Collecting Qualitative Data Virginia Braun,Victoria Clarke,Debra Gray,2017-10-19 Is there more to qualitative data collection than face-to-face interviews? Answering with a resounding 'yes', this book introduces the reader to a wide array of exciting and novel techniques for collecting qualitative data in the social and health sciences. Collecting Qualitative Data offers a practical and accessible guide to textual, media and virtual methods currently under-utilised within qualitative research. Contributors from a range of disciplines share their experiences of implementing a particular technique, provide step-by-step guidance to using that approach, and highlight both the potential and pitfalls. From gathering blog data to the story completion method to conducting focus groups online, the methods and data types featured in this book are ideally suited to student projects and other time- and resource-limited research. In presenting several innovative ways that data can be collected, new modes of scholarship and new research orientations are opened up to student researchers and established scholars alike.

**Essential Radio Skills** Peter Stewart,2010-06-25 One of the few books we'd recommend BBC Training The perfect guide for anyone who wants to get on in this ever-changing and challenging media Controller BBC Radio 5 Live A rich repository of real, practical experience Director - BBC Nations & Regions An invaluable guide Director - The Radio Academy This is a practical, how-to guide to producing and presenting radio to a professional standard. Packed with day-to-day advice that captures the essence and buzz of live broadcasting; from preparing your show before it goes out, last minute changes to running orders, deciding what to drop in over a track, how to sell a feature or promote a programme, setting up competitions, thinking fast in a phone in - this book will help you do all that and more. It covers network and commercial, music and talk radio skills and is particularly suited to the independent local or community radio. It features advice from professionals, covers industry-wide best practice with enough 'need-to-know' technical information to get you up and running. **Small Signal Audio Design** Douglas Self,2020-04-17 Small Signal Audio Design is a highly practical handbook providing an extensive repertoire of circuits that can be assembled to make almost any type of audio system. The publication of Electronics for Vinyl has freed up space for new material, (though this book still contains a lot on moving-magnet and moving-coil electronics) and this fully revised third edition offers wholly new chapters on tape machines, guitar electronics, and variable-gain amplifiers, plus much more. A major theme is the use of inexpensive and readily available parts to obtain state-of-the-art performance for noise, distortion, crosstalk, frequency response accuracy and other parameters. Virtually every page reveals nuggets of specialized knowledge not found anywhere else. For example, you can improve the offness of a fader simply by adding a resistor in the right place- if you know the right place. Essential points of theory that bear on practical audio performance are lucidly and thoroughly explained, with the mathematics kept to an absolute minimum. Self's background in design for manufacture ensures he keeps a wary eye on the cost of things. This book features the engaging prose style familiar to readers of his other books. You will learn why mercury-filled cables are not a good idea, the pitfalls of plating gold on copper, and what quotes from Star Trek have to do with PCB design. Learn how to: make amplifiers with apparently impossibly low noise design discrete circuitry that can handle enormous signals with vanishingly low distortion use humble low-gain transistors to make an amplifier with an input impedance of more than 50 megohms transform the performance of low-cost-opamps build active filters with very low noise and distortion make incredibly accurate volume controls make a huge variety of audio equalisers make magnetic cartridge preamplifiers that have noise so low it is limited by basic physics, by using load synthesis sum, switch, clip, compress, and route audio signals be confident that phase perception is not an issue This expanded and updated third edition contains extensive new material on optimising RIAA equalisation, electronics for ribbon microphones, summation of noise sources, defining system frequency response, loudness controls, and much more. Including all the crucial theory, but with minimal mathematics, Small Signal Audio Design is the must-have companion for anyone studying, researching, or working in audio engineering and audio electronics.

**Broadcast Sound Technology** Michael Talbot-Smith,2013-10-22 Broadcast Sound Technology provides an explanation of the underlying principles of modern audio technology. Organized into 21 chapters, the book first describes the basic sound; behavior of sound waves; aspects of hearing, harming, and charming the ear; room acoustics; reverberation; microphones; phantom power; loudspeakers; basic stereo; and monitoring of audio signal. Subsequent chapters explore the processing of audio signal, sockets, sound desks, and digital audio. Analogue and digital tape recording and reproduction, as well as noise reduction, are also explained.

