**Sampling Strategies for Natural Resources and the Environment** Timothy G.

Gregoire,Harry T. Valentine,2007-07-12 Written by renowned experts in the field, Sampling Strategies for Natural Resources and the Environment covers the sampling techniques used in ecology, forestry, environmental science, and natural resources. The book presents methods to estimate aggregate characteristics on a per unit area basis as well as on an elemental basis. In addition to common sampling designs such as simple random sampling and list sampling, the authors explore more specialized designs for sampling vegetation, including randomized branch

sampling and 3P sampling. One of the book's unique features is the emphasis on areal sampling designs, including plot/quadrat sampling, Bitterlich sampling, line intersect sampling, and several lesser known designs. The book also provides comprehensive solutions to the problem of edge effect. Another distinguishing aspect is the inclusion of sampling designs for continuums, focusing on the methods of Monte Carlo integration. By presenting a conceptual understanding of each sampling design and estimation procedure as well as mathematical derivations and proofs in the chapter appendices, this text promotes a deep understanding of the underpinnings of sampling theory, estimation, and inference. Moreover, it will help you reliably sample natural populations and continuums.

**African Folk Tales** Yoti Lane, 2015-01-28 A delight for readers and listeners of all ages, these 25 traditional tales from West Africa were originally accompanied by music and dance. The stories' drama and folk wisdom shine through in these captivating retellings, which are illustrated by evocative woodcut illustrations. Age-old fables explain why the leopard has no friends, how wild dogs became domesticated, and why pigs dig. Adventure stories recount a prince's quest for an ancient ivory horn and the struggles of two sisters, separated by slavery, to reunite. All of the stories are populated by memorable characters such as a greedy monkey and ambitious ants, a pair of crickets forced to sing for their supper, a couple of fishermen who compete for a bride, and the Man-in-the-Moon and his wife.
