Andrew Brindle

Here to Stay (Where Love Begins Book #2) Melissa Tagg, 2014-04-29 Melissa Tagg follows up her debut novel with a stellar sophomore read. With her charming wit and engaging prose, Tagg pens a story of hope in God's dreams for us and ties it all together with sigh-worthy romance. Truly a book and author not to be missed. ~Rachel Hauck, award-winning, bestselling author of *The Wedding Dress* and *Princess Ever After* After playing nomad for five years, Blake Hunziker has finally had enough of adventure. Not sure what reception he'll get from everyone back in Whisper Shore, he's stunned at not only a warm welcome from his hometown but also a job offer. The job is his if he can successfully pull off the annual Christmas Festival. If only he knew the first thing about coordinating events... If there's one thing Autumn Kingsley knows, it's Whisper Shore. For years, she's been stuck running her family's inn when all she wants is to see the world. Now she has a visit scheduled from a potential investor who could take over the inn, as well as a dream job offer in Paris. But with just two weeks to whip the inn into shape, her chance at escape is a long shot. The Hunzikers and the Kingsleys may not get along, but Blake knows Autumn's the only one who can help him. She agrees to a trade--she'll help with the Festival and he'll help with inn repairs. But what was meant to be a simple deal quickly becomes much more than that when the guy who's done running away joins forces with the girl who can't wait to leave.

**Digital Communication and Media Linguistics**

Aleksandra Gnach,Wibke Weber,Martin  
Engebretsen,Daniel Perrin,2022-12-31 A  
multidisciplinary and timely presentation of  
digital communication and multimodal texts from  
the perspective of media linguistics.

**Reading the Prostitute** Lorna Ryan,2018-12-20  
First published in 1997, this study aims to forge  
new connections between debates on prostitution,  
media processes and everyday life in its  
exploration of depictions of female prostitution  
in British and Irish broadsheet newspapers between  
1987 and 1991. Lorna Ryan first examines a range  
of discourses on prostitution before proceeding to  
areas including signals of prostitution and images  
in the press. Encompassing both textual and visual  
analyses, Ryan demonstrates that these newspapers  
relied on appearance, place, time, motive and  
intent in categorising women as prostitutes.

Unruly Media Carol Vernallis,2013-10-10 Unruly  
Media argues that we are the crest of a new  
international style in which sonic and visual  
parameters become heightened and accelerated. This  
audiovisual turn calls for new forms of attention.  
Post-classical cinema, with its multi-plot  
narratives and flashy style, fragments under the  
influence of audiovisual numbers and music-video-  
like sync. Music video becomes more than a way of  
selling songs. YouTube's brief, low-res clips  
encompass many forms and foreground reiteration,  
graphic values and affective intensity. These  
three media are riven by one another: a trajectory  
from YouTube through music video to the new  
digital cinema reveals commonalities, especially  
in the realms of rhythm, texture and form. This is

the first book to account for the current audiovisual landscape across medium and platform, and it demonstrates that attending equally to soundtrack and image reveals how these media work and how they both mirror and shape our experience.

Daguerreotypes Lisa Saltzman, 2015-07-06 These days one can hardly say anything about art without confronting the freighted status of the photograph. Many critics have written about the idea of photography by other means or art after photography. And many famous artists among them Gerhard Richter, Gillian Wearing and Thomas Struth--have stretched the idea of the truth-value of the photograph by claiming to make actual photographs in other materials, such as paint or video. Saltzman is interested in how photography has functioned to secure identity in the modern period and the implications of that history for us today. While Saltzman's purpose is to look at contemporary adaptations of photography, the story she tells begins even earlier than the invention of the photograph. It starts with the story of Martin Guerre (nee Daguerre) and the idea of what the image may have held as a guarantor of identity in the early modern period. In this way Saltzman establishes a broad, deep historical frame before delving into the art of the present. Each chapter covers a different medium ranging from video, graphic novels, and literature to film. Along the way, she takes on figures of unstable identity fugitive subjects to wit, the mysterious Martin Guerre, Blade Runners, replicants, Henriette Barthes, and W.G. Sebald's characters. She also confronts a range of contemporary critics,

artists, and knotty debates about veracity, uncertainty and identity that began to circulate in the nineteenth century with the invention of photography.

