Kathy Charner, Maureen Murphy, Jennifer Ford

**Pigs in Love** Teddy Slater,2005 They say it with flowers. They say it with hearts They say it with candy and strawberry tarts. Pretty pink pigs celebrate Valentine's Day, and show how many ways one can say the three most precious words in the world: I love you. In thoroughly sweet, un-swinish style, they tell their fathers and mothers, their pesky little brothers, their sweethearts and buddies. Some whisper, some shout, some sing of love, some write a poem. But no matter how and where they do it, these adorably expressive piggies are living proof that everyone is someone's lovin' valentine. Youngsters will want to share this with everyone they care for, on Valentine's Day and all year long.

**The Pastry Queen** Rebecca Rather, Alison Oresman,2011-05-25 The Best Little From-Scratch Bakery in Texas The pastry case in Rebecca Rather's bakery in Fredericksburg is packed with ultra-buttery scones, luscious cakes, cookies the size of saucers, brownies as big as bricks, and fruit pies that look as though they came straight out of Grandma's oven. Since the day Rebecca and her Rather Sweet Bakery and Café came to town, life in this Hill Country hamlet has been even sweeter and the townsfolk now know why she is the Pastry Queen. Everything she makes is a lot like her: down-home yet grand, and familiar yet one-of-a-kind. A native Texan, Rather makes the most of her Lone Star state's varied traditions, whether looking to the kitchens of Texas's Mexican and German immigrants or to the cowboy culture of her own forebears. Best of all, her recipes aren't fussy—one of her best-selling cakes stirs together in a single saucepan. Add in a cupful of Texas attitude and her made-from-scratch-with-love philosophy, and you've got an irresistible taste of American baking. What's best at Rather Sweet? Rebecca's customers all have their favorites (and she is happy to cater to their cravings), but here's just a taste of the perennial best sellers: • Apple-Smoked Bacon and Cheddar Scones • Texas Big Hairs Lemon-Lime Tarts (the only big hair Rebecca has ever had!) • Fourth of July Fried Pies • Peach Queen Cake with Dulce de Leche Frosting • Turbo-Charged Brownies with Praline Topping • All-Sold-Out Chicken Pot Pies • Kolaches (pillowy yeasted buns with sweet

or savory fillings) • PB&J Cookies With over 125 surefire tested recipes and 100 photographs that richly capture small-town life in the Hill Country, The Pastry Queen offers a Texas-size serving of the royal splendor of Rebecca's baked goods—courtesy of the rather sweet gal behind the case.

As ever, your descriptive narrative is a delight, as is the humour and the pathos in the story. "It's a great mix of funny moments and that 'does he like me' awkwardness. This book is full of witty dialogue, quirky characters you just know you'd recognise if you met them, and scenery that comes to life, making you want to hop in your car and go there." "Took only 4 nights to devour this book, and I loved every page. The story and characters were very credible, in that the lead man is somebody I wouldn't mind the "love guru" setting me up with. A great funny romantic read, ideal for holidays or a rainy day in." "I loved this book. It's a perfect cosy read. I loved the Scottish setting, with all of the colourful and funny characters." "Loved the second instalment of this delightful Scottish drama. Highly recommend both books for an instant Highland getaway." "An excellent, heart-warming rom-com with all of the funniest characters from the first plus some great new ones. I loved seeing Lochhalsie from Katya's point of view this time. Funny, sweet and romantic." "Great storytelling with characters I really warmed to. I so wanted Katya to be all loved up that I couldn't put it down until I found out who'd she chosen. And the banter between the villagers was classic."

*New ways to understand how foods affect me and my health!* Lorraine Brennan, Kathryn Burton-Pimentel, Marjukka Kolehmainen,Fiona Malcomson,John Mathers,2023-03-10 What we eat affects our bodies in many different ways. From changing our shape and size, to giving us the fuel to run. From keeping our hair and skin looking good, to affecting our risk of developing diseases like diabetes or cancer. However, what we eat can also affect each of us differently. This is because we all have different versions of genes, molecular regulators and even gut bacteria that affect how we respond to the foods that we eat. For example, one person may have versions of genes that means that they process (metabolize) some food components differently from how other people do. Another person may have versions of genes that make it easier for them to gain weight. To understand how different foods affect our health and our risk of developing diseases, scientists use many different types of experiments. These range from laboratory studies in cells to studies carried out directly in humans that measure how we react to specific nutrients and foods, or to our whole eating pattern. Samples of blood, saliva and urine can be analyzed to reveal lots of information about how each person's DNA and individual biology changes the way food affects their health. New methods called 'omics technologies' allow us to quickly measure all molecules of a certain type that are present in a sample. For example, genomics is used to characterize all the genes and different versions of genes in a particular person; transcriptomics measures all the genes that are switched on in that person; and proteomics and metabolomics measure the corresponding proteins and small molecules or metabolites. This gives us a huge amount of new information about how what a person eats affects their metabolism and health. These kinds of studies can also help us to understand why particular foods might affect one person differently from another. By better understanding how the effects of foods and nutrients change from person to person based on their DNA and other molecular regulators, we can start to find which types of diets may be better for different people. This idea is called 'personalized nutrition'. For example, personalized nutrition might provide a basis for dietary advice to help individual people improve their diet and to stay healthy. This approach might also help find the best diet for people already suffering from a disease that is affected by diet. This collection of articles focuses on the latest research in the field of nutrigenomics, from advances in technologies used for this research, to how foods are processed in the body and what this means for our health. At the core of the collection is the application of nutrigenomics as a basis to personalize nutritional advice for individuals and at a public health level. This collection has been organized by NuGO and the NuGO Early Career Network (ECN). NuGo is an association of Universities and Research Institutes worldwide focusing on research on molecular nutrition, personalized nutrition, nutrigenomics and nutritional systems biology.
