HC 870 - Autumn Statement 2014 Great Britain. Parliament. House of Commons. Treasury Committee,2015-02-16 The Treasury has again been unable to provide all the information needed by deadlines agreed with the OBR. The Government may, as the Chairman of the Office for Budget Responsibility suggested, have decided that for political reasons this was a price worth paying. This would set an undesirable precedent. The work of the Office for Budget Responsibility depends on the Treasury meeting the agreed deadlines. The Committee welcomes the OBR's innovation of providing uncertainty ratings for policy costings. The Committee recommends in future that the OBR publish a breakdown of the uncertainty rating assessment against the three criteria for all announced measures at Autumn Statements and Budgets. The Committee also welcomes the Government's continued publication of the distributional analysis of the Government's policy changes and recommends that the next Government continue with this important aid to transparency. The current inflation target set by the Government is symmetrical, and is 2 per cent at all times. Several witnesses alluded to the risks of very low inflation and subsequent deflation, including the Chancellor. The Chancellor has publicly welcomed the current level of inflation. This is not likely to

help anchor inflationary expectations. The Governor of the Bank of England is required to write to explain to the Chancellor why inflation has fallen below 1 per cent. It is important to avoid mixed messages on inflation targeting. The Bank of England should undertake research on the effect of net migration, and the potential for future net migration, on the supply of labour and wage growth as part of the work on meeting the MPC's remit. The Treasury should ensure that discussions within Government on immigration policy fully consider the requirements of the economy.

Mongolia International Monetary Fund. Asia and Pacific Dept,2019-09-17 This 2019 Article IV Consultation with Mongolia discusses that economy growth accelerated to 8.6 percent in the first quarter of 2019, over fiscal balance turned into surplus in 2018, and gross international reserves have increased by \$2 1/2 billion since 2016. The recovery stems from a stronger policy framework, significant official financing and a rebound in external demand. Notwithstanding the progress, Mongolia remains vulnerable to external shocks given its high debt levels and the economy's dependence on mineral exports. Structural reforms progressed in several key areas: the budget process is more resilient to political pressure and quasi-fiscal activities were curtailed. In order to achieve sustainable and inclusive growth, it is necessary to advance the current reform efforts by strengthening the rule-based fiscal policy framework, ensuring financial sector soundness and improving governance. Risks are tilted toward the downside in the near term. Shocks to mineral demand can lead to sharp fall in exports, weakening growth outlook and fiscal accounts. A slowdown in growth could trigger financial instability given still inadequate capital buffers at some banks and overindebted households.

Britain at the Polls 2010 Nicholas Allen, John Bartle, 2010-11-22 'The Britain at the Polls series always asks—and answers, often with new insights—the key questions about British general elections. And few elections in living memory pose as many big questions as that of May 2010.' - Martin Kettle, *The Guardian* 'For decades Britain at the Polls has given us high quality insights into British elections. This latest edition is the most significant and intriguing of all: an excellent cast of contributors provide a vivid and accessible presentation of evidence with an engaging clarity of writing and depth of analysis. It should prove invaluable not only for academics, but students, journalists and anyone who wants to understand a unique, game-changing election.' - Geoffrey Evans, Nuffield College, Oxford 'Britain at the Polls 2010 is an essential guide to a highly unusual election. The authors provide detailed coverage of the major developments within and between the parties, the issues that shaped the election and—perhaps most importantly—some long-term trends in public opinion that might explain New Labour's slow but steady decline since the late 1990s. Detailed, yet highly accessible, this book should be read by anyone interested in the what, when and why of this remarkable event in British politics.' - Kai Arzheimer, Professor of Empirical Political Science, University of Mainz 'This is an outstanding collection of papers by an outstanding cast of authors. It tells the story of the remarkable election of 2010 to be sure, but it also makes general patterns in British politics much more understandable. I heartily endorse it.' - Christopher Wlezien, Professor of Political Science, Temple University, Philadelphia 'This volume is a worthy contribution to a long-running and valuable series of post-election analyses. It provides insights which are of immediate interest, and in coming years it will be a useful reference for those who want to recall

‘what really happened’ in the important election of 2010. - Susan Scarrow, University of Houston The latest book in the long-running Britain at the Polls series provides an indispensable and incisive review of the extraordinary 2010 UK general election. Leading experts chart the path from Tony Blair’s reelection in 2005 to the collapse of the Labour vote and the formation of the first coalition government since 1945. Topics covered include Gordon Brown’s premiership, David Cameron’s leadership of a resurgent Conservative party, the effects of the financial crisis and the parliamentary expenses scandal, and the drama of the UK’s first ever televised leaders’ debates. The book analyses the impact of these factors and others on the election and looks ahead to assess how the coalition government-and British politics-will adapt in the new political and economic environment.

Time and Money Roger W Garrison,2002-01-22 Time and Money argues persuasively that the troubles which characterise modern capital-intensive economies, particularly the episodes of boom and bust, may best be analysed with the aid of a capital-based macroeconomics. The primary focus of this text is the intertemporal structure of capital, an area that until now has been neglected in favour of labour and money-based macroeconomics.

Katrina and Other Untold Stories Mafule Morelearn Moswane,2016-11-21 Katrina and Other

Untold Stories is the juxtaposition of morally neutral non-fictional, fictional, comical, inspirational, socio-economic and political stories put together in a single collection. This book challenges conventional wisdom by offering a different perspective through the stories narrated in a unique and interesting style. It is the first of its own kind to afford a reader to engage in complex debates delivered through a conversational manner. The book exposes the reader to ideologies which include but not limited to patriarchy, feminism, sexism, class struggle, African belief system, Christianity and indigenous knowledge. This significant contribution to African literature is written in the context of Africa. The readership will not only be captivated by the stories, they will also be empowered, liberated and intellectually stimulated to the core. The language used in the book is easy to understand even for the first time readers

How to Build a Share Portfolio Rodney Hobson, 2011-03-14 Anyone who is thinking of investing, however much or however little, will benefit from the information, advice and guidance contained in these pages. Similarly those who already have a portfolio will find it helpful to stand back and reassess whether they are making the most of their money and whether their portfolio is meeting their needs. Many investors simply pick shares that take their fancy, or perhaps ones that have been recommended in the financial press, without any thought for whether their selections create a suitable or balanced portfolio. They then cling on to their purchases irrespective of whether their investment needs have changed or whether the companies they chose still meet the investment objectives. *How to Build a Share Portfolio* explains in simple terms the criteria for picking shares in the first place and for deciding which companies to retain and which to dump. Written in a clear, easy to follow style that will suit beginners and more experienced investors alike, it is packed with real case studies taken from actual stock market events and developments to illustrate the key

points.

Olympic Risks Will Jennings, 2012-05-29 An exploration of how the Olympics are organised in response to risk. This book looks at the tension between the riskiness of mega-events, attributable to their scale and complexities, and the societal, political and organisational pressures that exist for safety, security and management of risk – leading to changes in how the Games are governed.
