Case Study and Answers Analysis for Foundation of Chinese Medicine

Dongcheng Li, 2018 This book is intended to aid the student studying case study for the National Certification Commission for Acupuncture and Oriental Medicine (NCCAOM) in Foundation of Chinese Medicine Licensing Examination. It is highly recommended to be used to combine with my other two books which are Review and Pretest for NCCAOM and California Exams in TCM Foundation and Handouts for NCCAOM Board Preparation Course in Foundation Module. I have been teaching NCCAOM Board Review class since 2009 in Acupuncture college in the United States. This book is the result of my teaching materials and experience. It includes most common types of the case study in Chinese Medicine and is intended to help the student prepare for a general class exam and Board licensing exam. The material is organized and divided into three parts. The first part covers general introduction regarding how to use three-steps methods and tips to solve case study questions. The second part covers case study practice questions by types. The last part includes four comprehensive case study exams. All these questions can be used as a pretest to identify areas of weakness or as a post-test to determine mastery. The practice tests can reflect the content and format of Chinese medicine class test and Board licensing examination.

Acupuncture World Health Organization, 2002-12-31 The therapy of acupuncture has a long history. In its 2500 years of development a wealth of experience has been accumulated attesting to the wide range of diseases and conditions that can effectively be treated with its approach. In the past two decades there have been extensive studies on acupuncture and great efforts have been undertaken to conduct controlled clinical trials including the use of sham acupuncture or placebo acupuncture controls. This document is a brief review of the current literature on acupuncture practice which may provide information about the effectiveness of different aspects of acupuncture therapy. Since the methodology of clinical research on acupuncture is still under debate it is very difficult to evaluate acupuncture practice by any generally accepted measure. In this publication only the results of controlled clinical trials that were formally published through the year 1998 (and early 1999 for some journals) are collected and reviewed so that the conclusions may be generally accepted. In order to promote the appropriate use of acupuncture in those Member States where acupuncture has not been widely used this document is annexed with a brief abstract of each relevant reference for the assessment of acupuncture practice. The clinical conditions covered in the existing data are also included. It must be emphasized that the list of diseases symptoms or conditions covered in the publication is based on collected reports of clinical trials and so can serve only as a reference. Only national health authorities can determine the diseases symptoms and conditions for which acupuncture treatment can be recommended.

The Channels of Acupuncture Giovanni Maciocia, 2006 The premier English language text examining the secondary channels and extraordinary vessels of acupuncture.

Diagnosis in Traditional Chinese Medicine Ping Chen, 2004 A favorite for first year acupuncture and TCM students because it covers the essential knowledge of the channels and collaterals and the characteristics of the channel system, providing descriptives that include the key points, pathway, associated organs and points, physiology, pathology, clinical applications, and divergent, teninomuscular, and collateral channels.

The Clinical Practice of Master Tung's Acupuncture L Robert Chu Phd, 2016-10-18 In this book, I use a lot of standard acupuncture points along with Master Tung's acupuncture and emphasize the use of channels and imaging for optimal clinical use. If a practitioner can use this work, they can have a turnkey approach in the clinic, simply by implementing these acupuncture and herbal protocols. The idea is for each disease, I have installed cheat sheets for the practitioner to immediately refer to and try to insert needles

and prescribe herbs for. The fifth in the series of Master Tung's Acupuncture books, the idea is for someone to start with the Master Tung's Primer, The Best of Master Tung's Acupuncture, Master Tung's Acupuncture for Pain, and Master Tung's Acupuncture for Internal Medicine Disorders. With this manual, we will discuss the use of Master Tung's Acupuncture with herbals for even greater clinical success. The book is composed of monographs on each disease, best points to treat the problem, and high percentage success herbal prescriptions to give the patient as homework. Unique is that we only use a handful of both TCM and Master Tung points, and a small amount of herbal formulas for a turnkey approach to a clinic. This can be used as a roadmap for the new clinician, improve clinical success for the intermediate practitioner, or provide an alternative approach for the seasoned veteran.

Voices of Qi Alex Holland, 2000-01-27 We are in the middle of a cultural revolution in the health care industry. Nearly eight thousand people practice Traditional Chinese Medicine in the US and thirty-five states currently offer some form of legal status for its practice. Many people are seeking alternatives to the Western, medical approach to health care. To these seekers, *Voices of Qi* is an invaluable aid in exploring what Traditional Chinese Medicine has to offer. Alex Holland has done an admirable job of presenting the basic tenets and practices to this ancient tradition in a clear, concise and accessible manner.

