Digimodernism Alan Kirby, 2009-05-01 Almost without anybody noticing, a new cultural paradigm has come center stage, displacing an exhausted and increasingly marginalised postmodernism. Dr. Alan Kirby calls this cultural paradigm digimodernism, a name comprising both its central technical mode and its privileging of the fingers and thumbs in its use. The increasing irrelevancy of postmodernism requires a new theory to underpin our current digital culture.

Paving Paradise Craig Pittman,Matthew Waite,2010-05-25 Florida possesses more wetlands than any other state except Alaska, yet since 1990 more than 84,000 acres have been lost to development despite presidential pledges to protect them. How and why the state's wetlands are continuing to disappear is the subject of Paving Paradise. Journalists Craig Pittman and Matthew Waite spent nearly four years investigating the political expedience, corruption, and negligence on the part of federal and state agencies that led to a failure to enforce regulations on developers. They traveled throughout the

state, interviewed hundreds of people, dug through thousands of documents, and analyzed satellite imagery to identify former wetlands that were now houses, stores, and parking lots. Exposing the unseen environmental consequences of rampant sprawl, Pittman and Waite explain how wetland protection creates the illusion of environmental protection while doing little to stem the tide of destruction.

Sport, Culture and the Media David Rowe, 2003-12-16 Reviewers' comments on the first edition "Marks the coming of age of the academic study of media sport." Media, Culture & Society "The book is extremely well-written – ideal as a student text, yet also at the forefront of innovation." International Review of Cultural Studies "A thoroughly worthwhile read and an excellent addition to the growing literature on media sport" Sport, Education and Society Sport, Culture and the Media was the first book to analyse comprehensively two of the most powerful cultural forces of our times: sport and media. It examines the ways in which media sport has established itself in contemporary everyday life, and how sport and media have made themselves mutually dependent. This new edition examines the

latest developments in sports media, including: Expanded material on new media sport and technology developments Updated coverage of political economy, including major changes in the ownership of sports broadcasting New scholarship and research on recent sports events like the Olympics and the World Cup, sports television and press, and theoretical developments in areas like globalisation and spectatorship. The first part of the book, “Making Media Sport”, traces the rise of the sports media and the ways in which broadcast and print sports texts are produced, the values and practices of those who produce them, and the economic and political influences on and implications of 'the media sports cultural complex'. The second part, “Unmaking the Media Sports Text”, concentrates on different media forms – television, still photography, news reporting, film, live commentary, creative sports writing and new media sports technologies. This is a key textbook for undergraduate studies in culture and media, sociology, sport and leisure studies, communication, race, ethnicity and gender.

Longitudes and Attitudes Thomas L. Friedman, 2002-09-11 America's leading observer of the international scene on the minute-by-minute events of September 11, 2001--before, during and after .

As the Foreign Affairs columnist for the The New York Times, Thomas L. Friedman is in a unique position to interpret the world for American readers. Twice a week, Friedman's celebrated commentary provides the most trenchant, pithy, and illuminating perspective in journalism. Longitudes and Attitudes contains the columns Friedman has published about the most momentous news story of our time, as well as a diary of his experiences and reactions during this period of crisis. As the author writes, the book is not meant to be a comprehensive study of September 11 and all the factors that went into it. Rather, my hope is that it will constitute a 'word album' that captures and preserves the raw, unpolished, emotional and analytical responses that illustrate how I, and others, felt as we tried to grapple with September and its aftermath, as they were unfolding. Readers have repeatedly said that Friedman has expressed the essence of their own feelings, helping them not only by explaining who they are, but also by reassuring us about who we are. More than any other journalist writing, Friedman gives voice to America's awakening sense of its role in a changed world.

Polyvocal in register, the book moves to mine meanings of kinship through the wide and intimate reach of language across geographies and generations. Against the contemporary backdrop of intensified capitalist fascism, toxic nationalism, and climate disaster, the figure Jejune asks, how have I come to make home out of unrecognizability. Marked by and through diasporic life, Jejune declares, I was not myself. I am not myself. My self resembles something having nothing to do with me.

It is a book about the human impact on the environment and the ways in which the natural environment impacts human society. The fifth edition has been fully revised and updated throughout, with new case studies, figures, and online resources such as downloadable figures and tables from the text and multiple choice questions for students, accessible at: www.routledge.com/cw/middleton. New topics covered in extended boxed case studies include payment for environmental services, ocean acidification, biofuels in Brazil, waste reduction through industrial symbiosis, and the long-term impact of natural disasters on vulnerable groups. Other approaches and concepts covered for the first time in this new edition include traditional ecological knowledge, environmental justice, the 'resource curse', and urban biodiversity. Eighteen chapters on key issues follow three initial chapters which outline the background contexts of the physical and

human environments and the concept of sustainable development. Each chapter provides historical context for key issues, outlines why they have arisen, and highlights areas of controversy and uncertainty to appraise how issues can be resolved both technically and in political and economic frameworks. Each chapter also contains an updated critical guide to further reading and websites, as well as discussion points and essay questions. The text can be read in its entirety or individual chapters adopted as standalone reading. Laura Secord Peggy Dymond Leavey, 2012-05-12 2013 Speaker's Book Award – Shortlisted Laura Secord is now famous for her singular feat of bravery during the War of 1812, but did she warn the British and help defeat the American invaders as her legend says? After dragging her injured husband off the battlefield during the War of 1812, Laura Secord (1775-1868) was forced to house American soldiers for financial support while she nursed him back to health. It was during this time that she overheard the American plan to ambush British troops at Beaver Dams. Through an outstanding act of perseverance and courage in 1813, Laura walked an astonishing 30 kilometers from her home to a

British outpost to warn Lieutenant James FitzGibbon. Despite facing rough terrain, the ever-present danger of being caught by American troops, and rather delicate encounters with Native forces, Laura reached FitzGibbon just in time for the British to prepare and execute an ambush on American military nearby, forcing the U.S. general to surrender. Laura lived a very long time, dying at the age of 93. In her lifetime the government never formally recognized her singular feat of bravery, and much controversy still envelopes her legacy.
