Tom Cat ,2004 Tom Cat is not sure he is a cat at all, preferring to pretend to be a cow, a pig, or even a bat until the day he utters a meow and discovers that it feels pretty good.

The Garbage Times/White Ibis Sam Pink,2018-05-01 "I love the pulse of Sam Pink's sentences, the way they can hold the gorgeous and the grisly and the hilarious all at the same time. The Garbage Times/White Ibis thrilled me and messed me up, left me feeling a little dazed and a lot changed." –Laura van den Berg, author of *The Third Hotel* and *Find Me* From the freezing alleys of Chicago to the dew-blanketed bayou of Florida. From bouncing drunks and cleaning up puke to biking through the swamp laughing at peacocks. Freeze to thaw. Filth and broken glass and black water backed up in showers; lizards and Girl Scouts and themed birthday parties. A baby rat freed from the bottom of a dumpster becomes a white ibis wandering the wet driveway after a storm.

Goodbye, hello, goodbye. It was the garbage times; it was time for something else. A tale of two tales, connected by a mysterious sunlit portal. The edition is designed with tête-bêche binding as a single volume.

Music Technology in Therapeutic and Health Settings Wendy Magee, 2013-09-21 There is a rapidly emerging and developing area of music therapy practice that uses electronic music technologies in a range of therapeutic and clinical settings to help clients with complex needs. This edited volume explains cutting edge technologies and how to apply these tools in practice. With contributions from leading experts in the field, the book takes the reader through the equipment that is available including computer-based software; electronic devices which produce musical sounds with minimal movement or skill; assistive devices such as switches and sensors; and recording and listening equipment. Clinical case studies are then offered that show these technologies being used successfully with a broad range of child and adult populations, including those with visual impairments, autism spectrum disorders, medical needs, physical challenges, and mental health issues, and within a variety of settings, including a neonatal intensive care unit, schools, hospital environments, and palliative care settings. The final section looks toward the future and examines philosophical and theoretical perspectives on the use of technology and its relationship to aesthetics, gender and identity. This book will be a key resource for all music therapists, special needs educators, and professionals from the field of assistive technology, as well as allied health professionals such as occupational therapists and speech and language therapists.

Play in the Early Years Marilyn Fleer, 2021-03-24 Play is crucial to the learning and development of children in the early years. The third edition of *Play in the Early Years* is a comprehensive introduction to the theory and practice of play for children from birth to 8 years old. Drawing on classical and contemporary theories, this text examines social, cultural and institutional approaches to play, and explores a range of strategies for successfully integrating play into early years settings and primary classrooms. This edition features a new chapter on conceptual playworlds, which demonstrates what conceptual playworlds look like to infants and toddlers, pre-schoolers, and children transitioning into school. The text features classroom vignettes and photographs designed to help students connect theory to practice, and reflection questions and research activities encourage in-depth reflection and extend learning. Highly regarded by early childhood researchers and practitioners alike, *Play in the Early Years* remains an essential resource for pre-service students.

Talking Tyger Deborah Price, Ian Jenkins, 2018-11-26 In loving memory of our beautiful ginger Tom-cat, Talking Tyger. A Postphenomenological Inquiry of Cell Phones Galit Wellner, 2015-11-11 Why does the announcement of a new cellphone model ignite excitement and passion? Why do most people return home when they forget their cellphones, while only few would return for their wallets? How did the cellphone technology become so dominant for many of us? This book offers an analysis of the historical evolution and of the meanings of this technology in the lives of billions of people. The book offers a unique point of view on the cellphone that merges genealogical analysis of its development since the 1990s and philosophical insights into a coherent analytical framework. With new concepts like histories of the future and memory prosthesis, the book aims to explain the excitement arising from new model announcements and the ever-growing dependency on the cellphone through the framing of these experiences in wide philosophical contexts. It is the first philosophical analysis of the important roles the cellphone plays in contemporary everydayness.

Giving Voice Meryl Alper, 2017-01-20 How communication technologies meant to empower people with speech disorders—to give voice to the voiceless—are still subject to disempowering structural inequalities. Mobile technologies are often hailed as a way to “give voice to the voiceless.” Behind the praise, though, are beliefs about technology as a gateway to opportunity and voice as a metaphor for agency and self-representation. In Giving Voice, Meryl Alper explores these assumptions by looking closely at one such case—the use of the Apple iPad and mobile app Proloquo2Go, which converts icons and text into synthetic speech, by children with disabilities (including autism and cerebral palsy) and their families. She finds that despite claims to empowerment, the hardware and software are still subject to disempowering structural inequalities. Views of technology as a great equalizer, she illustrates, rarely account for all the ways that culture, law, policy, and even technology itself can reinforce disparity, particularly for those with

disabilities. Alper explores, among other things, alternative understandings of voice, the surprising sociotechnical importance of the iPad case, and convergences and divergences in the lives of parents across class. She shows that working-class and low-income parents understand the app and other communication technologies differently from upper- and middle-class parents, and that the institutional ecosystem reflects a bias toward those more privileged. Handing someone a talking tablet computer does not in itself give that person a voice. Alper finds that the ability to mobilize social, economic, and cultural capital shapes the extent to which individuals can not only speak but be heard.
