Biology of Aging Roger B. McDonald,2019-06-07 Biology of Aging, Second Edition presents the biological principles that have led to a new understanding of the causes of aging and describes how these basic principles help one to understand the human experience of biological aging, longevity, and age-related disease. Intended for undergraduate biology students, it describes how the rate of biological aging is measured; explores the mechanisms underlying cellular aging; discusses the genetic pathways that affect longevity in various organisms; outlines the normal age-related changes and the functional decline that occurs in physiological systems over the lifespan; and considers the implications of modulating the rate of aging and longevity. The book also includes end-of-chapter discussion questions to help students assess their knowledge of the material. Roger McDonald received his Ph.D. from the University of Southern California and is Professor Emeritus in the Department of Nutrition at the University of California, Davis. Dr. McDonald's research focused on mechanisms of cellular aging and the interaction between nutrition and aging. His research addressed two key topics in the field: the relationship between dietary restriction and lifespan, and the effect of aging on circadian rhythms and hypothalamic regulation. Lebanon Eyal Zisser,2000-02-28 The first decade of independence (1943-1952) was crucial to the political history of Lebanon, following the creation of the state in 1920 and the subsequent years of French tutelage. This period is defined by the presidency of Bishara al-Khuri, the first elected president, a founding father who played a vital part in forming the distinctive character of the Lebanese state and in Lebanon's later history, both rich and successful and troubled and tragic. During this period the old order in Lebanon, shaped over centuries, clashed with a 'new order', transforming Lebanese politics and society. Khuri's task was to protect Lebanon's fragile independence and to try to ensure political stability among warring factions - strife which in 1975 erupted in civil war causing immense disruption and suffering in Lebanon and with deep and widespread national and international effect. This study draws on a wide range of primary and secondary sources including official state papers and private

collections from Britain, France, the USA, Lebanon and Israel. _Contents_: Introduction: The Birth of the Lebanese State; First Steps Along a New Road; The 1943 Elections; The National Pact; The November 1943 Crisis; Between East and West - Lebanon on the International and Regional Scene; Domestic Challenges - 1943-1947; At the Peak of Power; The 1948 War in Palestine; The Syrian Lebanese Crisis; The Confrontation with the PPS (1947-1949); Khuri and Sulh: a Parting of the Ways; Rift with the West; The Overthrow

The Passport in America Craig Robertson,2010-07-02 In today's world of constant identification checks, it's difficult to recall that there was ever a time when proof of identity was not a part of everyday life. And as anyone knows who has ever lost a passport, or let one expire on the eve of international travel, the passport has become an indispensable document. But how and why did this form of identification take on such a crucial role? In the first history of the passport in the United States, Craig Robertson offers an illuminating account of how this document, above all others, came to be considered a reliable answer to the question: who are you? Historically, the passport originated as an official letter of introduction addressed to foreign governments on behalf of American travelers, but as Robertson shows, it became entangled in contemporary negotiations over citizenship and other forms of identity documentation. Prior to World War I, passports were not required to cross American borders, and while some people struggled to understand how a passport could accurately identify a person, others took advantage of this new document to advance claims for citizenship. From the strategic use of passport applications by freed slaves and a campaign to allow married women to get passports in their maiden names, to the passport nuisance of the 1920s and the contested addition of photographs and other identification technologies on the passport, Robertson sheds new light on issues of individual and national identity in modern U.S. history. In this age of heightened security, especially at international borders, Robertson's *The Passport in America* provides anyone interested in questions of identification and surveillance with a richly detailed, and often surprising, history of this uniquely important document.
