High Availability and Disaster Recovery for Temenos T24 with IBM DB2 and AIX Barrie Mike, Moditha Sanjay De Costa, Gowrimani Gopalakrishnan, Murali Neralla, IBM Redbooks, 2012-10-09 The Temenos T24 core banking application is a critical application for the banks that use it and has a primary focus on providing an appropriate level of high availability and disaster recovery. The level of availability is determined largely by the configuration of the infrastructure that supports T24. This infrastructure is built on hardware, middleware, and networking, in addition to the operational procedures and practices that are used to operate T24. Many options are available for meeting a client's high availability and disaster recovery requirements. The solution chosen by a Temenos T24 user depends on many factors. These factors include a user's detailed availability and recovery requirements; their existing datacenter standards, practices, and processes; and the available network infrastructure. Therefore, the optimum solution must be determined on a case-by-case basis for each deployment. This IBM® Redpaper™ publication serves as a guide to help IT architects and other technical staff who are designing, configuring, and building the infrastructure to support Temenos T24. It shows how IBM software can deliver high availability and disaster recovery for Temenos T24 to meet a client's requirements. This software might run on IBM AIX®, IBM WebSphere® Application Server, WebSphere MQ Server, and IBM DB2®. These IBM software components are typically used for a Temenos T24 deployment on an IBM middleware stack to ensure a highly available infrastructure for T24.

2012 ICD-10-CM Draft Standard Edition -- E-Book Carol J. Buck, 2016-06-16 Code accurately and efficiently with Carol J. Buck's 2012 ICD-10-CM Draft Standard Edition. Illustrations and explanations of A&P, pathology, and medical terminology make it easier to develop the knowledge needed to assign the appropriate codes. Coverage of ICD-10-CM codes prepares you for the new code set replacing ICD-9-CM Volumes 1 & 2 for physician-based (outpatient) coding. 32 full-color Netter anatomy images are included in the front of the book, helping you understand complex anatomy and how it affects coding. Photos and illustrations help you understand difficult terminology, diseases/conditions, and special coding considerations. Official Guidelines for Coding and Reporting (OGCR) are included within the list of codes and in a separate index for fast, easy access to coding rules when you need them. Numerous Annotations and Items throughout the Disease Tabular explain common diseases and conditions, helping you code more accurately. Symbols for Unacceptable First-Listed Diagnosis, Use Additional Character(s), Unspecified, Complications and Comorbidities (CC) and Major Complications and Comorbidities (MCC), Includes and Excludes, Code First, and Code Also clearly identify codes that will need special consideration to ensure accurate coding. NEW! Age and Sex edits from the Medicare Code Editor alert you to codes that are used only with patients of a specific age or sex, helping to ensure accurate reporting. Present on Admission symbol highlights the diseases that will always be coded as present on admission. Hospital Acquired Condition symbol notes specific conditions that will always be coded as hospital acquired for easier recognition.

Advances in Bladder Research Laurence S. Baskin, Simon Hayward, 1999-06-30 The aim of Bladder Research Congress, San Francisco, California, April 23-25, 1998, was to provide a forum for authoritative investigators who are actively involved in the various disciplines which define the leading edges of bladder research. It is important for such investigators to continue to meet regularly for the purpose of discussing the latest developments in their individual fields, to analyze the significance of current research, to discuss new tactics for unresolved problems, to critically evaluate current theories, and to develop new theories and approaches as needed. The two and a half day meeting was organized into five half day sessions, with each session encompassing one of five topics: (1) Epithelial-Mesenchymal Interactions; (2) Extracellular Matrix and Muscle; (3) Nerves and Pharmacology; (4) Infection and Immunology; and (5) Oncology. Each session was introduced by a moderator followed by five to six invited expert speakers with time for extensive interaction from the participants. Two late-afternoon poster sessions allowed further interactions between investigators. This book documents the proceedings of the Bladder Research Congress. It is organized into the five half-day sessions of the meeting with moderators overview and an edited transcription of discussions that followed each presentation. I would like to thank Sarah Burke and the Office of Continuing Medical Education, USCF; Joanne Hayward, Editorial Assistant; and Miriam Escamilla, Administrative Assistant. I hope you find this resource useful. Laurence S. Baskin, M.D.

The U.S. National Income and Product Accounts Murray F. Foss, 2007-12-01 The main topics treated in this conference volume are problems of deflation and quality change, the adequacy of the data used to construct the U.S. national accounts, and the broad theoretical evolution of the U.S. national income and product accounts. As these topics suggest, this volume represents a new stage in the study of national income and product accounts in that emphasis is placed on the information content of the system rather than on the structure of the accounts. This new emphasis is highlighted by the inclusion of a discussion among prominent users of the national accounts—Lawrence Klein, Otto Eckstein, Alan Greenspan, and Arthur Okun—that indicates the difficulties that confront those who utilize this information.
