Social Media in Medicine Margaret S. Chisolm, 2018-02-05 The use of social media around the world has exploded in recent years, with the number of monthly active users of Facebook and Twitter estimated to be one billion and one quarter billion, respectively. Physicians and medical trainees are among the users of social media, raising questions of how Facebook, Twitter, and other novel online tools may best be harnessed to further medical research, patient care, and educational pursuits. Because social media enables an immediate exchange of information and ideas around shared areas of interest, it has fostered communication and collaboration among a global network of researchers, clinicians, patients, and learners. *Social Media in Medicine* reviews a range of topics, from research ethics to medical education, and includes personal reflections by clinicians and learners that represent diverse opinions about the role of social media in medicine. The book is relevant to all healthcare stakeholders and will hopefully encourage ideas and questions to generate more research into the use of social media in medical research, patient care, and education. This book was originally published as a special issue of the *International Review of Psychiatry*.

Managing Your Professional Identity Online Kathryn E. Linder, 2023-07-03 In higher education, professional online identities have become increasingly important. A rightly worded tweet can cause an academic blog post to go viral. A wrongly worded tweet can get a professor fired. Regular news items in *The Chronicle of Higher Education* and *Inside Higher Ed* provide evidence that reputations are both built and crushed via online platforms. Ironically, given the importance of digital identities to job searches, the promotion and distribution of scholarly work, pedagogical innovation, and many other components of an academic life, higher education professionals receive little to no training about how to best represent themselves in a digital space. *Managing Your Professional Identity Online: A Guide for Higher Education* fills this gap by offering higher education professionals the information and guidance they need to:- craft strong online biographical statements for a range of platforms;- prioritize where and how they want to represent themselves online in a professional capacity;- intentionally and purposefully create an effective brand for their professional identity online;- develop online profiles that are consistent, professional, accurate, organized, of good quality, and representative of their academic lives;- regularly

update and maintain an online presence;- post appropriately in a range of online platforms and environments; and- successfully promote their professional accomplishments. Managing Your Professional Identity Online is practical and action-oriented. In addition to offering a range of case studies demonstrating concrete examples of effective practices, the book is built around activities, templates, worksheets, rubrics, and bonus materials that walk readers through a step-by-step guide of how to design, build, and maintain professional online identities.