**Media in Postapartheid South Africa** Sean Jacobs, 2019-03-11 A study of mass media in twenty-first-century South Africa offering “revelations about the nature of citizenship and public engagement in our media saturated age” (Daniel R. Magaziner, author of *The Law and the Prophets: Black Consciousness in South Africa, 1968–1977*). In *Media in Postapartheid South Africa*, Sean Jacobs turns to media politics and the consumption of media as a way to understand recent political developments in South Africa and their relations with the African continent and the world. Jacobs looks at how mass media define the physical and human geography of the society and what it means for comprehending changing notions of citizenship in postapartheid South Africa. Jacobs claims that the media have unprecedented control over the distribution of public goods, rights claims, and South Africa’s integration into the global political economy in ways that were impossible under the state-controlled media that dominated the apartheid years. Jacobs takes a probing look at television commercials and the representation of South Africans, reality television shows and South African continental expansion, soap operas and postapartheid identity politics, and the internet as a space for reassertions and reconfigurations of identity. As South Africa becomes more integrated into the global economy, Jacobs argues that local media have more weight in

shaping how consumers view these products in unexpected and consequential ways.

Message and Medium Caroline Tagg, Mel Evans, 2020-06-08 Studies of digital communication technologies often focus on the apparently unique set of multimodal resources afforded to users and the development of innovative linguistic strategies for performing mediatised identities and maintaining online social networks. This edited volume interrogates the novelty of such practices by establishing a transhistorical approach to the study of digital communication. The transhistorical approach explores language practices as lived experiences grounded in historical contexts, and aims to identify those elements of human behaviour that transcend historical boundaries, looking beyond specific developments in communication technologies to understand the enduring motivations and social concerns that drive human communication. The volume reveals long-term patterns in the indexical functions of seemingly innovative written and multimodal resources and the ideologies that underpin them, and shows that methods are not necessarily contingent on their datasets: historical analytic frameworks can be applied to digital data and newer approaches used to understand historical data. These insights present exciting opportunities for English language researchers, both historical and modern.

*Participatory archives in a world of ubiquitous media* Natalie Pang, Kai Khiun Liew, Brenda Chang, 2017-10-02 The media environment of today is characterised by two critical factors: the

development and adoption of ubiquitous mobile devices, and the strengthening of connectivity enabled by advances in ICT infrastructure and social media platforms. These developments have changed interactions and relationships between citizens and cultural custodians, as well as the ways archives are developed, kept, and used. Archives are now characterised by greater socialisations and networks that actively contribute to the signification of cultural heritage value. A range of new stakeholders, many of whom include the public, have sought to define what needs to be collectively remembered and forgotten. The world in which one or a few professional archivists worked on the sole mission of shaping how a society remembers is being displaced by a more democratised culture and the new generation of digitally networked archivists that are its natives. Using a range of case studies and perspectives, this book provides insights to the many ways that ubiquitous media have influenced archival practices and research, as well as the social and civic consequences of present-day archives. This book was published as a special issue of Archives and Manuscripts.

**The Digital Media Handbook** Andrew Dewdney, Peter Ride, 2013-10-30 The new edition of The Digital Media Handbook presents an essential guide to the historical and theoretical development of digital media, emphasising cultural continuity alongside technological change, and highlighting the emergence of new forms of communication in contemporary networked culture. Andrew Dewdney and Peter Ride present detailed critical commentary

and descriptive historical accounts, as well as a series of interviews from a range of digital media practitioners, including producers, developers, curators and artists. The Digital Media Handbook highlights key concerns of today's practitioners, analysing how they develop projects, interact and solve problems within the context of networked communication. The Digital Media Handbook includes: Essays on the history and theory of digital media Essays on contemporary issues and debates Interviews with digital media professionals A glossary of technical acronyms and key terms.

Pragmatics of Social Media Christian Hoffmann, Wolfram Bublitz, 2017-09-11 This handbook provides a comprehensive overview of the pragmatics of social media, i.e. of digitally mediated and Internet-based platforms which are interactively used to share and edit self- and other-generated textual and audio-visual messages. Its five parts offer state-of-the-art reviews and critical evaluations in the light of on-going developments: Part I The Nature of Social Media sets up the conceptual groundwork as it explores key concepts such as social media, participation, privacy/publicness. Part II Social Media Platforms focuses on the pragmatics of single platforms such as YouTube, Facebook. Part III Social Media and Discourse covers the micro- and macro-level organization of social media discourse, while Part IV Social Media and Identity reveals the multifarious ways in which users collectively (re-)construct aspects of their identities. Part V Social Media and Functions/Speech Acts surveys

pragmatic studies on speech act functions such as disagreeing, complimenting, requesting. Each contribution provides a state-of-the-art review together with a critical evaluation of the existing research.