Acupuncture for Babies, Children and Teenagers Rebecca Avern, 2018-09-21 This colour textbook is a comprehensive guide to diagnosis and treatment in paediatric acupuncture. Ill health related to modern lifestyles is discussed, as is the role of family dynamics in childhood disease. Rebecca Avern examines treatment of children from both a TCM and a Five Element perspective. Throughout, she highlights how diagnosis and treatment should be tailored depending on the age of the child. The book includes information on a wide variety of treatment methods, including needling and pediatric tui na. The book covers all the conditions that children commonly present with in modern practice, including food allergies, Chronic Fatigue Syndrome, issues relating to Autism Spectrum Disorder, and teenage depression, anxiety and eating disorders.

An Intro to Acupuncture And TCM (Traditional Chinese Medicine): How To Lose Weight, Feel Great, And Fix Your Sore Back With Acupuncture And Other Techniques From Integrative Health Care In China Martin Avery, 2014-05-02 An Intro To Acupuncture And TCM is the story of a man who was told he was going to die, by a specialist in Canada, but was brought back to life by integrative health care in China. An emergency neurology specialist told Martin Avery he was going to die but he got a second opinion. A doctor of Traditional Chinese Medicine used acupuncture, fire cupping, moxibustion, herbs, finger needling, and nutrition so he could develop good jing-chi-shen and she predicted he would live a long time.

TCM Case Studies: Internal Medicine Baiyan Liu, Suzanne Robidoux, Xiao Ye, 2015-01-15 Chinese internal medicine is the foundation of clinical practice of Chinese medicine and covers a large variety of diseases and symptoms. Developing expertise in every internal disease requires a lot of practice and extensive studies. However, after mastering the theory of Chinese medicine and classical understanding of the etiology and pathomechanism of diseases, the practitioner must acquire many years of clinical practice. One could spend years accumulating firsthand experience. However, since there is ample information collected from successful cases studies available to us, it is highly profitable for the practitioner to analyze and grasp the knowledge through the experience of the masters that came before them. In this approach, medicine itself will continue to evolve and improve. This collection of internal medicine clinical cases contains clear and detailed analysis of commonly seen diseases such as diabetes, Parkinson's Disease, post stroke sequelae, insomnia, epilepsy, bipolar disorder, emaciation, rheumatoid arthritis and many more. These medical cases

are concrete and filled with medical knowledge from experts on the theory, treatment principles and methods with medicinals, formulas, acupuncture and moxibustion. In addition, to deepen the level of understanding of the diseases, comprehension questions have been added at the end of each chapter with detailed answers. This clinical case study collection is a most for all practitioners of Chinese medicine.

Acupuncture and Moxibustion as an Evidence-based Therapy for Cancer William C.S. Cho, 2012-10-13 Cancer is one of the leading killers in the world and the incidence is increasing, but most cancer patients and cancer survivors suffer much from the disease and its conventional treatments' side effects. In the past, clinical data showed that some complementary and alternative medicine (CAM) possessed anticancer abilities, but some clinicians and scientists have queried about the scientific validity of CAM due to the lack of scientific evidence. There is great demand in narrowing the knowledge gap to explore the scientific and evidence-based knowledge of CAM in the anticancer field. With this aim, an unparalleled undertaking of a book series is launched to structurally consolidate this area. Although acupuncture and moxibustion have been practiced for millennia, they have come under scientific investigation only recently. Acupuncture and moxibustion have been used clinically to treat cancer-related symptoms (e.g. cancer pain, anxiety, depression and insomnia), manage treatment-induced side effects (e.g. hot flashes, nausea and vomiting) and enhance immunity (e.g. blood cell count, lymphocyte and natural killer cell activity). This is the first book manages to provide comprehensive and updated scientific evidence of the effectiveness of acupuncture and moxibustion intervention for cancer care. Laboratory and animal studies have uncovered the mechanisms of acupuncture and moxibustion for cancer therapy. Promising results of most clinical trials show the efficacy and safety of acupuncture and moxibustion in cancer management. This book consists of fifteen chapters which address a range of important aspects that will impact on the application of acupuncture and moxibustion. An overview of the safety and side effects of acupuncture and moxibustion for cancer care are also covered. In addition, the integration of acupuncture with Western medicine in cancer treatment and recent clinical trials are included as well. Opinion leaders around the world have teamed up to pursue a thorough and up-to-date review of the area, this volume will contribute great to the cancer, clinical and academic community by providing evidence-based information on the efficacy of acupuncture and moxibustion as an anticancer therapy.

