**Notes of Me** Roger North,2000-01-01 North (1651-1734) makes lively forays into the worlds of natural philosophy, Christian stoicism, Cartesian science, architecture, music, education, and James II's treatment of the Protestant courtiers.

**Electronic Commerce 2018** Efraim Turban,Jon Outland,David King,Jae Kyu Lee,Ting-Peng Liang,Deborah C. Turban,2017-10-12 This new Edition of Electronic Commerce is a complete update of the leading graduate level/advanced undergraduate level textbook on the subject. Electronic commerce (EC) describes the manner in which transactions take place over electronic networks, mostly the Internet. It is the process of electronically buying and selling goods, services, and information. Certain EC applications, such as buying and selling stocks and airline tickets online, are reaching maturity, some even exceeding non-Internet trades. However, EC is not just about buying and selling; it also is about electronically communicating, collaborating, and discovering information. It is about e-learning, e-government, social networks, and much more. EC is having an impact on a significant portion of the world, affecting businesses, professions, trade, and of course, people. The most important developments in EC since 2014 are the continuous phenomenal growth of social networks, especially Facebook , LinkedIn and Instagram, and the trend toward conducting EC with mobile devices. Other major developments are the expansion of EC globally, especially in China where you can find the world's largest EC company. Much attention is lately being given to smart commerce and the use of AI-based analytics and big data to enhance the field. Finally, some emerging EC business models are changing industries (e.g., the shared economy models of Uber and Airbnb). The 2018 (9th) edition, brings forth the latest trends in e-commerce, including smart commerce, social commerce, social collaboration, shared economy, innovations, and mobility.

**America and the Musical Unconscious** Julius Greve,Pohlmann Sascha,2015-07-31 Music occupies a peculiar role in the field of American Studies. It is undoubtedly recognized as an important form of cultural production, yet the field continues to privilege textual and visual forms of art as its objects of examination. The essays collected in this volume seek to adjust this imbalance by placing music center stage while still acknowledging its connections to the fields of literary and visual studies that engage with the specifically American cultural landscape. In doing so, they proffer the concept of the 'musical unconscious' as an analytical tool of understanding the complexities of the musical production of meanings in various social, political, and technological contexts, in reference to country, queer punk, jazz, pop, black metal, film music, blues, carnival music, Muzak, hip-hop, experimental electronic music, protest and campaign songs, minimal music, and of course the kazoo. Contributions by Hanjo Berressem, Christian Broecking, Martin Butler, Christof Decker, Mario Dunkel, Benedikt Feiten, Paola Ferrero, Jurgen Grandt, Julius Greve, Christian Hanggi, Jan Niklas Jansen, Thoren Opitz, Sascha Pohlmann, Arthur Sabatini, Christian Schmidt, Bjorn Sonnenberg-Schrank, Gunter Suss, and Katharina Wiedlack.

**The Silver Market Phenomenon** Florian Kohlbacher,2008 The current shift in demographics - aging and shrinking populations - in many countries around the world presents a major challenge to companies and societies alike. One particularly essential implication is the emergence and constant growth of the so-called silver market, the market segment more or less broadly defined as those people aged 55 and older. Increasing in number and share of the total population while at the same time being relatively well-off, this market segment can be seen as very attractive and promising, although still

very underdeveloped in terms of product and service offerings. This book offers a thorough and up-to-date analysis of the challenges and opportunities in leveraging innovation, technology, product development and marketing for elder consumers and employees. Key lessons are drawn from the Japanese lead market as well as other select countries.

Introduction to E-commerce Efraim Turban, David King, 2003 For undergraduate-level courses in Electronic Commerce. Written by an academician and a practitioner this text features exceptionally comprehensive yet manageable coverage of a broad spectrum of E-commerce essentials from a global point of view. Extremely user-friendly and practical, it features vignettes, application cases, and real-world cases in each chapter. Perfect for courses where the professor chooses to use supplemental material or in a course where the professor wants a brief book.

*Electronic Commerce 2012* Efraim Turban, David King, 2012 Explore the many aspects of electronic commerce through a managerial perspective. Electronic Commerce provides a thorough explanation of what EC is, how it's being conducted and managed, and how to assess its opportunities, limitations, issues, and risks--all from a managerial perspective. To keep pace with today's ever-changing technology, the seventh edition has been streamlined--removing material that's no longer relevant, while still providing information on the hottest topics in the field.

**The Autobiography of the Hon. Roger North** Roger North, 1887

**The Lives of the Norths** Roger North, Augustus Jessopp, 1972 As a youngster hears about her parents when they were young, she turns her imagination loose.

**Electronic Commerce 2002** Efraim Turban, David King, Jae Lee, H. Michael Chung, Merrill Warkentin, 2002 Electronic commerce is defined as the process of buying and selling goods, services and information through networks. This book focuses on applications, the technological infrastructure and other support mechanisms for the best industrial practice.

One Generation of a Norfolk House Augustus Jessopp, 1878 Life of Henry Walpole, the Jesuit father, who was put to death in 1595, with some account of other members of the Walpole family.

**Why Has Japan 'Succeeded'?** Michio Morishima, 1982 This book, by a distinguished Japanese economist now resident in the West, offers a new interpretation of the current success of the Japanese economy. By placing the rise of Japan in the context of its historical development, Michio Morishima shows how a strongly-held national ethos has interacted with religious, social and technological ideas imported from elsewhere to produce highly distinctive cultural traits. While Professor Morishima traces the roots of modern Japan back as far as the introduction of Confucianism, Taoism and Buddhism from China in the sixth century, he concentrates his observations on the last 120 years during which Japan has had extensive contacts with the West. He describes the swift rise of Japan to the status of a first-rate power following the Meiji Revolution after 1867, in which Japan broke with a long history of isolationism, and which paved the way for the adoption of Western technology and the creation of a modern Western-style nation state; and a similarly meteoric rise from the devastation of the Second World War to Japan's present position. A range of factors in Japan's economic success are analysed: her characteristic dualistic social structure - corresponding to the divide between large and medium/small enterprises - the relations of

government and big business, the poor reception of liberalism and individualism, and the strength of the Japanese nationalism. Throughout, Professor Morishima emphasises the importance of the role played in the creation of Japanese capitalism by ethical doctrines as transformed under Japanese conditions, especially the Japanese Confucian tradition of complete loyalty to the firm and to the state. This account, which makes clear the extent to which the economic rise of Japan is due to factors unique to its historical traditions, will be of interest to a wide general readership as well as to students of Japan and its history.

Business and Politics in Japan James Babb, 2001 This title provides an analysis of the relationship between business and politics in Japan. It specifies those business leaders, firms and politicians in Japan who are central to the business-politics relationship and provides the basis to identify future actors.

Advertising to Baby Boomers Chuck Nyren, 2005 Using familiar examples, Nyren advises how to change prescription drug advertising, discusses planned retirement communities and the ways that they can be made more appealing to maturing consumers, and more importantly, offers valuable advice on the advertising of general consumer goods and services. Exploding the myth that Baby Boomers just want to retreat to their younger years, Nyren explains that Boomers are not hung up on age. Who actually thinks about his or her age all the time, or even very often? he asks. Contrary to social commentators, the media, and certainly advertising agencies, most of the time we are who we are: people in our middle age, and not much different but a little different than other generations were in their middle ages. We're not jumping in mosh pits while juggling cans of soda, trying to be eighteen again.
