Out Of Control Kevin Kelly,2009-04-30 Out of Control chronicles the dawn of a new era in which the machines and systems that drive our economy are so complex and autonomous as to be indistinguishable from living things.

Dark Ecology Timothy Morton,2016-04-12 Timothy Morton argues that ecological awareness in the present Anthropocene era takes the form of a strange loop or Möbius strip, twisted to have only one side. Deckard travels this oedipal path in Blade Runner (1982) when he learns that he might be the enemy he has been ordered to pursue. Ecological awareness takes this shape because ecological phenomena have a loop form that is also fundamental to the structure of how things are. The logistics of agricultural society resulted in global warming and hardwired dangerous ideas about life-forms into the human mind. Dark ecology puts us in an uncanny position of radical self-knowledge, illuminating our place in the biosphere and our belonging to a species in a sense that is far less obvious than we like to think. Morton explores the logical foundations of the ecological crisis, which is suffused with the melancholy and negativity of coexistence yet evolving, as we explore its loop form, into something playful, anarchic, and comedic. His work is a skilled fusion of humanities and scientific scholarship, incorporating the theories and findings of philosophy, anthropology, literature, ecology, biology, and physics. Morton hopes to reestablish our ties to nonhuman beings and to help us rediscover the playfulness and joy that can brighten the dark, strange loop we traverse.

Improving Fish Stock Assessments Committee on Fish Stock Assessment Methods, Commission on Geosciences, Environment and Resources, Ocean Studies Board, Division on Earth and Life Studies, National Research Council, 1998-03-13 Ocean harvests have plateaued worldwide and many important commercial stocks have been depleted. This has caused great concern among scientists, fishery managers, the fishing community, and the public. This book evaluates the major models used for estimating the size and structure of marine fish populations (stock assessments) and changes in populations over time. It demonstrates how problems that may occur in fisheries data—for example underreporting or changes in the likelihood that fish can be caught with a given type of gear—can seriously degrade the quality of stock assessments. The volume makes recommendations for means to improve stock assessments and their use in fishery management.

Best Frints in the Whole Universe Antoinette Portis, 2016-07-05 Yelfred and Omek have been best frints since they were little blobbies. They play and snack, and sometimes they even fight, all in a language similar to but slightly different from, English. When Omek decides to borrow Yelfred's new spaceship without asking (and then crashes it), it sparks the biggest fight yet. Can these two best frints make up and move on? Award-winning picture book creator Antoinette Portis delivers a new universe of cleverness and imagination in this hilarious, sweet, and otherworldly book about friendship.

Sleepless in Hollywood Lynda Obst, 2013-06-11 The veteran producer and author of the bestseller *Hello, He Lied* takes a witty and critical look at the new Hollywood. Over the past decade, producer Lynda Obst gradually realized she was working in a Hollywood that was undergoing a drastic transformation. The industry where everything had once been familiar to her was suddenly disturbingly strange. Combining her own industry experience and interviews with the brightest minds in the business, Obst explains what has stalled the vast moviemaking machine. The calamitous DVD collapse helped usher in what she calls the New Abnormal (because Hollywood was never normal to begin with), where studios are now heavily dependent on foreign markets for profit, a situation which directly impacts the kind of entertainment we get to see. Can comedy survive if they don't get our jokes in Seoul or allow them in China? Why are studios making fewer movies than ever—and why are they bigger, more expensive and nearly always sequels or recycled ideas? Obst writes with affection, regret, humor and hope, and her behind-the-scenes vantage point allows her to explore what has changed in Hollywood like no one else has. This candid, insightful account explains what has happened to the movie business and explores whether it'll ever return to making the movies we love—the classics that make us laugh or cry, or that we just can't stop talking about.

Marketing Identities Through Language E. Martin, 2005-11-30 Elizabeth Martin explores the impact of globalization on the language of French advertising, showing that English and global imagery play an important role in tailoring global campaigns to the French market, with media companies undeterred by the attempts through legislation to curb language mixing in the media.

Cane Toad Wars Rick Shine, 2018-03-20 In 1935, an Australian government agency imported 101 specimens of the Central and South American

Cane Toad in an attempt to manage insects that were decimating sugar-cane harvests. In Australia the Cane Toad adapted and evolved with abandon, voraciously consuming native wildlife and killing predators with its lethal skin toxin. Today, hundreds of millions of Cane Toads have spread across the northern part of Australia and continue to move westward. The humble Cane Toad has become a national villain. Cane Toad Wars chronicles the work of intrepid scientist Rick Shine, who has been documenting the toad's ecological impact in Australia and seeking to buffer it. Despite predictions of devastation in the wake of advancing toad hordes, the author's research reveals a more complex and nuanced story. A firsthand account of a perplexing ecological problem and an important exploration of how we measure evolutionary change and ecological resilience, this book makes an effective case for the value of long-term natural history research in informing conservation practice.

This Side of Wild Gary Paulsen, 2015-09-29 Longlisted for the National Book Award The Newbery Honor-winning author of Hatchet and Dogsong shares surprising true stories about his relationship with animals, highlighting their compassion, intellect, intuition, and sense of adventure. Gary Paulsen is an adventurer who competed in two Iditarods, survived the Minnesota wilderness, and climbed the Bighorns. None of this would have been possible without his truest companion: his animals. Sled dogs rescued him in Alaska, a sickened poodle guarded his well-being, and a horse led him across a desert. Through his interactions with dogs, horses, birds, and more, Gary has been struck with the belief that animals know more than we may fathom. His understanding and admiration of animals is well known, and in This Side of Wild, which has taken a lifetime to write, he proves the ways in which they have taught him to be a better person.
