Advances in Nuclear Envelope Research and Application: 2013 Edition ,2013-06-21 Advances in Nuclear Envelope Research and Application: 2013 Edition is a ScholarlyBrief™ that delivers timely, authoritative, comprehensive, and specialized information about Nuclear Lamina in a concise format. The editors have built Advances in Nuclear Envelope Research and Application: 2013 Edition on the vast information databases of ScholarlyNews.™ You can expect the information about Nuclear Lamina in this book to be deeper than what you can access anywhere else, as well as consistently reliable, authoritative, informed, and relevant. The content of Advances in Nuclear Envelope Research and Application: 2013 Edition has been produced by the world's leading scientists, engineers, analysts, research institutions, and companies. All of the content is from peer-reviewed sources, and all of it is written, assembled, and edited by the editors at ScholarlyEditions™ and available exclusively from us. You now have a source you can cite with authority, confidence, and credibility. More information is available at <http://www.ScholarlyEditions.com/>.

African Christian Leadership Robert Priest,Kirimi Barine,2019-10-14 Do you wish you had a better understanding of the issues and questions African Christians face as they seek to live out their faith in their cultural context? Do you wonder how Africans themselves frame these questions and their answers? Would you like access to actual research that can confirm your own experience or bring new information to your attention that would deepen and broaden your understanding? This unique book, the product of a multiyear study and survey sponsored by the Tyndale House Foundation, offers insights into all these questions and more. Featuring input from over 8,000 African survey participants and 57 in-depth interviews, it provides invaluable insight and concise analysis of the dynamics of the development of African Christian leaders today. For more information about the study project visit www.africaleadershipstudy.org.

Linear Synchronous Motors Jacek F. Gieras,Zbigniew J. Piech,Bronislaw Tomczuk,1999-09-29 Contrary to some opinions, electric motors are decidedly not part of an old-fashioned area of research. They are, in fact, the most popular machines of everyday life, and the number of types increase almost every year. Advances in materials engineering, power electronics, and control strategies along with energy and reliability demands continue to stimulate the development of exciting new technologies and applications. Ranking high among the most exciting of these technologies are linear synchronous motors (LSMs). Linear Synchronous Motors: Transportation and Automation Systems provides a comprehensive treatment of all types of brushless LSMs-their construction, electromagnetic effects, control, and applications. It explains the physics of hard magnetic materials, discusses permanent magnet and superconducting excitation systems,

and addresses applications in factory automation and high-speed transportation systems. LSMs have better performance and higher power density than their induction counterparts, and they can operate with a larger mechanical clearance between their stationary and moving parts. Paying equal attention to the design and the applications of LSMs, Linear Synchronous Motors offers a unique opportunity to master the inner workings of LSMs, discover new research results, and keep abreast of their emerging applications. Electromechanical designers, electrical and mechanical engineers, as well as linear motor enthusiasts will welcome this broad and authoritative work to their reference collections.

Preferential Voting and Applications: Approaches Based on Data Envelopment Analysis Mehdi Soltanifar, Hamid Sharafi, Farhad Hosseinzadeh Lotfi, Witold Pedrycz, Tofiq Allahviranloo, 2023-05-19 This book presents the theory and application of the models presented in this regard and establishes a meaningful relationship between data envelopment analysis and multi-attribute decision making. The issue of choice using the aggregation of voters' votes is one of the most important group decision-making issues that are always considered by decision makers in electoral systems. Voting is a method of group decision making in a democratic society that expresses the will of the majority. Voting is perhaps the simplest way to gather the opinions of experts, and this ease of application has made it a multi-attribute decision-making method in group decisions. Preferential voting is a type of voting that may refer to electoral systems or groups of the electoral system. In preferential voting, voters vote for multiple candidates, and how the candidates are arranged on the ballot is important. Researchers have made many efforts to provide models of voter aggregation, and one of the best results of these efforts is the aggregation of votes based on the policy of data envelopment analysis. Thus, in group decisions, the opinions of experts are obtained in a simple structure and consolidated in an interactive and logical structure, and the results can be a powerful tool for decision support. This book provides a complete set of voting models based on data envelopment analysis and expressing its various applications in industry and society. However, most decision-making methods do not use the opinions of experts or reduce the motivation of experts to participate in complex interactions and time, while voting methods do not have this shortcoming. This book is suitable for graduate students in the fields of industrial management, business management, industrial engineering, applied mathematics, and economics. It can also be a good source for researchers in decision science, decision support systems, data envelopment analysis, supply chain management, healthcare management, and others. The methods presented in this book can not only offer a comprehensive framework for solving the problems of these areas but also can inspire researchers to pursue new innovative hybrid methods.

Fundamental Mass Transfer Concepts in Engineering Applications Ismail Tosun,2019-06-03

Fundamental Mass Transfer Concepts in Engineering Applications provides the basic principles of mass transfer to upper undergraduate and graduate students from different disciplines. This book outlines foundational material and equips students with sufficient mathematical skills to tackle various engineering problems with confidence. It covers mass transfer in both binary and multicomponent systems and integrates the use of Mathcad® for solving problems. This textbook is an ideal resource for a one-semester course. Key Features The concepts are explained with the utmost clarity in simple and elegant language Presents theory followed by a variety of practical, fully-worked example problems Includes a summary of the mathematics necessary for mass transfer calculations in an appendix Provides ancillary Mathcad® subroutines Includes end-of-chapter problems and a solutions manual for adopting instructors

The benefits of high-level collaboration between surgical services when treating these anomalies are explained, as are treatment algorithms and care of complications. Includes evaluation and management of the newborn Describes surgical interventions of the newborn, and when a primary repair versus a staged approach is required Explains the value of laparoscopy and deciding in which cases to use it Looks at the importance of a transition program to adulthood Pediatric surgeons worldwide and the teams in which they work will benefit from this well illustrated and comprehensive work.

Microwave Processing of Materials V: Volume 430 Materials Research Society. Meeting,1996-10-28

Based on an international gathering of scientists and engineers from 17 countries, this book, the fifth in a continuing series, assesses microwave processing of materials as an emerging technology. Significant advances in understanding and control of microwave energy and its use in the processing and testing of materials are outlined. Future research and development needs are also explored. Topics include: scale-up and commercialization; microwave nondestructive testing; microwave processing; microwave system design; dielectric properties measurements and analysis; modelling of microwave heating; microwave interactions and mechanisms; microwave processing using variable frequency sources; alternate microwave sources; remediation of hazardous waste; temperature modelling and measurements; microwave processing of polymers; and plasma processing.

The Enigmatic Realm of **Tchd**: Unleashing the Language is Inner Magic

In a fast-paced digital era where connections and knowledge intertwine, the enigmatic realm of language

reveals its inherent magic. Its capacity to stir emotions, ignite contemplation, and catalyze profound transformations is nothing short of extraordinary.
