John R. Vacca

Wireless Networking Security in Government

British Columbia. Office of the Auditor General, John Doyle, 2010 This is the second of two audits on the subject of the security of wireless networks for government in British Columbia done by the Auditor General. The first audit focused specifically on the governmental offices in Victoria, but this audit expanded out to include five government ministries across the province and campuses at Simon Fraser University (SFU) and the British Columbia Institute of Technology (BCIT). This audit contains a summary of recommendations, responses to the report from the ministries and universities, and then the details of the report, including the purpose and scope of the audit and what was found by it. Included are appendices with a glossary of wireless technology terms, security guidelines for wireless area networks, and tips for accessing and using government networks.

Wi-Foo Andrew A. Vladimirov, Konstantin V.

Gavrilenko, Andrei A. Mikhailovsky, 2004 The definitive guide to penetrating and defending wireless networks. Straight from the field, this is the definitive guide to hacking wireless networks. Authored by world-renowned wireless security auditors, this hands-on, practical guide

covers everything you need to attack -- or protect -- any wireless network. The authors introduce the 'battlefield,' exposing today's 'wide open' 802.11 wireless networks and their attackers. One step at a time, you'll master the attacker's entire arsenal of hardware and software tools: crucial knowledge for crackers and auditors alike. Next, you'll learn systematic countermeasures for building hardened wireless 'citadels' including cryptography-based techniques, authentication, wireless VPNs, intrusion detection, and more. Coverage includes: Step-by-step walkthroughs and explanations of typical attacks Building wireless hacking/auditing toolkit: detailed recommendations, ranging from discovery tools to chipsets and antennas Wardriving: network mapping and site surveying Potential weaknesses in current and emerging standards, including 802.11i, PPTP, and IPSec Implementing strong, multilayered defenses Wireless IDS: why attackers aren't as untraceable as they think Wireless hacking and the law: what's legal, what isn't If you're a hacker or security auditor, this book will get you in. If you're a netadmin, sysadmin, consultant, or home user, it will keep everyone else out.

Recommendation and Guidelines on Establishing a Single Window United Nations. Economic Commission for Europe,United Nations Centre for Trade Facilitation and Electronic Business,2005 This publication seeks to promote a process of simplification and harmonization of procedures for international trade making documentation as simple and direct as possible for traders, public authorities and governments. The requirements and complexity of import, export and transit-related regulations often place a burden on company resources, creating a barrier to the development and efficiency of international trade, in particular for small and medium sized enterprises (SMEs). To make trade easier the UN recommends that governments and traders should establish a Single Window where trade-related information and

/or documents need only be submitted once, at a single entry point, and that further, all participating authorities and agencies should coordinate their respective controls through this Single Window, providing facilities for the payment of relevant duties, taxes and fees.

Doing Business 2011 World Bank, 2010-11-03 Eighth in a series of annual reports comparing business regulations in 183 economies, Doing Business 2011 measures regulations affecting 10 areas of everyday business activity: starting a business, dealing with construction permits, employing workers, registering property, getting credit, protecting investors, paying taxes, trading across borders, enforcing contracts, and closing a business. The report updates all 10 sets of indicators, ranks countries on their overall ease of doing business and analyzes reforms to business regulation- identifying which countries are improving strengthening their business environment the most and which ones slipped. Doing Business 2011 includes results on the ongoing research in the area of getting electricity and illustrates how reforms in business regulations can translate into better outcomes for domestic entrepreneurs and the wider economy. It also focuses on how women in particular are affected by complex business regulations.
