*Another Song for Europe* Ivan Raykoff, 2020-11-29 The Eurovision Song Contest is famous for its camp spectacles and political intrigues, but what about its actual music? With more than 1,500 songs in over 50 languages and a wide range of musical styles since it began in 1956, Eurovision features the most musically and linguistically diverse song repertoire in history. Listening closely to its classic fan favorites but also to songs that scored low because they were too different or too far ahead of their time, this book delves into the musical tastes and cultural values the contest engages through its international reach and popular appeal. Chapters discuss the iconic fanfare that introduces the broadcast, the supposed formulas for composing successful contest entries, how composers balance aspects of sameness and difference in their songs, and the tension between national genres of European popular music and musical trends beyond the nation's borders, especially the American influences on a show that is supposed to celebrate an idealized pan-European identity. The book also explores how audiences interact with the contest through musicking experiences that bring people together to celebrate its sounds and spectacles. What can seem like a silly song-and-dance show offers valuable insights into the bonds between popular music and cosmopolitan values for its many followers around the world. From dance parties to flashmobs, parodies to plagiarisms, and orchestras to artificial intelligence, *Another Song for Europe* will be of particular interest to Eurovision fans, critics, and scholars of popular music, popular culture, ethnomusicology, and European studies.

*Africa's World Cup* Peter Alegi, Chris Bolsmann, 2013-05-16 A collection of essays reflecting on the 2010 World Cup by noted journalists, academics, and

experts

*Insurgent Citizenship* James Holston,2021-06-08  
Insurgent citizenships have arisen in cities around the world. This book examines the insurgence of democratic citizenship in the urban peripheries of São Paulo, Brazil, its entanglement with entrenched systems of inequality, and its contradiction in violence. James Holston argues that for two centuries Brazilians have practiced a type of citizenship all too common among nation-states--one that is universally inclusive in national membership and massively inegalitarian in distributing rights and in its legalization of social differences. But since the 1970s, he shows, residents of Brazil's urban peripheries have formulated a new citizenship that is destabilizing the old. Their mobilizations have developed not primarily through struggles of labor but through those of the city--particularly illegal residence, house building, and land conflict. Yet precisely as Brazilians democratized urban space and achieved political democracy, violence, injustice, and impunity increased dramatically. Based on comparative, ethnographic, and historical research, *Insurgent Citizenship* reveals why the insurgent and the entrenched remain dangerously conjoined as new kinds of citizens expand democracy even as new forms of violence and exclusion erode it. Rather than view this paradox as evidence of democratic failure and urban chaos, *Insurgent Citizenship* argues that contradictory realizations of citizenship characterize all

democracies--emerging and established. Focusing on processes of city- and citizen-making now prevalent globally, it develops new approaches for understanding the contemporary course of democratic citizenship in societies of vastly different cultures and histories.

**General Henri Guisan** Willi Gautschi, 2003 During its darkest hour Switzerland was surrounded by aggressive fascist armies, with no allies within reach, its politicians quavering, and its people beginning to lose hope of retaining their freedom. General Henri Guisan stepped into this miasma of growing despair. In July 1940, he assembled the entire Swiss officer corps at the Rutli Meadow, the spot where pike-wielding herdsmen had formed the Swiss Confederation in 1291. Invoking the spirit of their medieval forebears, he informed his officers that Switzerland would fight back against any invader, and if they ran out of ammunition they would use the bayonet. Switzerland, he declared, would never surrender. Guisan lit a torch that would guide the Continent's only remaining democracy until the end of the war. The key to his military strategy was shifting the main strength of the Swiss Army to the Alps. This controversial policy conceded population centers but it also negated German superiority in armor and aircraft. If the Nazis invaded they would only open a bleeding sore that they would not be able to close. Though the Wehrmacht drew up numerous invasion plans, it never took the gamble. As a military man who became the spiritual leader of his country, Guisan was a rarity in the history of democratic nations. His guidance, along with the Swiss system of universal male conscription, meant that the Germans, had they invaded, would have been fighting not just an army but a people. This definitive biography of General Guisan not only describes a man of great complexity and courage, but a fascinating aspect of World

War II. WILLI GAUTSCHI is the author of numerous works, including *The National Strike of 1918* and *Lenin as an Emigrant in Switzerland*. Having retired from teaching history at the University of Zurich, he currently lives in Baden.

