JOHN A. EDDY

[THE SUN TODAY](#) Claudio Vita-Finzi, 2019-01-21 There are several billion stars in the Milky Way galaxy. One of them is the middle-aged G2V yellow dwarf that rules our lives. The Sun Today discusses the Sun's appearance and composition, its internal workings, and the various kinds of radiation it emits, and it puts forward a novel explanation for coronal heating. The book draws on the findings of telescopic observation, space missions, and technical and theoretical advances in many fields, and shows why we need to know more if we are to understand and manage our foothold in the universe. From the reviews of other books by Claudio Vita-Finzi: *The Sun – A User's Manual* (2008) ....this, jargon-free, concise, beautifully illustrated and eminently readable book... D.W. Hughes, *Times Literary Supplement* *Solar History* (2013) ....a book that is supremely informative, intensely stimulating and enjoyable to read... Ian Seymour, *Astronomy Now* *A History of the Solar System* (2016) ...there is a huge amount of useful information in this book that would benefit anyone who needed more detail than is available in a typical popular science title. [THERE'S A LITTLE BLACK SPOT ON THE SUN TODAY](#), 2015-10-01 Sting's evocative lyrics from King of Pain are powerfully transformed into minimalistic illustrations by Sven Völker, who gives voice to his son's journey from illness to health in this extraordinary and deeply moving collaboration that explores pain's sadness, beauty, and wonder.

[WINTER SUN](#) Shi Zhi, 2012-09-04 Shi Zhi has been a major force in Chinese poetry since 1968, when several of his poems were circulated as secret handwritten manuscripts in the midst of China's Cultural Revolution. He gave voice to the aspirations of dispirited youth, and although once relegated to obscurity, he is today celebrated as one of China's most important cultural influences, having spawned the modern Chinese poetry revolution of the 1980s. This collection of Shi Zhi's most significant poems, featuring an afterword by the poet himself, is the first book-length publication of his work in English. Born as Guo Lusheng in 1948, at the height of the Chinese Civil War, Shi Zhi joined the People's Liberation Army at the age of twenty-three. Discharged early, he entered into a period of severe depression and spent much of the next three decades living in mental hospitals under harsh conditions. Taking the pen name of Shi Zhi, meaning "index finger," to evoke the image of people pointing at his back, he continued to write poetry through these tumultuous years, chronicling his journey from the heights of fame to the depths of institutionalism and ultimately to a final redemptive return to society in 2005. The voice of this besieged poet, burdened with exile and illness, captured the spirit of his generation and now inspires young readers. By presenting Shi Zhi's poems in chronological order, *Winter Sun* allows readers to appreciate the evolution of his poetry from his earliest work to his most recent poems. Masterfully translated by Jonathan Stalling, and with an introduction by leading poetry critic Zhang Qinqiu, this landmark collection ensures that Shi Zhi's poetry—so important to Chinese readers during the most challenging of times—will engage the hearts and minds of new readers the world over for years to come.

[EGYPTIAN MYTHS AND MYSTERIES](#) Rudolf Steiner, 2016-12-14 Rudolf Steiner emphasizes the astonishing and special relationship between our own time and that of ancient Egypt—how, in the natural rhythm of the ages, the so-called third Post-Atlantian (Egyptian) epoch is mirrored by the fifth (present) epoch. In this sense, today it is especially relevant to look at ancient Egypt with fresh eyes. The evolution of Western civilization has been profoundly influenced by Egyptian myths through the Greek mysteries. Because of other influences, however, this heritage has degenerated—thinking has mummified, and myth has all but disappeared. Consequently, it is important to revive the seed of goodness passed down to us from ancient Egypt. Through true imagination, we have the task of renewing human knowledge of the creative forces in nature, as the Egyptians attempted through the Osiris-Isis myth, and the Greeks through the myth of Demeter. This is what Steiner attempts in this lecture cycle. Steiner's subjects include: experiences of Egyptian initiations; esoteric anatomy and physiology; the stages of evolution of the human form; and much more. The final lecture is on the Christ impulse as the conqueror of matter.

[SOLAR CATAclysm](#) Lawrence E. Joseph, 2012-09-25 A bold new theory about the Sun-Earth relationship, its role in history, and its potentially disastrous future. We are in the midst of one of the most massive, powerful, and relentless solar storms in history, reports science journalist and solar expert Lawrence Joseph, and a single, random blast from the Sun could well destroy our way of life at any time. Tracing the Sun's behavior and its influence on Earth from the most recent Ice Age to the present and connecting groundbreaking research in solar physics to biology, politics, and culture, Joseph alerts us to the tremendous vulnerability of our infrastructure and delivers the tools and strategies we need to outsmart the Sun and protect Earth's satellites and other vital systems from the coming solar apocalypse. *Solar Cataclysm* implores us to rethink our understanding of human history and redefine our relationship with the 4.57-billion-year-old thermonuclear behemoth in order to defend our future. The connection between human history and solar activity has gone largely untold—until now. Carefully examining the 4.57-billion-year story of our relationship with the Sun, science reporter and bestselling author Lawrence Joseph demonstrates how nearly every aspect of earthly existence and human behavior has always been and continues to be susceptible to changes in the Sun—the basis for his Moody Sun Hypothesis. As we come to realize that the Sun is far more turbulent and explosive than imagined, we must also come to terms with the fact that our future is more vulnerable to the Sun than ever suspected. From the Sun's role in global climate change to its constant threat of catastrophic solar blasts, and from stories of solar activity causing rifts in religion in the Middle Ages to the way sunspots are messing with our moods and minds today, *Solar Cataclysm* examines the myriad ways the ever-changing Sun disrupts our personal lives, determines the course of history, and shapes our destiny. But this isn't a tale of doom. Our fates, collectively and individually, aren't tethered to the Sun's ups and downs. With captivating storytelling and witty prose, Joseph shows us how to draw on the tools and expertise—including the very latest solar science research and technology advances, as well as human ingenuity and survival instincts—to respond effectively to the Sun's threats and to shield ourselves and our atmosphere, satellite system, power grids, and nuclear power infrastructure from the Sun's impending assault. How did the Sun King, Louis XIV, ban sunspots for virtually all of his seventy-two-year reign? What makes Stanford and Purdue University scientists so sure that the Sun is sending out secret, vitally important messages today? Smart and engaging, *Solar Cataclysm* guides us to a new, dynamic, life-affirming level of interconnectedness among self, planet, and sustaining star.

[ORIGIN OF ELEMENTS IN THE SOLAR SYSTEM](#) Oliver K. Manuel, 2007-05-08 Based on an American Chemical Society symposium organized by professors Glenn Seaborg and Oliver Manuel, this volume provides a comprehensive record of different views on this important subject at the end of the 20th century. They have assembled a blend of highly respected experimentalists and theorists from astronomy, geology, meteoritics, planetology and nuclear chemistry and physics to discuss the origin of elements in the solar system. The intent was to include all points of view and let history judge their validity.
