OmniFocus Task Manager User Guide Bryan Bent, 2021-10-13 In 2018, version 3 of OmniFocus was released for iOS and macOS. With the release, the previous concept of contexts taken from GTD was replaced with tags. The Pro version adds the Perspectives window to OmniFocus, where you can choose which perspectives to display as tabs in the sidebar (and determine their order), and create custom perspectives that reflect views on your OmniFocus data that you want to come back to again and again. Choose Show Perspectives (Control Command-P) from the Perspectives menu to open the Perspectives window. The Perspectives window in the Pro version, with the built-in Inbox perspective selected. On the left side of the Perspectives window you'll see a list of your existing OmniFocus perspectives, including the built-in ones, where you can choose which ones to display as tabs in the sidebar and drag and drop to arrange them in your preferred order. To set a perspective as a sidebar tab, click the star button used to promote a perspective to the list of tabs in the sidebar next to the perspective name. The perspective list also serves as a way to navigate between perspectives in the main window: double-click a perspective in the list to open it. If you find this useful, you can click Collapse in the bottom bar of the Perspectives window in the bottom bar to hide the Editor when all you need is the list. Ready to explore new features and know your software better? Read this book and Learn How To Use OmniFocus Task Manager Like A Pro

Euro-Par' 99 Parallel Processing Patrick Amestoy, Philippe Berger, Michel Daydé, Iain Duff, Valerie Fraysse, Luc Giraud, Daniel Ruiz, 1999-08-20 Euro-Par is an international conference dedicated to the promotion and advancement of all aspects of parallel computing. The major themes can be divided into the broad categories of hardware, software, algorithms and applications for parallel computing. The objective of Euro-Par is to provide a forum within which to promote the development of parallel computing both as an industrial technique and an academic discipline, extending the frontier of both the state of the art and the state of the practice. This is particularly important at a time when parallel computing is undergoing strong and sustained development and experiencing real industrial take-up. The main audience for and participants in Euro-Par are seen as researchers in academic departments, government laboratories and industrial organisations. Euro-Par's objective is to become the primary choice of such professionals for the presentation of new results in their specific areas. Euro-Par is also interested in applications which demonstrate the effectiveness of the main Euro-Par themes. There is now a permanent Web site for the series <http://brahms.fmi.uni-passau.de/cl/europar> where the history of the conference is described. Euro-Par is now sponsored by the Association of Computer Machinery and the International Federation of Information Processing. Euro-Par'99 The format of Euro-Par'99 follows that of the past four conferences and consists of a number of topics each individually monitored by a committee of four. There were originally 23 topics for this year's conference. The call for papers attracted 343 submissions of which 188 were accepted. Of the papers accepted, 4 were judged as distinguished, 111 as regular and 73 as short papers.
