Developing Strategic Business Models and Competitive Advantage in the Digital Sector Daidj, Nabyla, 2014-09-30 Rapid technological advancements have the ability to positively or negatively impact corporate growth and success. Professional leaders and decision makers must consider such advancements when designing and implementing new policies in preparation for the sustainable future of the business environment. *Developing Strategic Business Models and Competitive Advantage in the Digital Sector* focuses on the application of preemptive planning in the media and entertainment industries to combat an increasingly uncertain future of innovation and competition. With research-based examples and analysis, this book is an essential reference source for academicians, researchers, and professionals interested in learning more about the impact of technology on industry success, including the changes and challenges created by the Internet and electronic media.

Transportation Decision Making Kumares C. Sinha, Samuel Labi, 2011-09-09 This pioneering text provides a holistic approach to decisionmaking in transportation project development and programming, which can help transportation professionals to optimize their investment choices. The authors present a proven set of methodologies for evaluating transportation projects that ensures that all costs and impacts are taken into consideration. The text's logical organization gets readers started with a solid foundation in basic principles and then progressively builds on that foundation. Topics

covered include: Developing performance measures for evaluation, estimating travel demand, and costing transportation projects Performing an economic efficiency evaluation that accounts for such factors as travel time, safety, and vehicle operating costs Evaluating a project's impact on economic development and land use as well as its impact on society and culture Assessing a project's environmental impact, including air quality, noise, ecology, water resources, and aesthetics Evaluating alternative projects on the basis of multiple performance criteria Programming transportation investments so that resources can be optimally allocated to meet facility-specific and system-wide goals Each chapter begins with basic definitions and concepts followed by a methodology for impact assessment. Relevant legislation is discussed and available software for performing evaluations is presented. At the end of each chapter, readers are provided resources for detailed investigation of particular topics. These include Internet sites and publications of international and domestic agencies and research institutions. The authors also provide a companion Web site that offers updates, data for analysis, and case histories of project evaluation and decision making. Given that billions of dollars are spent each year on transportation systems in the United States alone, and that there is a need for thorough and rational evaluation and decision making for cost-effective system preservation and improvement, this text should be on the desks of all transportation planners, engineers, and educators. With exercises in every chapter, this text is

an ideal coursebook for the subject of transportation systems analysis and evaluation.

Multinational Management Rien Segers, 2016-01-29 This casebook demonstrates that the future of global business lies in how well the multinational landscape is charted and how the importance of Asian market leaders is deeply embedded in it. It offers international management students and researchers an extensive guide to the business history, strategy development, and foreign market entry modes used by emerging Asian multinationals. The cases focus on well-known companies such as Lenovo, Alibaba, Infosys, Huawei, Panasonic, and Rakuten. These companies, all of which generate huge revenues in their own countries (e.g. in China, India, South Korea, Taiwan, Vietnam), are now becoming increasingly sophisticated and striving to become global brands, while also enjoying the active support of their governments in terms of their international business. Readers will learn about the current multinational landscape in Asia, the management challenges, and the future implications for traditional western companies seeking to retain their market share. Chapters on corporate entrepreneurship, human resource management and intercultural competence, and current branding trends in Asia will provide a cutting-edge update on international business strategy for students and practitioners

alike.

The Report: Thailand 2016 Oxford Business Group, 2016-04-15 According to the UN Conference on Trade and Development, Thailand has been among eight priority destinations for foreign investment since 2012. Factors weighing on growth in 2016 will include an ongoing economic slowdown, weakening global demand for Thai exports and growing levels of consumer debt. The government's investment promotion agenda, while perhaps more complicated than in previous years, also addresses the dual challenge of labour shortages and the middle-income trap through promotion of both labour-intensive and high-tech industries, while potential membership in two major trade blocs could see regional and international exports soar in the coming years. Although the near-term forecast is dampened by global volatility, weakening demand and the impact of China's slowdown, trade in Thailand will remain on an upwards trajectory in 2016, and investment, though unlikely to meet government targets, is nonetheless expected to bounce back from a challenging 2015.

Transportation Infrastructure Engineering: A Multimodal Integration, SI Version Lester A. Hoel,Nicholas J. Garber,Sadek,2010-03-23 Transportation Infrastructure Engineering: A Multimodal Integration, intended to serve as a resource for courses in transportation engineering, emphasizes transportation in an overall systems perspective. It can serve as a textbook for an introductory course or for upper-level undergraduate and first-year graduate courses. This book, unlike the widely used textbook, Traffic and Highway Engineering, serves a different purpose and is intended for a broader audience. Its objective is to provide an overview of transportation from a multi-modal viewpoint rather than emphasizing a particular mode in great detail. By placing emphasis on explaining the environment in which transportation operates, this book presents the big picture to assist students in understanding why transportation systems operate as they do and the role they play in a global society. China's Rise In Mainland Asean: Regional Evidence And Local Responses
Suthiphand Chirathivat, Buddhagarn Rutchatorn, Wasutadon Nakawiroj, 2020-09-28
In today's rapid rise and expansion of China's influence all around the world and in ASEAN during the past two decades, there has been an increasing awareness of various countries and regions adjusting themselves to the new trends, both in terms of opportunities and risks alike. This has become necessary due to the rapid changes in many aspects – political landscapes, economic issues, as well as social and cultural considerations. This book, *China's Rise in Mainland ASEAN: Regional Evidence and Local Responses*, provides timely insights on some of the latest issues pertaining to ASEAN and China, rapidly shifting interactions and upcoming geostrategic challenges. ASEAN can be said to be undergoing a new era, with China becoming more intertwined and involved with the ASEAN region than ever before. The complexity of the regional dynamics means that this phenomenon cannot be captured with a single narrative or discipline of study. In addressing the

matters at hand, this book sets out to examine and provide deeper understandings on the regional implications, and local responses from ASEAN countries, and from the perspective of the region as a whole. The underlying rationale is that adequate understanding on the matters involved in this new ASEAN-China era will help to encourage better and mutually beneficial relationships between both sides. The analysis of this book will be categorized into four main themes – (1) 'The Big Picture', concerning China's policies, strategies, and diplomatic stances, (2) 'Implications and Responses', dealing with how ASEAN members react and respond to China's actions and regional influence, (3) 'Perspectives on Trade, Investment and External Debt', which handles the economic facets of the ASEAN-China interactions, and (4) 'Connectivity in Focus', addressing various emerging and existing dimensions of connectivity expansion between ASEAN and China, both physical and virtual.

Dakṣiṇa Kosala Natasja Bosma, 2018-06-01 This book deals with the early development of Śaivism in ancient Dakṣiṇa Kosala, the region that roughly corresponds to the modern state of Chhattisgarh, plus the districts of Sambalpur, Balangir and Kalahandi of Odhisha (formerly Orissa). At the end of the sixth and the beginning of the seventh century, this region was under the control of the Pāṇḍava king Śivagupta alias 'Bālārjuna' hailing from Śrīpura (the modern village of Sirpur), who was a great patron of religion. Epigraphical evidence, supported by archaeological remains, has shown that by the time of Śivagupta's reign, which lasted for at least fifty-seven years, Dakṣiṇa Kosala was already a rich center of early Śaivism. In the context of this setting the following research questions were formulated: what circumstances fostered the rise and development of Śaivism in this area, and did the Skandapurāṇa, an important and contemporaneous religious scripture, play any role in that development? An answer to these questions would not only shed light on the religious processes at work in Dakṣiṇa Kosala, but would also touch upon the interplay of political, social, economic and

geographical factors.
