement

Â You may have even taken a normal speed reading course in the past, only to realize that you didn't retain anything you read. The sad irony is that in order to properly learn things like speed reading skills and memory techniques in the past, you had to read dozens of books and psychological journals to decode the science behind it. Or, you had to hire an expensive private tutor who specializes in SuperLearning. That's what I did. And it changed my life. Fortunately, my co-authors (experts and innovators in the fields of superlearning, memory improvement, and speed reading) agreed to help me transform their materials into the first ever digital course. Over 25,000 satisfied students later, we have transformed our course into a book you can enjoy anywhere. Our teaching methodology relies heavily on at-home exercises. The chapters themselves are only part of what you're buying. You will be practicing various exercises and assignments on a regular basis over the course a 7 week schedule. In addition to the lectures, there are hours of supplemental video and articles which are considered part of the curriculum. This vital book contains all the tools needed to learn, memorize, and reproduce anything you want with the joy that ease brings. Don't take another class until you've read it! -Dr. Anthony Metivier, Author & Memory Expert If you wish to improve memory and concentration, learn more effectively, read faster, and learn the techniques of memory champions - look no further! An awesome read that will push the limits of your brain. Levi does an incredible job of guiding you through, to bring your brain from average to UNSTOPPABLE! -Nelson Dellis, 4-Time USA Memory Champion

c't Working with AI c't-Redaktion, 2024-01-24 The special issue of c't KI-Praxis provides tests and practical instructions for working with chatbots. It explains why language models make mistakes and how they can be minimised. This not only helps when you send questions and orders to one of the chatbots offered online. If you do not want to or are not allowed to use the cloud services for data protection reasons, for example, you can also set up your own voice AI. The c't editorial team explains where to find a suitable voice model, how to host it locally and which service providers can host it. The fact that generative AI is becoming increasingly productive harbours both opportunities and risks. Suitable rules for the use of AI in schools, training and at work help to exploit opportunities and minimise risks.

Contested Czech Cities Michaela Pixová, 2019-11-15 This research was supported by Grant no. 14-24977P from the Grant Agency of the Czech Republic as part of the project "Contested Czech cities: Citizen participation in post-socialist urban restructuring. This book focuses on urban grassroots movements in post-

socialist Czechia and their struggle against unprofessional and nondemocratic urban processes in their cities. It shows that in the context of neoliberal urban restructuring, weakly consolidated democracy, and corporate capture of the local state, urban activists often resort to entering electoral competition as the only efficient way of improving the situation in their cities. The book is based on four case studies from different Czech cities, narrating stories of activists struggling against a controversial flood protection project, the demolition of public buildings, an unhealthy land-use plan, arrogant development, and overpriced city halls. It offers valuable insight into the obstacles created by institutionalized forms of power abuse which urban activists must deal with and discusses the pro-democratic potential of urban grassroots movements' efforts to overcome their limited ability to influence political processes via standard means of civic engagement and protest activities.

Likeable Social Media: How to Delight Your Customers, Create an Irresistible Brand, and Be Generally Amazing on Facebook (& Other Social Networks)

Dave Kerpen, 2011-06-07 THE NEW YORK TIMES AND USA TODAY BESTSELLER! The secret to successful word-of-mouth marketing on the social web is easy: BE LIKEABLE. A friend's recommendation is more powerful than any advertisement. In the world of Facebook, Twitter, and beyond, that recommendation can travel farther and faster than ever before. Likeable Social Media helps you harness the power of word-of-mouth marketing to transform your business. Listen to your customers and prospects. Deliver value, excitement, and surprise. And most important, learn how to truly engage your customers and help them spread the word. Praise for Likeable Social Media: Dave Kerpen's insights and clear, how-to instructions on building brand popularity by truly engaging with customers on Facebook, Twitter, and the many other social media platforms are nothing short of brilliant. Jim McCann, founder of 1-800-FLOWERS.COM and Celebrations.com Alas, common sense is not so common. Dave takes you on a (sadly, much needed) guided tour of how to be human in a digital world. Seth Godin, author of *Poke the Box* Likeable Social Media cuts through the marketing jargon and technical detail to give you what you really need to make sense of this rapidly changing world of digital marketing and communications. Being human — being likeable — will get you far. Scott Monty, Global Digital Communications, Ford Motor Company Dave gives you what you need: Practical, specific how-to advice to get people talking about you. Andy Sernovitz, author of *Word of Mouth Marketing: How Smart Companies Get People Talking*