Acupuncture in Clinical Practice Nadia Ellis, 2013-12-14

Acupuncture Hai Hong, 2013 Acupuncture is widely practised in the 21st century in scientifically developed countries for a wide range of ailments ranging from chronic pain, giddiness and high blood pressure to gastrointestinal disorders and sexual dysfunction. Yet the reasons for its vaunted efficacy remain a matter of controversy. In traditional Chinese medical theory, the mechanism of action in acupuncture was understood in terms of the flow of qi and the balance of yin and yang through the body's meridians, a complex network painstakingly charted but never found. Modern medical researchers have examined old and new needling points, and some view them as OC trigger pointsOCO that stimulate physiological responses in the body. There is also clear evidence of strong placebo effects, although it has not been conclusively established that that this is either the main or the only significant effect. This volume contains twelve articles covering the latest scientific explanations of the mechanism of acupuncture and critical reviews of clinical trials on its efficacy by leading scholars, including Edzard Ernst at Exeter, Lixing Lao at the University of Maryland, PC Leung at the Chinese University of Hong Kong and Thomas Lundberg at Karolinska Institute. Hong Hai is Senior Fellow at the Institute of Advanced Studies and Adjunct Professor, Nanyang Technological University, Singapore and Director of the Renhai Clinic.

Evaluation of Acupuncture Friedrich G. Wallner, Fengli Lan, 2018 The book

outlines a methodology that is adequate for research on Classical Chinese Medicine and discusses Evidence-Based Acupuncture and Mechanistic Studies of Acupuncture, the evolution of acupuncture, classical texts, clinical trials, women's diseases, lifestyle-related diseases, the placebo effect, and Baomai and Baoluo.

Traditional Chinese Medicine Chen Keji, 1994

Acupuncture Research Hugh MacPherson, Richard Hammerschlag, George Thomas Lewith, Rosa N. Schnyer, 2007-10-12 This is the first book to set out a full range of research strategies for evaluating the clinical practice of acupuncture. Leading acupuncturists and researchers with international reputations share their expertise. They illustrate their descriptions with practical examples of what has worked and what has not. It outlines many of the key challenges in the field. These challenges relate to the nature of acupuncture and the gap between current research evidence and the actual experiences of acupuncturists in the field. By focusing the chapters on key research questions, rather than methods, the book has a user-friendly feel. Each chapter is easily accessible with brief explanations of research designs as well as vignettes of relevant past research. The book is based on a deep understanding of acupuncture, with its inherent complexity in practice, whether based on traditional principles or more modern concepts. By incorporating a more sophisticated understanding of the field, this book details a range of strategies aiming to develop the evidence base with the utmost rigour. It is the first book on acupuncture research to take this unique view, integrating the very best of evidence-based medicine with a genuine sensitivity to the discipline of acupuncture, from its traditional and holistic roots to its more modern interpretations.

The Channels of Acupuncture Cards Giovanni Maciocia, 2006 Flash cards allow students and practitioners of acupuncture to test themselves on the channels and extraordinary vessels of acupuncture.

Clinical Acupuncture Gabriel Stux, Richard Hammerschlag, 2001 There is a large increase in interest in acupuncture by health care consumers. The three main reasons for this are medical effectiveness, cost effectiveness and the credibility that clinical trials and physiological research have provided. Acupuncture is rapidly moving out of the arena of alternative medicine, in large part again because it is grounded more firmly than other alternative treatments in research. The book provides the reader with the up-to-date information on the clinical bases of acupuncture.

TCM - A Quick Study Ann Cecil-Sterman, 2009-02-04 This small study aid is a condensation of key points of TCM I compiled for my own study while preparing for the national exams (NCCAOM). They're not intended to be a substitute for a detailed TCM text such as G. Maciocia's or CAM (Chinese Acupuncture and Moxibustion). A clear understanding of TCM is essential for licensure in the United States and for useful dialogue in our community of acupuncturists.