**Talkback Toast** Robin Lee-Robinson,Jenny Argante,2008 Four years ago, after the author self published is book In Salting The Gravy he offered to work on a book with 93 year-old long-time radio listener Trevor Watson and celebrate both the golden era of early NZ radio and Radio Pacific. To record the era in print has been a dream for two people separated by two generations. Talkback Toast is written from two perspectives, that of a young woman producing husband Barry Crump's popular Bush Telegraph show, and Trevor, a caller who has stuck with radio, and like many of his generation, has witnessed the beginning of a brand new media. The 240 page book covers several themes. The first six chapters deal with the pioneer era and contain familiar names like Aunt Daisy, Uncle Scrim and Selwyn Toogood, and is peppered throughout with black and white photos. The historical portion ends with Gordon Dryden, founder of Radio Pacific. The bulk of the book is written through my viewpoint. It includes working in talkback in the early 1980's, and also covers the authpr's life with Barry Crump, much of it in bush settings, prior to and following their short stint in radio. The final portion contains submissions from the public and radio staff, beginning with a story written by Merv Smith who still

hosts a radio show on Sunday morning through Radio BSport.

*The Content Makers* Margaret Simons,2007-09-03 In *The Content Makers* Margaret Simons explains the changes taking place in the Australian media. She analyses audiences, our major media organisations, the role of government – and the implications of all of these for our society and our democracy. Her examination leads her to the conclusion that the challenges facing the content providers in the modern world are part of a broader striving, a very old struggle – we might call it the search for meaning. The big media businesses may or may not survive into the future, but content certainly will, because we need it, and have always needed it. *The Content Makers* delivers a visceral understanding of how modern media works, gives a plain-language explanation of new media, and provides straightforward information on recent changes to ownership legislation and what they mean. But most importantly, it suggests a vision for the future – a new way of looking at the role of the content makers and how they and their audiences might find new hope and purpose in the future.

*Don't Talk Back To Your Vampire* Michele Bardsley,2007-07-03 A single mom gets a tasty bite of undead romance in the second novel in the Broken Heart series. Ever since a master vampire became possessed and bit a bunch of parents, the town of Broken Heart, Oklahoma, has catered to those of us who don't rise until sunset—even if that means PTA meetings at midnight. As for me, Eva LeRoy, town librarian and single mother to a teenage daughter, I'm pretty much used to being “vampified.” You can't beat the great side effects: no crow's-feet or cellulite! But books still make my undead heart beat—and, strangely enough, so does Lorcan the Loner. My mama always told me everyone deserves a second chance. Still, it's one thing to deal with the usual undead hassles: rival vamps, rambunctious kids adjusting to night school, and my daughter's new boyfriend, who's a vampire hunter, for heaven's sake. It's quite another to fall for the vampire who killed you...

**North American Muslim Women Artists Talk Back** Kenza Oumlil,2022-07-21 This book focuses on the ways in which North American Muslim women artists talk back to dominant discourses about Muslim identity and work to counter mainstream stereotypes and representations. It examines the possibilities of constructing discourses of resistance to domination. Against a backdrop of dominant media representations of oppressed and passive Muslim women, the media interventions of the exceptional women artists whose voices are showcased in this book, demonstrate that Muslim women are diverse and autonomous agents who have, historically, and continue contemporarily, to fight against all forms of injustice including those that seek to circumscribe their realities and experiences. To explore expressions and articulations of alternative discourses, this book analyzes the media texts of exceptional women artists: the stand-up comedy of Palestinian-American Maysoon Zayid, the cinematic interventions of Iranian-American Shirin Neshat, and the television comedy of Pakistani-Canadian Zarqa Nawaz. Using a methodology consisting of a textual analysis grounded in the theoretical framework of postcolonial theory and informed by gender studies and alternative media research, the analysis is supplemented with semi-structured interviews with the artists. This book is suitable for scholars and students in Gender Studies, Media Studies, Cultural Studies, Sociology, and Politics.

*Sex Workers in the Maritimes Talk Back* Leslie Ann Jeffrey, Gayle MacDonald,2011-11-01 Sex workers are often the objects of study for academics and policy makers. Theories about their lives and the policies that affect their work are usually developed without input from the sex workers themselves, as they are rarely seen as capable of analyzing the social and political world in which they work. In this book, however, sex workers set the tone. Leslie Ann Jeffrey and Gayle MacDonald interview sex workers in three Maritime cities and those who work around them: police, health-care providers, community workers/advocates, members of neighbourhood associations, and politicians. The sex workers discuss such issues as violence and safety, health and risk, politics and policy, media influence, and public perception of the trade, portraying the best and the worst facets of their working lives and expressing sentiments refreshingly at odds with commonly held opinions. Given recent Parliamentary recommendations to decriminalize prostitution, *Sex Workers in the Maritimes Talk Back* represents a timely shift to public discussions about sex work. Engaging and accessible, this book will be of interest to public policy practitioners, students of social and political science, community advocates, police, and sex workers and their families.
