Stock and Option Trading Rules to Live By Benjamin Johnson, 2021-03-06 Trading the stock market with its infinite possibilities requires a trading plan and trading rules to reduce the noise. It is extremely important to have trading rules for your entry, holding time of a stock, call, or put option and exit. Trading rules create order and direction in a chaotic trading environment. The most successful stock and option traders are those having trading rules they live by, and act on those rules without hesitation. The most successful traders know how to keep their stock and option losses small. It is not the size of your gains, but the size of your losses that really count! They know how to use their trading past as a guidepost and not as a whipping post. The most successful traders know how to take a loss. They accept loss as part of the trading arena. They regularly keep a trading journal for all their trades, whether it was a live trade or a practice trade. It is okay to have a loss, but learn the lesson from the trade, and vow to never repeat that mistake again. Your first loss is the best loss! Trading rules act like a filter, and greatly filters the noise that is not applicable in the trading world for that day or for that moment. If you are trading the stock market and have several losses, it is because you have no trading plan and you have no trading rules within that plan. In trading, I take full

responsibility for my gains and losses, while using trading rules as guidance. When I am in a live trade, I always keep an emotional balance. Confidence is gained thru memorization of trading rules and tons of practice in the Paper Money account on Think or Swim. Think or Swim, by TD Ameritrade is a free trading platform to use, but you will have to pay for commissions only when buying and selling stock, calls, and put options. Think or Swim has a Paper Money account, that you can do everything as in a real trade, but with fake money. Think or Swim also has a trading app for your cell phone too. All my professional stock and option settings and indicators I use to trade with for Think or Swim is in the Appendix. Also, the Think or Swim settings for my cell phone app is in the Appendix of this book too. The settings are there for you to copy and are there for you to install and use on your own Think or Swim trading accounts and cell phone app. My settings are critical for a person's trading success! Its highly recommended that you practice stock and option trading in the Paper Money account for 1 year, before using real money in the trading leg on Think or Swim. By regular practice, your will be able to reduce the emotional part that can be stirred up by live trading produced by fear and greed. You must learn how to eliminate fear and greed, or it will kill you in the stock market! Great confidence and low emotions are key to success! Good luck and with God's Speed!

How to Day Trade Ross Cameron, 2015-10-29 Success as a day trader will only come to 10 percent of those who try. It's important to understand why most traders fail so that you can avoid those mistakes. The day traders who lose money in the market are losing because of a failure to either choose the right stocks, manage risk, and find proper entries or follow the rules of a proven strategy. In this book, I will teach you trading techniques that I personally use to profit from the market. Before diving into the trading strategies, we will first build your foundation for success as a trader by discussing the two most important skills you can possess. I like to say that a day trader is two things: a hunter of volatility and a manager of risk. I'll explain how to find predictable volatility and how to manage your risk so you can make money and be right only 50 percent of the time. We

turn the tables by putting the odds for success in your favor. By picking up this book, you show dedication to improve your trading. This by itself sets you apart from the majority of beginner traders.

Mobile Trader 3Douglas Pihl,2018-05-29 Investing can be difficult, trading can suck-the-life out-of-you & so many people lose more than they earn back. Using applications can help bridge the gap between technical expertise and common user time. This can help build better profits with less attention than what usual trading would require. Applications are a Dime in a Dozen, meaning there's a bunch and they all do the same thing. Because of this, many people have less trust in banking apps, investment apps and similar. In many ways this is a good thing to do but not everyone has much of a choice nowadays. This Pamphlet will walk you through the steps to using a few specific apps that can help you earn more money. This Pamphlet is for learning how to use apps with methods to help someone take some money and invest/trade it for personal gains. You are not guaranteed to earn or win since the work truly rests upon your head.
