Innovation Offshoring Simon Plankenhorn,2009-03-22 In addition to classifying the current understanding of the offshoring phenomenon, Simon Plankenhorn examines potential offshoring opportunities for innovation projects – from a conceptual and an empirical perspective. The Greek Junta and the International System Antonis Klapsis,Constantine Arvanitopoulos,Evanthis Hatzivassiliou,Effie G. H. Pedaliu,2020-02-19 This book examines the international dimensions of the Greek military dictatorship of 1967 to 1974 and uses it as a case study to evaluate the major shifts occurring in the international system during a period of rapid change. The policies of the major nation-states in both East and West were determined by realistic Cold War considerations. At the same time, the Greek junta, a profoundly anti-modernist force, failed to cope with an evolving international agenda and the movement towards international cooperation. Denouncing it became a rallying point both for international organizations and for human rights activists, and it enabled the EEC to underscore the notion that democracy was an integral characteristic of the European identity. This volume is an original in-depth study of an under-researched subject and the multiple interactions of a complex era. It is divided into three sections: Part I deals with the interaction of the Colonels with state actors; Part II deals with the responses of international organizations and the rising transnational human rights agenda for which the Greek junta became a totemic rallying point; and Part III compares and contrasts the transitions to democracy in Southern Europe, and analyses the different models of transition and region-building, and how they intersected with attempts to foster a European identity. The Greek dictatorship may have been a parochial military regime, but its rise and fall interacted with significant international trends and can therefore serve as a salient case study for promoting a better understanding of international and European trends during the 1960s and 1970s. This book will be of much interest to students of Cold War studies, international history, foreign policy, transatlantic relations and International Relations, in general.

The 1994 High School Transcript Study Tabulations Stanley Legum,National Center for Education Statistics,Westat, inc,1997 The 1994 High School Transcript Study (HSTS) provides the Department of Education and other policymakers with information about current course offerings and students' course-taking patterns in the nation's secondary schools. One objective was to determine changes in course offering and selection patterns since the previous studies in 1982, 1987, and 1990. Another objective was to compare course-taking patterns to results from the National Assessment of Educational Progress (NAEP), an assessment of educational achievement nationwide. In 1994, transcripts were collected for more than 25,000 students who graduated from high school that year. These students were from 340 schools that participated in the NAEP. Information in this report documents a significant increase since 1982 in the percentage of graduates completing curricula recommended by the National Commission on Excellence in Education. As of 1994, over 25% of high school graduates are completing programs satisfying the Commission's recommendations for college-bound graduates, and nearly one-third are completing the Commission's core curriculum. Chapters 1, 2, and 3 of this report contain highlights of the study results, descriptions of the studies from 1982 through 1994, an introduction to the tables of data, a brief description of subject taxonomy, a discussion of the comparability of samples in the studies, and directions for testing the significance of differences reported in the tables. Appendix A contains tables of study data, and Appendix B lists study codes for each category of data. (Contains 121 tables.) (SLD)
