Hatch Guide for New England Streams Thomas Ames,2000-10 New England's streams, and the insects and fish that inhabit them, have their own unique qualities. Their flowing waters support an amazing diversity of insect species from all of the major orders -- in fact, at last count, Maine, alone, has 162 species of mayflies, the most of any state. Few, if any, books deal with the insects and life stages specific to New England, until now.Hatch Guide to New England Streams, by professional photographer and amateur entomology enthusiast Thomas Ames, explores the insects of New England. Ames covers: reading water; presentations for New England streams; tackle; night fishing; and more. The bulk of this book, however, deals with the insects and the best flies to imitate them. Similar in style to Jim Schollmeyer's successful Hatch Guide series, Ames discusses the natural and its behaviors on the left-hand page and the three best flies to imitate it on the right, including proper size and effective techniques. Tom's color photography of the naturals and their imitations is superb, making this book as beautiful as it is useful. A must for all New England fly-fishers!

Demographic change in Asian fishing communities - Drivers, outcomes and potential impacts Siar, S.V.; Kusakabe, K. (eds.),2020-11-03 conducted by the Food and Agriculture Organization of the United Nations. Demographic change in fishing communities has implications for the future of fishing, fisheries, the fishing industry, and the social development of fishing communities in the Asian region. This publication looks at demographic change in small-scale fishing communities to understand potential implications for fisheries sustainability, migration patterns, climate change adaptation, and livelihoods diversification. The publication explores the general question: How are fishing communities in the region changing with demographic changes? Specifically the publication tries to address the following questions: (1) What are the changes in demography (ageing, migration) in selected Asian fishing communities? (2) How are fishers adjusting their livelihoods with the changes in fishery resources and labour availability? Are they moving to other livelihoods? (3) What are the consequences of these adaptation strategies? Are there any gender differences in the impact of such adaptation strategies? (4) What are the challenges faced and policy and programme support needed for fishing communities for sustainable small-scale fisheries?
