Voices of Early Modern Japan Constantine Nomikos

Vaporis,2020-11-27 In this newly revised and updated 2nd edition of *Voices of Early Modern Japan*, Constantine Nomikos Vaporis offers an accessible collection of annotated historical documents of an extraordinary period in Japanese history, ranging from the unification of warring states under Tokugawa Ieyasu in the early seventeenth century to the overthrow of the shogunate just after the opening of Japan by the West in the mid- nineteenth century. Through close examination of primary sources from *The Great Peace*, this fascinating textbook offers fresh insights into the Tokugawa era: its political institutions, rigid class hierarchy, artistic and material culture, religious life, and more, demonstrating what historians can uncover from the words of ordinary people. New features include: • An expanded section on religion, morality and ethics; • A new selection of maps and visual documents; • Sources from government documents and household records to diaries and personal correspondence, translated and examined in light of the latest scholarship; • Updated references for student projects and research assignments. The first edition of *Voices of Early Modern Japan* was the winner of the 2013 Franklin R. Buchanan Prize for Curricular Materials. This fully revised textbook will prove a comprehensive resource for teachers and students of East Asian Studies, history, culture, and anthropology.

Japanese Fortune Calendar Reiko Chiba, 2011-09-10 This guide to the Japanese zodiac gives a complete explanation of all 12 animal years. Like people of the West, Eastern people have a zodiac. Unlike that of the West, however, the Eastern system has a cycle of twelve years instead of months. Each year of the cycle has its own particular animal symbol whose roots of meaning, origin, and influence stretch back to ancient India and China. One of the traditional Japanese stories pertaining to this zodiacal system and how it started runs as follows. On a certain New Year's Day, ages ago, Buddha called all the animals of the world to him. He promised that those who came to pay him homage would receive a gift for their fealty. As a mark of honor, they would be given a year which would thereafter be named for them. Of all the animals in the world, only these twelve came, and they came in this order: the rat and the ox, the tiger and the rabbit, the dragon, the snake, and the horse, the sheep and the monkey, the rooster, the dog, and the boar.

Making Time Yulia Frumer, 2018-01-19 What is time made of? We might balk at such a question, and reply that time is not made of anything—it is an abstract and universal phenomenon. In *Making Time*, Yulia Frumer upends this assumption, using changes in the conceptualization of time in Japan to show that humans perceive time as constructed and concrete. In the mid-sixteenth century, when the first mechanical clocks arrived in Japan from

Europe, the Japanese found them interesting but useless, because they failed to display time in units that changed their length with the seasons, as was customary in Japan at the time. In 1873, however, the Japanese government adopted the Western equal-hour system as well as Western clocks. Given that Japan carried out this reform during a period of rapid industrial development, it would be easy to assume that time consciousness is inherent to the equal-hour system and a modern lifestyle, but *Making Time* suggests that punctuality and time-consciousness are equally possible in a society regulated by a variable-hour system, arguing that this reform occurred because the equal-hour system better reflected a new conception of time — as abstract and universal—which had been developed in Japan by a narrow circle of astronomers, who began seeing time differently as a result of their measurement and calculation practices. Over the course of a few short decades this new way of conceptualizing time spread, gradually becoming the only recognized way of treating time.
