Scale Car Modelling Mat Irvine, 2012-05-01 Cars have always appealed as model subjects as - unlike aeroplanes or military subjects - the real thing is likely to be sitting outside the modeller's house. From the first car kits produced in the early 1950s, mainly dominated by American machinery, we now have a choice of automotive examples from around the world. The joint scale of 1:24/1:25 dominates car models, and it is these scales that will mostly be found in this book, from stock builds to race cars to wild customs. In addition, although injection styrene is the main material of choice, there are specialist builds using resin, white metal and photo-etched parts. The book includes detailed step-by-step guides for Building 'out of the box'; Customs and conversions; Applying decals; Dealing with resin; Wiring and engines; Salvaging old kits; A dented ride for 007; NASA's Hot Road; Dirtying a dirt track racer; An alien homage to Roth.

Small-Scale Armour Modelling Alex Clark, 2011-09-20 Since the mid-1990s, small-scale armour modelling has seen a great resurgence in popularity, mostly due to model manufacturers in Germany and the many smaller companies that have started selling add-ons and accessories. Using a highly visual, step-by-step approach, this book covers all of the major aspects of small-scale armour modeling, including construction, painting, finishing and presentation. Covering World War II armour, modern vehicles and everything in-between, this book is the ultimate guide for those who appreciate the beauty and craftsmanship of small-scale armour models.

Modelling the T-55 Main Battle Tank Nicola Cortese, Samuel Dwyer, Graeme Davidson, 2012-02-20 The T-55 tank first appeared in 1958, a result of numerous

improvements made to the (1949) T-54 series, and with a lineage stretching back to the wartime T-34 and the T-44. The T-55 series has seen service around the world with many armed forces, including the Warsaw Pact countries, Afghanistan, Angola, Cambodia, China, Croatia, Egypt, Iran, North Korea, Poland, Somalia, Sudan, and Vietnam, and has seen action in key modern conflicts, most recently in the two Gulf Wars. This title showcases the talents of several leading modellers, and presents Serbian, Iraqi, Czech, Syrian, and Russian variants across 1/35 and 1/72 scales. It also features several challenging projects that involve extensive scratchbuilding.

Modelling the F/A-18 Hornet Geoff Coughlin, 2012-05-20 The McDonnell Douglas F/A-18 Hornet is probably the world's most advanced air superiority fighter/attack aircraft and is often seen thrilling air-show crowds around the world. It is currently in service with the US Navy, the US Marine Corps, the Spanish, Australian, Swiss and Canadian air forces. This title provides a detailed guide to modelling the Hornet in 1/48th and 1/32nd scales, covering a variety of colour schemes. The step-by-step modelling projects include a 'Gunslingers' F/A-18C USN Hornet from Operation DESERT FOX, an F/A-18D Hornet from the Royal Malaysian Air Force, a Navy 'Black Aces' F/A-18F Super Hornet and an F/A-18A 'Top Gun'-school Hornet.

Displaying your model Richard Windrow, 2011-05-03 Even after the paint dries, there is still one important decision left to the modeller. How to display the finished work? In this new guide, expert modeller Richard Windrow covers all the common and many less common display techniques including dioramas, simple display cases, mirror stands, domes for individual figures, deep 'picture frame' boxes, and even light boxes. In a book crammed

with pictures of beautiful models on display, from World War II tanks to modern-day rally cars, it instructs both novice and expert modellers alike on how to take a simple model and display it as a work of art.

Modelling the F4F Wildcat Mark Glidden,2012-08-20 The F4F Wildcat was an aircraft of the type of which legends are made. Without the handling performance that made the Japanese Zero so famous, it was well regarded for its ruggedness and firepower and, in the hands of a skilled pilot who understood both its strengths and weaknesses, it was capable of holding its own against the best that its opponents had to offer. This book details projects that encompass four variants of the F4 Wildcat. As they were supplied to a number of air forces during the war, including the RAF, there is a wide range of markings available to modellers which are also dealt with in detail. Covering a range of modelling abilities from a beginner's first build to an expert scratch-building extras, this book is illustrated with full-colour step-by-step photographs.
