PostSecret Frank Warren,2005-11-29 The project that captured a nation's imagination. The instructions were simple, but the results were extraordinary. You are invited to anonymously contribute a secret to a group art project. Your secret can be a regret, fear, betrayal, desire, confession, or childhood humiliation. Reveal anything -- as long as it is true and you have never shared it with anyone before. Be brief. Be legible. Be creative. It all began with an idea Frank Warren had for a community art project. He began handing out postcards to strangers and leaving them in public places -- asking people to write down a secret they had never told anyone and mail it to him, anonymously. The response was overwhelming. The secrets were both provocative and profound, and the cards themselves were works of art -- carefully and creatively constructed by hand. Addictively compelling, the cards reveal our deepest fears, desires, regrets, and obsessions. Frank calls them graphic haiku, beautiful, elegant, and small in structure but powerfully emotional. As Frank began posting the cards on his website, PostSecret took on a life of its own, becoming much more than a simple art project. It has grown into a global phenomenon, exposing our individual aspirations,

fantasies, and frailties -- our common humanity. Every day dozens of postcards still make their way to Frank, with postmarks from around the world, touching on every aspect of human experience. This extraordinary collection brings together the most powerful, personal, and beautifully intimate secrets Frank Warren has received -- and brilliantly illuminates that human emotions can be unique and universal at the same time.

Culture Annual Report aims to become an annual document of reference that analyses the evolution of digital trends in the cultural sector (museums, libraries, publishing companies, booksellers, theatre companies, film production, music companies, etc.) It is designed to be a manual for constant reference and consultation for cultural sector professionals wishing to discover the advantages & benefits derived from the use of new technologies. The first report, coordinated by Javier Celaya of Dosdoce.com, analyses the impact of the Internet in the overall cultural sector, as well as it provides a specific focus on the use of new technologies in the performing arts (production, promotion, staging, distribution, etc.). Each year, the report will focus on a specific area of the cultural sector. The aim of the study is to exchange knowledge by identifying cases of success and good practices at both the national and international levels in order to enhance performing arts professionals' awareness of the possibilities new technologies can offer their entities and also of the digital trends they will need to bear in mind in the coming years. In this regard, the report is much more than just an initial compilation of the statistical data needed to establish the point of departure and current use of different types of technology. This study involves preliminary research and is open to the participation of any cultural entity wishing to contribute its experience and present cases of good practice and success in the use of different types of technology applied to the performing arts.

Strengthening Forensic Science in the United States National Research Council, Division on Engineering and Physical Sciences, Committee on Applied and Theoretical Statistics, Policy and Global Affairs, Committee on Science, Technology, and Law, Committee on Identifying the Needs of the Forensic Sciences Community, 2009-07-29 Scores of talented and dedicated people serve the forensic science community, performing vitally important work. However, they are often constrained by lack of adequate resources, sound policies, and national support. It is clear that change and advancements, both systematic and scientific, are needed in a number of forensic science disciplines to ensure the reliability of work, establish enforceable standards, and promote best practices with consistent application. *Strengthening Forensic Science in the United States: A Path Forward* provides a detailed plan for addressing these needs and suggests the creation of a new government entity, the National Institute of Forensic Science, to establish and enforce standards within the forensic science community. The benefits of improving and regulating the forensic science disciplines are clear: assisting law enforcement officials, enhancing homeland security, and reducing the risk of wrongful conviction and exoneration. *Strengthening Forensic Science in the*

United States gives a full account of what is needed to advance the forensic science disciplines, including upgrading of systems and organizational structures, better training, widespread adoption of uniform and enforceable best practices, and mandatory certification and accreditation programs. Finding Latinx Paola Ramos, 2020-10-20 Latinos across the United States are redefining identities, pushing boundaries, and awakening politically in powerful and surprising ways. Many—Afrolatino, indigenous, Muslim, queer and undocumented, living in large cities and small towns—are voices who have been chronically overlooked in how the diverse population of almost sixty million Latinos in the U.S. has been represented. No longer. In this empowering cross-country travelogue, journalist and activist Paola Ramos embarks on a journey to find the communities of people defining the controversial term, “Latinx.” She introduces us to the indigenous Oaxacans who rebuilt the main street in a post-industrial town in upstate New York, the “Las Poderosas” who fight for reproductive rights in Texas, the musicians in Milwaukee whose beats reassure others of their belonging, as well as drag queens, environmental activists, farmworkers, and the migrants detained at our border. Drawing on intensive field research as well as her own personal story, Ramos chronicles how “Latinx” has given rise to a sense of collectivity and solidarity among Latinos unseen in this country for decades. A vital and inspiring work of reportage, *Finding Latinx* calls on all of us to expand our understanding of what it means to be Latino and what it means to be American. The first step towards change, writes Ramos, is for us to recognize who we are.