The Routledge Handbook of English Language and Digital Humanities Svenja Adolphs, Dawn Knight, 2020-04-16 The Routledge Handbook of English Language and Digital Humanities serves as a reference point for key developments related to the ways in which the digital turn has shaped the study of the English language and of how the resulting methodological approaches have permeated other disciplines. It draws on modern linguistics and discourse analysis for its analytical methods and applies these approaches to the exploration and theorisation of issues within the humanities. Divided into three sections, this handbook covers: sources and corpora; analytical approaches; English language at the interface with other areas of research in the digital humanities. In covering these areas, more traditional approaches and methodologies in the humanities are recast and research challenges are re-framed through the lens of the digital. The essays in this volume highlight the opportunities for new questions to be asked and long-standing questions to be reconsidered when drawing on the digital in humanities research. This is a ground-breaking collection of essays offering incisive and essential reading for anyone with an interest in the English language and digital humanities.

**Interpreting Visual Culture** Ian Heywood, Barry Sandywell, 1999 Ranging from an analysis of the

role of vision in current critical discourse to discussion of examples taken from the visual arts, ethics and sociology, this collection presents material on the interpretation of the visual in modern culture

*Three Little Words (Walker Family)* Melissa Tagg, 2015-03-03 Ava Kingsley and Seth Walker might be the most unlikely friends ever. The only thing these two polar opposites have in common is a knack for wordsmithing. Back in college, they were known for their written sparring in the campus newspaper's popular He Says/She Says column. At their ten-year college reunion, they pick up right where they left off. Except this time their squabbling leads to a surprising turn: friendship and a year-long exchange of emails. So when Ava approaches a crossroads in her athletics department career in Minnesota, Seth is quick to offer the open apartment above the restaurant he's been remodeling in Maple Valley, Iowa. Ava doesn't know where her career will lead her next, but she's starting to suspect she might see Seth as more than a pen pal. Which would be exciting...except for the fact that he only sees her as a friend. As Maple Valley grows on her, Ava wonders if there might be something here for her even though Seth is unavailable. And maybe, just maybe, after all the words the two of them have exchanged over the years, they'll finally be able to say the three that matter most. *Three Little Words* is an e-only novella that gives an exciting introduction to Melissa Tagg's new series about the charismatic Walker family and the endearing town of Maple Valley!

### Media Policy and Music Activity Krister

Malm, Roger Wallis, 2003-09-02 How do people make music - and how does this activity relate to the policies of governments and the music industry? What is the relationship between live music and music we hear on the radio, or in music videos? How has the digital revolution affected music-making in industrialised and in developing nations? In *Media Policy and Music Activity*, Krister Malm and Roger Wallis look in depth at the relationships between policies governing the output of the music media and music activity in society. A practical base in case study material is combined with a broad theoretical framework for understanding the music media.

### Contemporary Media Stylistics Helen

Ringrow, Stephen Pihlaja, 2020-04-16 Media discourse is changing at an unprecedented rate. This book presents the most recent stylistic frameworks exploring different and changed forms of media. The volume collates recent and emerging research in the expanding field of media stylistics, featuring a variety of methods, multimodal source material, and a broad range of topics. From Twitter and Zooniverse to Twilight and Mommy Blogs, the volume maps out new intellectual territory and showcases a huge scope, neatly drawn together by leading scholars Helen Ringrow and Stephen Pihlaja. Contributors write on topics that challenge the traditional notions and conceptualisations of media and the consequences of technological affordances for the development of media production and consumption. There is a particular focus on the ways in which contemporary

media contexts complicate and challenge traditional media models, and offer new and unique ways of approaching discourse in these contexts.

**Teaching as if Learning Matters** Jennifer Meta Robinson, Valerie Dean

O'Loughlin, Katherine Kearns, Laura

Plummer, 2022-06-07 Teaching is an essential skill in becoming a faculty member in any institution of higher education. Yet how is that skill actually acquired by graduate students? Teaching as if Learning Matters collects first-person narratives from graduate students and new PhDs that explore how the skills required to teach at a college level are developed. It examines the key issues that graduate students face as they learn to teach effectively when in fact they are still learning and being taught. Featuring contributions from over thirty graduate students from a variety of disciplines at Indiana University, Teaching as if Learning Matters allows these students to explore this topic from their own unique perspectives. They reflect on the importance of teaching to them personally and professionally, telling of both successes and struggles as they learn and embrace teaching for the first time in higher education.

