Social Media and Emerging Economies Manlio Del Giudice,Maria Rosaria Della Peruta,Elias G. Carayannis,2013-10-22 How have social media in emerging economies evolved differently from the rest of the world? According to studies and anecdotal evidence, innovations in the use of social media tools occur more frequently in emerging economies than they do in developed markets. The aim of this volume is to show that in emerging regions (such as China, India, and South America) where the participation of stakeholders in the circuit of social media is more active (i.e., greater frequency of contacts and creativity in the elaboration of contents), organizations not only are involved in a set of exchange relations with other social actors but are also embedded in a network of dynamic relationships. The authors utilize social network analysis to determine how entrepreneurs in emerging economies identify their most beneficial social contacts and use those contacts to leverage the resources needed for their enterprises, revealing new insights on the process of business creation and economic development in the networked age.

Folksonomies. Indexing and Retrieval in Web 2.0 Isabella Peters,2009-12-23 In Web 2.0 users not only make heavy use of Col-laborative Information Services in order to create, publish and share digital information resources - what is more, they index and represent these re-sources via own keywords, so-called tags. The sum of this user-generated metadata of a Collaborative Information Service is also called Folksonomy. In contrast to professionally created and highly struc-tured metadata, e.g. subject headings, thesauri, clas-sification systems or ontologies, which are applied in libraries, corporate information architectures or commercial databases and which were developed according to defined standards, tags can be freely chosen by users and attached to any information resource. As one type of metadata Folksonomies provide access to information resources and serve users as retrieval tool in order to retrieve own re-sources as well as to find data of other users. The book delivers insights into typical applications of Folksonomies, especially within Collaborative Information Services, and discusses the strengths and weaknesses of Folksonomies as tools of knowl-edge representation and information retrieval. More-over, it aims at providing conceptual considerations for solving problems of Folksonomies and presents how established methods of knowledge representa-tion and models of information retrieval can successfully be transferred to them.

Social Science David C. Colander,2015-08-07 Social Science, 15/e, approaches social science from a common-sense perspective, rather than from a conventional social science angle. Readers will see how seemingly diverse disciplines intermingle — anthropology and economics, for example. In the end, students will be able to approach social issues with unbiased problem-solving skills.

The New Social Learning Tony Bingham,Marcia Conner,2010-09-13 The first book to help organizations understand and harness the extraordinary workplace learning potential of social media Cowritten by the CEO of the world's largest workplace learning organization and a consultant and writer with extensive experience on the forefront of workplace learning technology Features case studies showing how organizations around the world have transformed

their businesses through social media Most business books on social media have focused on using it as a marketing tool. Many employers see it as simply a workplace distraction. But social media has the potential to revolutionize workplace learning. People have always learned best from one another -- social media enables this to happen unrestricted by physical location and in extraordinarily creative ways. The New Social Learning is the most authoritative guide available to leveraging these powerful new technologies. Tony Bingham and Marcia Conner explain why social media is the ideal solution to some of the most pressing educational challenges organizations face today, such as a widely dispersed workforce and striking differences in learning styles, particularly across generations. They definitively answer common objections to using social media as a training tool and show how to win over even the most resistant employees. Then, using examples from a wide range of organizations -- including Deloitte, IBM, TELUS, and others -- Bingham and Conner help readers sort through the dizzying array of technological options available and decide when and how to use each one to achieve key strategic goals. Social media technologies -- everything from 140-character microsharing messages to media-rich online communities to complete virtual environments and more -- enable people to connect, collaborate, and innovate on levels never before dreamed of. They make learning dramatically more dynamic, stimulating, enjoyable, and effective. This greatly anticipated book helps organizations create a contemporary learning strategy that is as timely as it is transformative.

The Future of Identity in the Information Society Simone Fischer-Hübner,Penny Duquenoy,Albin Zuccato,Leonardo Martucci,2010-08-25 The increasing diversity of Infonnation Communication Technologies and their equally diverse range of uses in personal, professional and official capacities raise challenging questions of identity in a variety of contexts. Each communication exchange contains an identifier which may, or may not, be intended by the parties involved. What constitutes an identity, how do new technologies affect identity, how do we manage identities in a globally networked infonnation society? th th From the 6 to the 10 August 2007, IFIP (International Federation for Infonnation Processing) working groups 9. 2 (Social Accountability), 9. 6/11. 7 (IT rd Misuse and the Law) and 11. 6 (Identity Management) hold their 3 Intemational Summer School on The Future of Identity in the Infonnation Society in cooperation with the EU Network of Excellence FIDIS at Karlstad University. The Summer School addressed the theme of Identity Management in relation to current and future technologies in a variety of contexts. The aim of the IFIP summer schools has been to introduce participants to the social implications of Infonnation Technology through the process of infonned discussion. Following the holistic approach advocated by the involved IFIP working groups, a diverse group of participants ranging from young doctoral students to leading researchers in the field were encouraged to engage in discussion, dialogue and debate in an infonnal and supportive setting. The interdisciplinary, and intemational, emphasis of the Summer School allowed for a broader understanding of the issues in the technical and social spheres.

Reclaiming Love Amanda Radley,2022-06-14 Sarah Campbell told one tiny white lie. When her tech-giant employer moves her to a cottage on a small Scottish island to work on a classified, controversial, and potentially world-saving project, Sarah must keep her eco-terrorist mother in the dark to prevent her from disrupting everything. Sarah's cover story—she's fallen in love, she and her girlfriend are escaping the bustle of the city, she couldn't be happier… But Sarah's better at firewalls than real walls, and when she arrives at the run-down cottage, she quickly discovers she needs help. Pippa Kent is a widowed, semi-retired structural engineer who's done with love. She fills all her free time running a handywoman service on the island. When Sarah calls Pippa out for the most basic repairs, Pippa can't help but wonder—often out loud—how anyone could be so inept at home maintenance. Then Sarah's mother suddenly decides to visit and meet her daughter's wonderful new partner. With little option, Sarah begs Pippa to be her fake girlfriend. Only the more time they spend faking it, the less pretend it feels.

<u>Voyage Out: The Complete Series</u> Mireille Pavane,2019-09-20 Lucia and Charley are the products of Old New York's ruling elite. Prestige. Wealth. Tradition. Scandal. No one is immune. Not Charley, reckless, blithe courtier of trouble, heiress to the Montrose fortune, who has been conspicuously absent for over a year without a word of truth or explanation. Nor Lucia, as docile a daughter as any parent could wish for, carrying secrets of her own, slowly awakening to a yearning for things beyond obeisance to the established order, as deeply ingrained as Old New York's fascination for, and fear of, scandal. Sailing into the summer of 1929, on the eve of the Black Tuesday Wall Street Crash and a world on the brink of change, Charley and Lucia must keep their wits sharp about them in the pleasure capitals of the Continent and on the Nile to steer their futures away from peril. There are men and temptations to resist, intrigues and mysteries to untangle, secrets to hide, lies to weave, and jewel thieves to outsmart while, back home in New York and on the Exchange, the world rumbles and thunders ominously by. More hangs in the balance than the frivolities of the Jazz Age, the glitzy parties in London and the lures of Paris, automobile races, leisurely flirtations on the French Riviera, opulent Egyptian nights, and the catching of a brilliant matrimonial prize. This Grand Tour could prove to be the making of two young women, a prelude to freedom and independence, to saving and building an empire... Or perhaps merely an invitation to rebellion, scandal and

unmitigated disaster. Running away or running towards? Tick-tock. This volume contains all three books in the Voyage Out series: Voyage Out, The Grand Tour, The Stroke of Midnight.
