

Taxi Magic

Annie Caulfield

Show Me the Magic Annie Caulfield, 2003 This is a travel book about Dahomey (Benin) - an inhospitable country in Africa where corruption is rife and where Catholicism shares a place with Gri Gri, the local Voodoo. The muslim north of the country is arid and tough, whereas the south is colourful, sophisticated and artistic. The countryside ranges from pretty English rural, to arid sub-Sahara.

The Speedy Little Taxi Darlene Geis, 197? A speedy yellow taxicab drives too fast and ignores all the traffic rules on its way to a fire.

Midnight Taxi Tango Daniel José Older, 2016-01-05 The New York Times bestselling author of *Half-Resurrection Blues* returns in a new Bone Street Rumba Novel—a knife-edge, noir-shaded urban fantasy of crime after death. The streets of New York are hungry tonight... Carlos Delacruz straddles the line between the living and the not-so alive. As an agent for the Council of the Dead, he eliminates New York's ghostlier problems. This time it's a string of gruesome paranormal accidents in Brooklyn's Von King Park that has already taken the lives of several locals—and is bound to take more. The incidents in the park have put Kia on edge. When she first met Carlos, he was the weird guy who came to Baba Eddie's botánica, where she worked. But the closer they've gotten, the more she's seeing the world from Carlos's point of view. In fact, she's starting to see ghosts. And the situation is far more sinister than that—because whatever is bringing out the dead, it's only just getting started.

Taxi, Limousine, and Transport Network Company Regulation James M. Cooper,Jorgen Aarhaug,John Scott,2023-05-11 The vehicle for hire (VFH) market – broadly comprising taxis, limousines, and app-based transport – has faced multiple and significant changes over the years, with the period since 2010 a time of major upheaval. This book documents the development of the market over time, examining its regulation and control structures, exploring its history, trends, and market theories, and discussing how these are both promoted and challenged by the changes affecting the sector. This book reviews recent developments in the VFH industry, from the influx of new market entrants and the emergence of app-based services to their widespread use, comparing international markets and their regulation, and draws on a series of case studies in key locations in North America, Europe, and Asia. It establishes and details economic, market, social, and political theory affecting the VFH industry and devotes its second half to the definition and emergence of transport typologies and markets in which the sector has a role (or potential role). The book concludes, from a neutral standpoint, on the balance between market participants, addressing the immediate future facing the industry, including the impacts of Covid and other external factors. It considers the short- and long-term effects of market change, the role played by regulators, and the market conditions imposed upon them. Written for industry practitioners – both suppliers and regulators – as well as the academic community, this book will inform the community and prompt further analysis of a significant and growing field in transportation.

The Upstarts Brad Stone, 2017-01-31 ONE OF AMAZON'S BEST BOOKS OF 2017 A look deep inside the new Silicon Valley, from the New York Times bestselling author of The Everything Store Ten years ago, the idea of getting into a stranger's car, or a walking into a stranger's home, would have seemed bizarre and dangerous, but today it's as common as ordering a book online. Uber and Airbnb have ushered in a new era: redefining neighborhoods, challenging the way governments regulate business, and changing the way we travel. In the spirit of iconic Silicon Valley renegades like Steve Jobs and Bill Gates, another generation of entrepreneurs is using technology to upend convention and disrupt entire industries. These are the upstarts, idiosyncratic founders with limitless drive and an abundance of self-confidence. Led by such visionaries as Travis Kalanick of Uber and Brian Chesky of Airbnb, they are rewriting the rules of business and often sidestepping serious ethical and legal obstacles in the process. The Upstarts is the definitive story of two new titans of business and a dawning age of tenacity, conflict and wealth. In Brad Stone's riveting account of the most radical companies of the new Silicon Valley, we discover how it all happened and what it took to change the world.

Taxi! Graham Russell Gao Hodges, 2020-03-17 Why the cabdriver is the real victim of the false promises of Uber and the gig economy. 2007 Noteworthy Book in Industrial Relations and Labor Economics, Princeton University Industrial Relations Section Hailed in its first edition as a classic

study of New York City's history and people, Graham Russell Gao Hodges's *Taxi!* is a remarkable evocation of the forgotten history of the taxi driver. This deftly woven narrative captures the spirit of New York City cabdrivers and their hardscrabble struggle to capture a piece of the American dream. From labor unrest and racial strife to ruthless competition and political machinations, Hodges recounts this history through contemporary news accounts, Hollywood films, and the words of the cabbies themselves. A new preface recalls the author's five years of hacking in New York City in the early 1970s, and a new concluding chapter explores the rise of app-based ridesharing services with the arrival of companies like Uber and Lyft. Sharply criticizing the use of the independent contractor model that is the cornerstone of Uber and the gig economy, Hodges argues that the explosion of for-hire vehicles in Manhattan reversed decades of environmental anti-congestion efforts. He calls for a return to the careful regulations that governed taxicabs for decades and provided a modest yet secure living for cabbies. Whether or not you've ever hailed a cab on Broadway, *Taxi!* provides a fascinating perspective on New York's most colorful emissaries.