The Language of Hate Andrew Brindle, 2016-05-20 In this book, Andrew Brindle analyzes a corpus of texts taken from a white supremacist web forum which refer to the subject of homosexuality, drawing conclusions about the discourses of extremism and the dissemination of far-right hate speech online. The website from which Brindle's corpus is drawn, Stormfront, has been described as the most powerful active influence in the White

Nationalist movement (Kim 2005). Through a linguistic analysis of the data combining corpus linguistic methodologies and a critical discourse analysis approach, Brindle examines the language used to construct heterosexual, white masculinities, as well as posters' representations of gay men, racial minorities and other out-groups, and how such groups are associated by the in-group. Brindle applies three types of analysis to the corpus: a corpus-driven approach centered on the study of frequency, keywords, collocation and concordance analyses; a detailed qualitative study of posts from the forum and the threads in which they are located; and a corpus-based approach which combines the corpus linguistic and qualitative analyses. The analysis of the data demonstrates a convergence of reactionary responses to not only women, gay men and lesbians, but also to racial minorities. Brindle's findings suggest that due to the forum format of the data, topics are discussed and negotiated rather than dictated unilaterally as would be the case in a hierarchical organization. This research-based study of white supremacist discourse on the Internet facilitates understanding of hate speech and the behavior of extremist groups, with the aim of providing tools to combat elements of extremism and intolerance in society.

*The Quest for the Melodic Electric Bass* Per Elias Drabløs, 2016-03-03 The double bass - the preferred bass instrument in popular music during the 1960s - was challenged and subsequently superseded by the advent of a new electric bass instrument. From the mid-1960s and throughout the

1970s, a melismatic and inconsistent approach towards the bass role ensued, which contributed to a major change in how the electric bass was used in performance and perceived in the sonic landscape of mainstream popular music.

Investigating the performance practice of the new, melodic role of the electric bass as it appeared (and disappeared) in the 1960s and 1970s, the book turns to the number one songs of the American Billboard Hot 100 charts between 1951 and 1982 as a prime source. Through interviews with players from this era, numerous transcriptions - elaborations of twenty bass related features - are presented. These are juxtaposed with a critical study of four key players, who provide the case-studies for examining the performance practice of the melodic electric bass. This highly original book will be of interest not only to bass players, but also to popular musicologists looking for a way to instigate methodological and theoretical discussions on how to develop popular music analysis.

**The Media Swirl** Carol Vernallis, 2023-02-20 From fan-generated content on TikTok to music videos, the contemporary media landscape is becoming ever more vast, spectacular, and intense. In *The Media Swirl* Carol Vernallis examines short-form audiovisual media—Beyoncé’s *Lemonade*, brief sequences from Baz Luhrmann’s *The Great Gatsby*, TikTok challenges, YouTube mashups, commercials, and many other examples—to offer ways of understanding digital media. She analyzes music videos by Beyoncé, Lady Gaga, Janelle Monáe, Kendrick Lamar, Anderson .Paak, and others to

outline how sound and image enhance each other and shape a viewer's mood. Responding to today's political-media landscape through discussions of Fox News and Presidential inaugurations, Vernallis shows how a media literacy that exceeds newscasts and campaign advertising is central to engaging with the democratic commons. Forays into industry studies, neuroscience, and ethics also inform her readings. By creating our own content and knowing what corporations, the wealthy, and the government do through media, Vernallis contends, we can create a more just world.

### **Intermediality and Storytelling** Marina

Grishakova, Marie-Laure Ryan, 2010 The 'narrative turn' in the humanities, which expanded the study of narrative to various disciplines, has found a correlate in the 'medial turn' in narratology. Long restricted to language-based literary fiction, narratology has found new life in the recognition that storytelling can take place in a variety of media, and often combines signs belonging to different semiotic categories: visual, auditory, linguistic and perhaps even tactile. The essays gathered in this volume apply the newly gained awareness of the expressive power of media to particular texts, demonstrating the productivity of a medium-aware analysis. Through the examination of a wide variety of different media, ranging from widely studied, such as literature and film, to new, neglected, or non-standard ones, such as graphic novels, photography, television, musicals, computer games and advertising, they address some of the most fundamental questions raised by the medial turn in

narratology: how can narrative meaning be created in media other than language; how do different types of signs collaborate with each other in so-called 'multi-modal works', and what new forms of narrativity are made possible by the emergence of digital media.
