*The Photo Ark* Joel Sartore, 2017 This book of photography represents National Geographic's Photo Ark, a major cross-platform initiative and lifelong project by photographer Joel Sartore to make portraits of the world's animals -- especially those that are endangered. His message: to know these animals is to save them. Sartore intends to photograph every animal in captivity in the world. He is circling the globe, visiting zoos and wildlife rescue centers to create studio portraits of 12,000 species, with an emphasis on those facing extinction. He has photographed more than 6,000 already and now, thanks to a multi-year partnership with National Geographic, he may reach his goal. This book showcases his animal portraits: from tiny to mammoth, from the Florida grasshopper sparrow to the greater one-horned rhinoceros. Paired with the prose of veteran wildlife writer Douglas Chadwick, this book presents an argument for saving all the species of our planet.

**National Geographic Complete Photography** National Geographic, 2011 Discusses the digital photography process, including how to use a digital camera, lighting, the use of space, framing, when to use a flash, background and foreground, and lenses, and provides suggestions for capturing specific subjects, including kids, wildlife, sports, and landscapes.

**Photographing Your Family** Joel Sartore, 2008  
*The Blind Photographer* Julian Rothenstein, 2016-09-06 The blind photographer cannot see a butterfly perched perfectly still on a flower, a bowl of sweet-smelling fruit, or a child's rattle on a darkened floor, but the mind's eye is sharply focused. How then, do blind or partially sighted people capture such extraordinary images? The photographs in this revelatory book suggest a deeper truth: that blindness is itself a kind of seeing, and that those who can see are often blind to the strangeness and beauty of the world around them. As the blind photographer Evgen Bavcar writes, Photography must belong to the blind, who in their daily existence have learned to become the masters of camera obscura. Through the photographs of more than fifty blind or partially sighted people from around the world, this exhilarating book—the first to explore this phenomenon in all its vibrancy and diversity—will make you see differently.

**American Geography** Sandra S. Phillips, Sally Martin Katz, 2021-05-25 Drawing from the vast photography collection at the San Francisco Museum of Modern Art, American Geography charts a visual history of land use in the United States From the earliest photographic records of human habitation to the latest aerial and digital pictures, from almost uninhabited desert and isolated mountainous territories to suburban sprawl and densely populated cities, this compilation offers an increasingly nuanced perspective on the American landscape. Divided by region, these photographs address ways in which different histories and traditions of land use have given rise to different cultural transitions: from the Midwestern prairies and agricultural traditions of the South, to the riverine systems in the Northeast, and the environmental challenges and riches of the far West. American Geography also looks at the evidence of older habitation from the adobe dwellings and ancient cultures of the Southwest to the Midwestern mounds, many of them prehistoric. SFMOMA's last photography exhibition to consider land use, Crossing the Frontier (1996), examined only the American West. At the time, this focus offered a different way to think about landscape, and a useful way to reconsider pictures of the region. American Geography expands upon the groundwork laid by Crossing the Frontier, providing a complex, thought-provoking survey. Photographers include: Carleton E. Watkins, Barbara Bosworth, Lee Friedlander, Stephen Shore, Debbie Fleming Caffery, Mitch Epstein, An-My Lê, William Eggleston, Alec Soth, Mishka Henner, Trevor Paglen, Victoria Sambunaris, Emmet Gowin, Robert Adams, Terry Evans, Dorothea Lange and Mark Ruwedel, among others.
