**Dark Night** He You,2020-06-25 When I was sixteen, I was involved in the pimp business. I lost a lot of things to save a girl from a john. She humbly begged me to take her. She sat on my body and cried and said to me, Brother, take me! I couldn't stand it anymore, so I just ... I was kind enough to save her, eighteen years old. I met her again that year, but she wouldn't admit it. From then on, all the goddesses seemed to have something to do with me.

*The Political Institutions of Modern China* William L. Tung,2012-12-06 This book is prepared primarily for students who are interested in studying the constitutional development and government structure of twentieth-century China. Since the emergence of the Chinese constitutional movement at the end of the nineteenth century, political institutions in China have undergone constant changes. The first four chapters treat of constitutional development and government systems from the latter part of the Ch'ing dynasty to the re-unification of China by the Nationalist Party in 1928. The other eight chapters deal with the policies, programs, and institutions of the Nationalist and Communist governments up to 1962. While treatises on various subjects have been consulted, the sources of this book are chiefly based on the official documents from the collections as indicated in the bibliography. Materials in the first few chapters are partly drawn from my previous works on government and politics in China. Because of the immense scope of the subject and the intricacy of the problems involved, this work is not intended to be exhaustive, but is rather a brief description and discussion of each topic under consideration. As there are many valuable works on China in general as well as on her history and international relations, I have tried not to cover what has already been dealt with by others. In my presentation of facts and views, I have endeavored to be as objective as possible, personal political convictions notwithstanding.

**Food Processing Technologies** Amit K. Jaiswal,2016-08-05 The processing of food generally implies the transformation of the perishable raw food to value-added products. It imparts benefits, such as the destruction of surface microflora, and inactivation of deleterious enzymes, such as peroxidase, leading to a greater shelf life of the food. It also enhances color and texture while maintaining quality of products and makes them edible. However, it also has an inevitable impact on nutritional quality attributes, such as increase or decrease in certain vitamins and bioactive metabolites among others. Food Processing Technologies: Impact on Product Attributes covers a range of food processing technologies and their effect on various food product attributes, such as bioactive compounds, safety, and sensory and nutritional aspects of the food upon processing. There are eight major parts in the book. Part I covers the conventional processing technologies. Parts II, III, IV, and V deal with various novel processing technologies, including impingement processing technologies, electro-magnetic processing technologies, physico-mechanical processing technologies, and electro-technologies. Part VI introduces chemical processing technologies. Part VII comprise irradiation processing technology, and the final part is focused on biological processing technology, detailing the application of enzymes in food processing. Numerous studies were carried out to find the impact of these processing technologies on various aspects of food and associated health promotion properties. Both positive and negative results were obtained based on nature of foods, processing type, and duration of processing, and this book covers these results in depth.

The Way of the Bachelor Alison R. Marshall,2011-02-17 The lives of early Japanese and Chinese settlers in British Columbia have come to define the Asian experience in Canada. Yet many men travelled beyond British Columbia to settle in small Prairie towns and cities. Chinese bachelors opened the region's first laundries and Chinese cafes. They maintained ties to the Old World and negotiated a place in the new by fostering a vibrant homosocial culture based on friendship, everyday religious practices, the example of Sun Yat-sen, and the sharing of food. This exploration of the intersection of gender and migration in rural Canada, in particular, offers new takes on the Chinese quest for identity in North America in general. With a preface by the Honourable Inky Mark, former Member of Parliament for Dauphin-Swan River-Marquette.

**The Life and Works of Korean Poet Kim Myŏng-sun** Jung Ja Choi,2022-11-30 The Life and Works of Korean Poet Kim Myŏng-sun offers an introduction to Korea's first modern woman writer to publish a collection of creative works, Kim Myŏng-sun (1896-ca. 1954). Despite attempts by male contemporaries to assassinate her character, Kim was an outspoken writer and an early feminist, confronting patriarchal Korean society in essays, plays, poems, and short stories. This volume is the first to offer a detailed analysis in English of Kim's poetry. The poems examined in this volume can be considered early twentieth-century versions of #MeToo literature, mirroring the harrowing account of her sexual assault, and also subversive challenges to traditional institutions, dealing with themes such as romantic free love, same-sex love, single womanhood, and explicit female desire and passion. The Life and Works of Korean Poet Kim Myŏng-sun restores a long-neglected woman writer to her rightful place in the history of Korean literature, shedding light on the complexity of women's lives in Korea and contributing to the growing interest in modern Korean women's literature in the West.

Marriage and Inequality in Chinese Society Rubie S. Watson,Patricia Buckley Ebrey,1991-04-02 Until now our understanding of marriage in China has been based primarily on observations made during the twentieth century. The research of ten eminent scholars presented here provides a new vision of marriage in Chinese history, exploring the complex interplay between marriage and the social, political, economic, and gender inequalities that have so characterized Chinese society.

*Handbook of Triboelectric Nanogenerators* Zhong Lin Wang,Ya Yang,Junyi Zhai,Jie Wang,2023-09-26 This handbook comprehensively covers the rapidly evolving field of power generation using triboelectric nanogenerators. Since their emergence in 2012, triboelectric nanogenerators have experienced fast development both in fundamental science aspects and technological innovations

resulting in a plethora of outstanding applications and commercial opportunities in e.g. micro-nano energy systems, self-powered sensors, blue energy, and high-voltage power sources. The Handbook of Triboelectric Nanogenerators provides an indispensable overview of the state of the art in the field. It begins with a review of the physical and technological fundamentals and provides detailed coverage of triboelectric nanogenerators for cutting-edge applications from wearable electronics and medical implants to smart home sensing devices and human-machine interfacing. Edited and authored by active researchers in the field, the handbook offers a wealth of information for applied physicists and chemists, as well as materials scientists and engineers. In addition, mechanical and electronic engineers working in the fields of energy scavenging, power sources, and sensor-related application development will benefit greatly from the technical information presented in this groundbreaking reference work.

Recent Progress in Atmospheric Sciences Kuo-Nan Liou,Ming-Dah Chou,2008 This book contains 22 peer-reviewed articles that cover a spectrum of contemporary subjects relevant to atmospheric sciences, with specific applications to the Asia-Pacific region. The majority of these papers consist of a review of a scientific sub-field in atmospheric sciences, while some contain original contributions. All of the accepted papers were subject to scientific reviews and revisions.The book is divided into 2 traditional fields in atmospheric sciences: atmospheric dynamics and meteorology; and atmospheric physics and chemistry. The authors of these papers are distinguished alumni of the Department of Atmospheric Sciences at the National Taiwan University, residing in the USA and Taiwan. This book is dedicated to the 50th anniversary of the Department of Atmospheric Sciences that occurred in 2004.Papers in atmospheric dynamics and meteorology cover the following subjects: El Niño/Southern Oscillation, air/sea interactions, convection in the tropics, meiyu frontal systems, tropical cyclones/typhoons, data assimilations, and mesoscale modeling. In atmospheric physics and chemistry, subjects range from aerosols/clouds interactions, heat budgets in the context of air/sea interactions, atmospheric radiative transfer, remote sensing of the oceans, Asian dust outbreaks and clouds, reviews of cloud microphysics and urban ozone formations, to a satellite GPS system for typhoon studies and weather predictions.