Globalization and Cyberculture Kehbuma Langmia, 2016-12-20 This book argues for hybridity of Western and African cultures within cybercultural and subcultural forms of communication. Kehbuma Langmia argues that when both Western and African cultures merge together through new forms of digital communication, marginalized populations in Africa are able to embrace communication, which could help in the socio-cultural and political development of the continent. On the other hand, the book also engages Richard McPhail's *Electronic Colonization Theory* in order to demonstrate how developing areas such as Africa experience a new form of imperialistic subjugation because of electronic and digital communication. *Globalization and Cyberculture* illustrates how new forms of communication inculcate age-old traditional forms of communications into Africa's cyberculture while complicating notions of identity, dependency, and the digital divide gap.

*Beyond Memory* Max Mojapelo, 2008 South Africa possesses one of the richest popular music traditions in the world - from marabi to mbaqanga, from boeremusiek to bubblegum, from kwela to kwaito. Yet the risk that future generations of South Africans will not know their musical roots is very real. Of all the recordings made here since the 1930s, thousands have been lost for ever, for the powers-that-be never deemed them worthy of preservation. And if one peruses the books that exist on South African popular music, one still finds that their authors have on occasion jumped to conclusions that were not as foregone as they

had assumed. Yet the fault lies not with them, rather in the fact that there has been precious little documentation in South Africa of who played what, or who recorded what, with whom, and when. This is true of all music-making in this country, though it is most striking in the musics of the black communities. *Beyond Memory: Recording the History, Moments and Memories of South African Music* is an invaluable publication because it offers a first-hand account of the South African music scene of the past decades from the pen of a man, Max Thamagana Mojapelo, who was situated in the very thick of things, thanks to his job as a deejay at the South African Broadcasting Corporation. This book - astonishing for the breadth of its coverage - is based on his diaries, on interviews he conducted and on numerous other sources, and we find in it not only the well-known names of recent South African music but a countless host of others whose contribution must be recorded if we and future generations are to gain an accurate picture of South African music history of the late 20th and early 21st centuries.

African Soccerscapes Peter Alegi, 2010-02-14 From Accra and Algiers to Zanzibar and Zululand, Africans have wrested control of soccer from the hands of Europeans, and through the rise of different playing styles, the rituals of spectatorship, and the presence of magicians and healers, have turned soccer into a distinctively African activity. *African Soccerscapes* explores how Africans adopted soccer for their own reasons and on their own terms. Soccer was a rare form of “national culture” in postcolonial Africa, where stadiums and clubhouses became arenas in which Africans challenged colonial power and expressed a commitment to racial equality and self-determination. New nations staged matches as part of their independence celebrations and joined the world body, FIFA. The Confédération africaine de

football democratized the global game through antiapartheid sanctions and increased the number of African teams in the World Cup finals. In this compact, highly readable book Alegi shows that the result of this success has been the departure of huge numbers of players to overseas clubs and the growing influence of private commercial interests on the African game. But the growth of women's soccer and South Africa's hosting of the 2010 World Cup also challenge the one-dimensional notion of Africa as a backward, "tribal" continent populated by victims of war, corruption, famine, and disease.

Simplex Society Koen Stroeken, 2023-12-09 This open access book provides thought-provoking anthropology grounded in comparative ethnography. The theory captures the current historical moment, the long-term trends that led us here, and the prospects for a humane future. The experience of complexity characterizing a globalized information society triggers simplexes. These unidimensional responses instrumental in bringing about a predictable effect are altering our ways of communicating and the technologies we design. In Part I, a 'speciated' history, injected with the anthropology of Bateson and Gluckman, describes the semantic and experiential impoverishment of the lifeworld. After going through the affects of distrust (the neolithic lifeway), of futility (industrial lifeway) and disconnection (post-knowledge), the human species today depends for its survival on installing a new lifeway, which manages to wed (eco-social) inclusion to the already difficult first pair of the French Revolution. The species needs to rehumanize. Part II illustrates the remedies currently developed: to reframe, re-sphere and re-resource. What do critical street art, international football matches, presidential elections, hip-hop dissing performances, charismatic church services, intuition stimulation, and 'pre-

ceptive' experiences of consciousness have in common? They are moments of the real. Rooted in 'life sensing', they are tensors organizing frameshift. As multiplex measures tackling the simplex, these tensors overcome the cultural relativism of the postmodern matrix.

