Expert in a Year Sam Priestley, Ben Larcombe, 2015-08-18 Sam Priestley was never Mr Sporty. After failed attempts at rowing and running he had all but given up on the possibility of becoming a sportsman. That was until childhood friend, and table tennis coach, Ben Larcombe convinced him to act as the guinea pig in an experiment he had concocted - The Expert in a Year Challenge. Starting 1st January 2014 novice Sam was immersed in the world of competitive table tennis. He began training every day and over the course of the year notched up hundreds of hours of practice in an attempt to reach a seemingly impossible goal. There was blood, sweat, tears, injuries, frustrations and moments of elation as the pair travelled up and down the UK, and beyond, in their quest for training, mentors and competition. Sam found potential he never thought he had, got better at table tennis than most people thought possible, and discovered what it feels like when 1.5 million people watch you fail. Here is their story, including all the ridiculous training methods and unreachable goals, and the surprising lessons they learnt from playing table tennis every day for a year.

Ping Pong for Fighters Tahl Leibovitz, 2014-11-01 This book is called Ping Pong for Fighters, and it's about fighting all the different elements that are attached to table tennis. The fight starts inward and eventually moves outward, from within ourselves, to the ball, to our opponents, to the environment and the external conditions. I think what's interesting about this book is that the reader takes the journey with me. All that I learned in over 20 years of competing in table tennis, is in this book. The goal of this book is to try and get the reader to approach the game differently. The book is basically a philosophy for the thinking and feeling player. A philosophy that encourages one to stay in the present moment, have self confidence and compete to the best of their ability. This book is also very direct and very easy to understand. It is not an intellectual discourse of any kind. The book reads more like a conversation consisting of helpful direction through experience and a philosophy of table tennis that is concerned more with experiencing what it feels like to think and play table tennis like a top table tennis player.

Table Tennis Triples Guenter Arndt,2007-10-31 Most existing table tennis teams never play each other as a team. Triples for the first time allows three-person teams to play serious table tennis. The book explains its rationale, equipment and its manufacture, its rules, and its integration into existing table tennis events. It strives to enhance the already popular image of table tennis by adding a true team sport to its repertoire, thereby increasing its player, spectator and media appeal. Part 1 establishes the theoretical basis of Triples and provides detailed information on the design and manufacture of its hardware. In analysing its geometrical and physical aspects, it shows that playing conditions in Triples are equivalent to or better than in the conventional game - e.g. a greater action space and shot variety. Hence various novel table and net designs are described, including a reversible rectangular-to-round retrofit table tennis table system. Part 2 contains everything one needs to know to play the game, presenting a detailed account of the Triples rules and their reasoning. These include some concepts new to table tennis, such as Tie Break, Shoot-Out, and Draw game outcomes. Details on scoring, umpiring, match progress displays and possible team strategies are presented, including point-by-point score sheets and team events involving singles, doubles and Triples matches. Part 3 provides a glimpse into the future. It describes how Triples equipment can be used to create interesting new practice and recreational games, including 4-player Quadruples, and how electronic sensors and computerised displays will soon lead to the intelligent table tennis table. With its 60 figures, 12 tables, 45 references and 3 new terms registers the book is lucid and user-friendly. Collectively it invites table tennis players, coaches, organisers and administrators alike to try out the new game - and in this has the support of the International Table Tennis Federation.

Essential Tennis Ian Westermann, 2022-05-31 The essential book from online tennis coaching sensation Ian Westermann, founder of EssentialTennis.com What's the number one thing stopping you from playing your best tennis? Ian Westermann, founder of the world's #1 online tennis instruction portal, Essentialtennis.com, will confidently say it's an obstacle you probably never thought of: The ball. You might think this sounds ridiculous. The whole point of tennis is to hit the ball over the net and in, so how can the ball be the thing that's standing in the way? In Essential Tennis, readers – players and coaches, alike – will learn how improving at tennis actually happens and how to easily implement these lessons and integrate them into better play on the court. Players will hit stronger shots, make fewer errors, and beat players who are currently beating them. Coaches will look differently at what it means to provide a student with a holistic learning experience. Essential Tennis contains technique-based instruction for executing groundstrokes, volleys, and serves, as well as progressions, drills, and mindsets players should incorporate. Handbook of Ratings Alexander Karminsky, Andrey Polozov, 2016-08-04 This handbook presents a systematic overview of approaches to, diversity, and problems involved in interdisciplinary rating methodologies. Historically, the purpose of ratings is to achieve information transparency regarding a given body's activities, whether in the field of finance, banking, or sports for example. This book focuses on commonly used rating methods in three important fields: finance, sports, and the social sector. In the world of finance, investment decisions are largely shaped by how positively or negatively economies or financial instruments are rated. Ratings have thus become a basis of trust for investors. Similarly, sports evaluation and funding are largely based on core ratings. From local communities to groups of nations, public investment and funding are also dependent on how these bodies are continuously rated against expected performance targets. As such, ratings need to reflect the consensus of all stakeholders on selected aspects of the work and how to evaluate their success. The public should also have the opportunity to participate in this process. The authors examine current rating approaches from a variety of proposals that are closest to the public consensus, analyzing the rating models and summarizing the methods of their construction. This handbook offers a valuable reference guide for managers, analysts, economists, business informatics specialists, and researchers alike.
