Art of Shooting Philip Treleaven, 2014-06-04 This handbook is a 'primer' for the new target shooter: introducing the firearms, shooting disciplines and firearm technology, and drawing on the expertise of Bisley, the home of British and Commonwealth target shooting. The book is organized into nine sections and over 60 deliberately short chapters. First the basics: Part A - Target Shooting Basics - introduces the different shooting disciplines available. Part B - Firearms and Shooting Equipment - covers the different rifles, handguns, shotguns, black powder and airguns used by target shooters. Then we look at the major shooting disciplines which I have grouped into: Part C - Target Rifle Disciplines - provides a short overview of each of the main target rifle disciplines, such as Fullbore, Smallbore, High Power, Benchrest and Air Rifle. Part D - Target Pistol and Gallery Disciplines - covers target pistol shooting on so-called Gallery ranges. Part E - Historic Arms Disciplines - introduces shooting with black powder and muzzleloader firearms. Part F - Military and Practical Disciplines - provides an introduction to disciplines involving service weapons and military-style competitions. Part G - Field Sports Disciplines - as the name suggests, target disciplines based around field sports, such as Clay Pigeon and Field Target (Air Rifle). And finally we cover: Part H - Shooting Techniques - introduces marksmanship with rifles, handguns, shotguns and airguns. Part I - Specialist Skills - a group of chapters introducing skills and knowledge, such as the correct cleaning of firearms, hand loading ammunition, and the selection and fitting of sights. We have tried to keep each 'chapter' as short as possible, and provide references to further information (especially on the Web). More importantly we provide contact details for each of the target shooting disciplines. We hope you enjoy this handbook and it helps you get the most from target shooting.

Controlled Process Shooting Joel Turner, 2017-12 Target Panic is not a disease, it is a hard wired self preservation system all of us have. Instinct Combat Shooting Chuck Klein,2016-08-05 While much has been written about instinct shooting with long guns, very little had been published on doing so with a handgun until this publication. Written by a pioneering author of the concept, *Instinct Combat Shooting: Defensive Handgunning for Police*, now in its fourth edition, is not about winning target shooting competitions, but purports surviving real-life firefights by examining testimonies of shootout survivors and carefully analyzing firefights that prove shooting instinctively is not only crucially fast, but also equally accurate. The book defines instinctive combat shooting as: The act of operating a handgun by focusing on the target, as opposed to the sights, and instinctively coordinating the hand and mind to cause the handgun to discharge at a time and point that ensures interception of the projectile with the target. The concepts behind instinct combat shooting discussed in this book are now being integrated into some of the most

progressive police academies in the United States and around the world. New chapters provide valuable material dispelling myths on indexing, laser sights, and other trick-shooting methods. Intended to help officers survive close-quarter combat conditions, Instinct Combat Shooting is an essential tool for police looking to improve their close-range shooting skills and enhance their firefight survival.