Parading Respectability Sylvia Bruinders, 2017-09-01 Parading respectability: The cultural and moral aesthetics of the Christmas Bands Movement in the Western Cape, South Africa is an intimate and incisive portrait of the Christmas Bands Movement in the Western Cape of South Africa. Drawing on her own on background as well as her extended research study period during which she became a band member and was closely involved in its day-to-day affairs, the author, Dr Sylvia Bruinders, documents this centuries-old expressive practice of ushering in the joy of Christmas through music by way of a social history of the coloured communities. In doing so, she traces the slave origins of the

Christmas Bands Movement, as well as how the oppressive and segregationist injustices of both colonialism and apartheid, together with the civil liberties afforded in the South African Constitution (1996) after the country became a democracy in 1994 have shaped the movement.

**Dynamic Korea and Rhythmic Form** Katherine In-Young Lee, 2018-09-11 The South Korean percussion genre, samul nori, is a world phenomenon whose rhythmic form is the key to its popularity and mobility. Based on both ethnographic research and close formal analysis, author Katherine In-Young Lee focuses on the kinetic experience of samul nori, drawing out the concept of dynamism to show its historical, philosophical, and pedagogical dimensions. Breaking with traditional approaches to the study of world music that privilege political, economic, institutional, or ideological analytical frameworks, Lee argues that because rhythmic forms are experienced on a somatic level, they swiftly move beyond national boundaries and provide sites for cross-cultural interaction.

**Music and Identity** Eric Ayisi Akrofi, Maria Smit, Stig-Magnus Thorsén, 2006-06-01 Due to significant political and social changes over the last decade in their countries and worldwide, many scholars in the Nordic nations and in Southern Africa have been researching on 'music and identity' - an area with a paucity of literature. It is our hope that this book will be beneficial to scholars interested in the field of music and identity. This volume is the result of the Swedish South African Research Network (SSARN) project, funded from 2004-2006 by the Swedish International Development Cooperation Agency (SIDA) and the National Research Foundation (NRF) of South Africa, under the theme 'Music and Identity'. SSARN was founded by Stig-Magnus Thorsén of the University of Gothenburg, Sweden, in 2002 when he invited Nordic and Southern African

scholars to participate in a research group focusing broadly on the topic 'Music and Identity'--Publisher's website.

1,227 QI Facts To Blow Your Socks Off John Lloyd, John Mitchinson, James Harkin, 2012-12-20 QI is the smartest comedy show on British television, but few people know that we're also a major legal hit in Australia, New Zealand, Israel and Africa and an illegal one on BitTorrent. We also write books and newspaper columns; run a thriving website, a Facebook page, a Twitter feed; and produce an iPhone App and a sister Radio 4 programme. At the core of what we do is the astonishing fact - painstakingly researched and distilled to a brilliant and shocking clarity. In Einstein's words: 'Everything should be as simple as possible, but not simpler.' Did you know that: cows moo in regional accents;

the entire internet weighs less than a grain of sand; the dialling code from Britain to Russia is 007; potatoes have more chromosomes than human beings; the London Underground has made more money from its famous map than it has from running trains; Tintin is called Tantan in Japanese because TinTin is pronounced 'Chin chin' and means penis; the water in the mouth of a blue whale weighs more than its body; Scotland has twice as many pandas as Conservative MPs; Saddam's bunker was designed by the grandson of the woman who built Hitler's bunker; Under the Wildlife and Countryside Act of 1981, it is explicitly illegal in Britain to use a machinegun to kill a hedgehog. 1,227 QI Facts To Blow Your Socks Off will make you look at the universe (and your socks) in an alarming new way.