Taxi Tales Joyce Ibrahim, 2005-03 Why do you want to be scum of the earth? I give you thirty days before you get disgusted and quit, was my first conversation with another woman taxi driver.

The small woman interrogating me was wearing a rat's nest hairpiece that she thought made her look more attractive, and sported a torn shirt-sleeve over her left arm to prevent sunburn. She was definitely trying to discourage me. This was the start to my love-hate relationship that lasted over ten years on the streets of Southern California. I frequently changed cab companies, looking for the magic money trip at the end of my rainbow, with no two days ever the same. Taxi tales are not new to cabdrivers; they have all experienced them. Some of these tales are the absolute truth and some only explained by being alone in her cab too much.

The Power Law Sebastian Mallaby, 2022-02-01 "A gripping fly-on-the-wall story of the rise of this unique and important industry based on extensive interviews with some of the most successful venture capitalists." - Daniel Rasmussen, Wall Street Journal "A must-read for anyone seeking to understand modern-day Silicon Valley and even our economy writ large." - Bethany McLean, The Washington Post A rare and unsettling look inside a subculture of unparalleled influence." —Jane

Mayer A classic...A book of exceptional reporting, analysis and storytelling.” —Charles Duhigg From the New York Times bestselling author of *More Money Than God* comes the astonishingly frank and intimate story of Silicon Valley’s dominant venture-capital firms—and how their strategies and fates have shaped the path of innovation and the global economy. Innovations rarely come from “experts.” Elon Musk was not an “electric car person” before he started Tesla. When it comes to improbable innovations, a legendary tech VC told Sebastian Mallaby, the future cannot be predicted, it can only be discovered. It is the nature of the venture-capital game that most attempts at discovery fail, but a very few succeed at such a scale that they more than make up for everything else. That extreme ratio of success and failure is the power law that drives the VC business, all of Silicon Valley, the wider tech sector, and, by extension, the world. In *The Power Law*, Sebastian Mallaby has parlayed unprecedented access to the most celebrated venture capitalists of all time—the key figures at Sequoia, Kleiner Perkins, Accel, Benchmark, and Andreessen Horowitz, as well as Chinese partnerships such as Qiming and Capital Today—into a riveting blend of storytelling and analysis that unfurls the history of tech incubation, in the Valley and ultimately worldwide. We learn the unvarnished truth, often for the first time, about some of the most iconic triumphs and infamous disasters in Valley history, from the comedy of errors at the birth of Apple to the avalanche of venture money that fostered hubris at WeWork and Uber. VCs’ relentless search for grand slams brews an obsession with the ideal of the lone entrepreneur-genius, and companies seen as potential “unicorns” are given intoxicating amounts of power, with sometimes disastrous results. On a more systemic level, the need to make outsized bets on unproven talent reinforces bias, with women and minorities still represented at woefully low levels. This does not just have social justice implications: as Mallaby relates, China’s homegrown VC sector, having learned at the Valley’s feet, is exploding

and now has more women VC luminaries than America has ever had. Still, Silicon Valley VC remains the top incubator of business innovation anywhere—it is not where ideas come from so much as where they go to become the products and companies that create the future. By taking us so deeply into the VCs' game, *The Power Law* helps us think about our own future through their eyes.

The Speedy Little Taxi Darlene Geis, 1955

Totem Magic John Griffith, 2012-02 Enrique Salazar and Connie Ejeekwa seem like normal sixth-graders. They attend a regular public school, with the usual assortment of friends and bullies. But the two friends share a secret. They are members of Magic User families, which have been entrusted for generations to help the Earth's endangered species without anybody else discovering their special role. These unusual totem mages embody the spirit of whatever animal they are born to represent and protect. Connie's totem animal is the mountain lion, and Enrique's is the common turkey vulture, which is not actually endangered -- yet. When Connie's father, a leader in the Magic User community, is kidnapped by an evil witchdoctor, the two budding totem mages set out to rescue him, and possibly the entire planet. Their journey begins with a dreadlocked, high-spirited, taxi-driving witch who can be instantly summoned -- at great risk -- to provide a wild ride through a magical world at war. Connie and Enrique will have to be brave and extremely clever if they hope to survive vicious attacks from the witchdoctor's powerful gang members and the various monsters lurking in the dark corners of this supernatural world. It doesn't help that the only two weapons they possess are Connie's oversized, all-seeing glasses and Enrique's magically malfunctioning flip-flops. Even worse, both are on the verge of an abrupt and mysterious preteen mental and physical change that the adult totem mages call going MAD...
