Scythe Neal Shusterman,2017-11-28 In a world where disease has been eliminated, the only way to die is to be randomly killed ('gleaned') by professional reapers ('scythes'). Two teens must compete with each other to become a scythe--a position neither of them wants. The one who becomes a scythe must kill the one who doesn't--Provided by publisher.

The Toll Neal Shusterman,2019-11-05 In the highly anticipated finale to the New York Times bestselling trilogy, dictators, prophets, and tensions rise. In a world that's conquered death, will humanity finally be torn asunder by the immortal beings it created? Citra and Rowan have disappeared. Endura is gone. It seems like nothing stands between Scythe Goddard and absolute dominion over the world scythedom. With the silence of the Thunderhead and the reverberations of the Great Resonance still shaking the earth to its core, the question remains: Is there anyone left who can stop him? The answer lies in the Tone, the Toll, and the Thunder.

Thunderhead Neal Shusterman,2019-06-04 "Intelligent and entertaining." —Kirkus Reviews (starred review) "Even better than the first book." —School Library Journal (starred review) Rowan and Citra take opposite stances on the morality of the Scythedom, putting them at odds, in the chilling sequel to the Printz Honor Book *Scythe* from New York Times bestseller Neal Shusterman, author of the *Unwind* dystology. Humans learn from their mistakes. I cannot. I make no mistakes. The Thunderhead is the perfect ruler of a perfect world, but it has no control over the scythedom. A year has passed since Rowan had gone off grid. Since then, he has become an urban legend, a vigilante snuffing out corrupt scythes in a trial by fire. His story is told in whispers across the continent. As Scythe Anastasia, Citra gleanes with compassion and openly challenges the ideals of the "new order." But when her life is threatened and her methods questioned, it becomes clear that not everyone is open to the change. Old foes and new enemies converge, and as corruption within the Scythedom spreads, Rowan and Citra begin to lose hope. Will the Thunderhead intervene? Or will it simply watch as this perfect world begins to unravel?

Chemicals via Higher Plant Bioengineering Fereidoon Shahidi, Paul Kolodziejczyk, John R. Whitaker, Agustin Lopez Munguia, Glenn Fuller, 1999-05-31 Food and raw material for its production was generally produced via the traditional agriculture. On the other hand, novel chemicals were manufactured in the laboratory or extracted from plant and animal sources. However, as the world population is steadily increasing, there is a decrease in traditional agriculture productivity and concerns are also expressed over the damage inflicted to the environment and restrictions that might be enforced in food production. At the same time, there is an increasing demand for high quality agricultural products as well as for food ingredients related to both the traditional or newly discovered nutrients or phytochemicals. Trends and developments, in the area of plant biotechnology and bioengineering has allowed manipulation of genes' and/or insertion of new genes, thus production of transgenic plants. Starting from the introduction of agronomic traits, particularly stress resistance to diverse environmental factors, process and sensory characteristics, food quality and production of novel varieties of plant-based products through genetic engineering, biotechnology is changing the agriculture and the concept of production of plant-based raw materials. Increasing attention is being paid on research for production of plants that can provide a wide array of food and non-food products. Perhaps the first non-food product that plant biotechnology would achieve is production of large scale custom-designed industrial oils, but the list of chemicals is long, ranging from oils and specific triacyl glycerols to biopolymers, enzymes, blood components, among others.

Some are caught halfway between life and death, in a sort of limbo known as Everlost: a shadow of the living world, filled with all the things and places that no longer exist. It's a magical, yet dangerous place where bands of lost kids run wild and anyone who stands in the same place too long sinks to the center of the Earth. Allie and Nick don't survive the car crash, and end up in Everlost, where coins are more valuable than anyone knows, fortune cookies tell the truth, monsters are real, and the queen of lost souls lives in a once-beloved tower. Nick and Allie have to learn to survive in a world with different rules, and figure out who they can trust--and who they must oppose at all costs. At stake is nothing less than the fate of Everlost and the living world they have left behind. In this gripping trilogy, Neal Shusterman explores questions of life, death, and what just might lie in between.
