Since 2006, forward-thinking companies like Apple, JetBlue, Whole Foods, and GM have discovered the instant benefits of leveraging the social media phenomenon known as Twitter to reach consumers directly, build their brand, and increase sales. Twitter is at the leading edge of the social media movement, allowing members to connect with one another in real time via short text messages?called tweets?that can be received either via the Twitter site or by e-mail, instant messenger, or cell phone. In *Twitter Power*, Internet marketing and Web innovation expert Joel Comm shows businesses and marketers how to integrate Twitter into their existing marketing strategies to build a loyal following among Twitter members, expand awareness for their product or service, and even handle negative publicity due to angry or disappointed consumers. Hashtag Activism Interrogated and Embodied Melissa Ames, Kristi McDuffie, 2023-04-01 Hashtag Activism Interrogated and Embodied analyzes the ways that hashtags repurpose and reclaim societal narratives, considering how these digital interactions carry over into external spaces and are embodied by both participants and spectators alike. A diverse set of contributors from a range of disciplines utilize a variety of methodologies to interrogate the lifespan and trajectories of specific hashtag campaigns, study rhetorical strategies engaged by online communities, and analyze how hashtags are employed for particular purposes. The chapters capture twenty-first-century digital activism unfolding in different social and geopolitical climates. Delving into hashtag activism in various forms (tweets, memes, and personal narratives) and spaces (Twitter, Facebook, and in-person protests), these chapters reveal how participants question and construct online and offline identities and imagined and actualized communities. They also showcase the complicated ways hashtag activism intersects with consumer, popular, and celebrity cultures. Hashtag Activism Interrogated and

Embodied calls for broader inclusion in what is considered hashtag activism, such as digital fandom, how hashtags are co-opted for nefarious purposes, the effects of anti-activism, and the role of journalism and the media. It will appeal to a range of disciplines including rhetoric and composition, internet studies, communication studies, media studies, feminist studies, affect studies, cultural studies, technical communication, and sociology. Social Media and the Law Daxton Stewart, Daxton R. Stewart, 2017-02-10 Social media platforms like Facebook, Twitter, Instagram, YouTube, and Snapchat allow users to connect with one another and share information with the click of a mouse or a tap on a touchscreen—and have become vital tools for professionals in the news and strategic communication fields. But as rapidly as these services have grown in popularity, their legal ramifications aren't widely understood. To what extent do communicators put themselves at risk for defamation and privacy lawsuits when they use these tools, and what rights do communicators have when other users talk about them on social networks? How can an entity maintain control of intellectual property issues—such as posting copyrighted videos and photographs—consistent with the developing law in this area? How and when can journalists and publicists use these tools to do their jobs without endangering their employers or clients? Including two new chapters that examine First Amendment issues and ownership of social media accounts and content, *Social Media and the Law* brings together thirteen media law scholars to address these questions and more, including current issues like copyright, online impersonation, anonymity, cyberbullying, sexting, and live streaming. Students and professional communicators alike need to be aware of laws relating to defamation, privacy, intellectual property, and government regulation—and this guidebook is here to help them navigate the tricky legal terrain of social media.

Not for Free Saul J. Berman, 2011-02-17 Business model disruption affects not just entertainment, media, and retail companies, but many other industries where supply chains, production lines, distribution channels, and the products and services themselves are becoming more digital. In INFORMATION RULES, Hal Varian and Carl Shapiro discussed how traditional sources of revenues were being threatened as new ventures entered the market, offering new business models, innovating partnership approaches, and changing the integral nature of the value chain. This book moves beyond predictions of academics and maps out the practices that work. Berman helps readers to analyze and distill their new revenue generating opportunities into the action plans lacking in most existing books. By closely examining how the best companies are exploiting new revenue models, Berman suggests seven key components of new strategy execution. Discussing new products, market segments, pricing strategies, indirect revenue streams through networked communities, and other models, this book provides lessons for Monday morning as well as a look at the bigger picture of how revenue innovation informs larger business model innovation and longer term corporate strategy.

Digital Vertigo Andrew Keen, 2012-05-22 Digital Vertigo provides an articulate, measured, contrarian voice against a sea of hype about social media.

As an avowed technology optimist, I'm grateful for Keen who makes me stop and think before committing myself fully to the social revolution. —Larry Downes, author of *The Killer App In Digital Vertigo*, Andrew Keen presents today's social media revolution as the most wrenching cultural transformation since the Industrial Revolution. Fusing a fast-paced historical narrative with front-line stories from today's online networking revolution and critiques of social companies like Groupon, Zynga and LinkedIn, Keen argues that the social media transformation is weakening, disorienting and dividing us rather than establishing the dawn of a new egalitarian and communal age. The tragic paradox of life in the social media age, Keen says, is the incompatibility between our internet longings for community and friendship and our equally powerful desire for online individual freedom. By exposing the shallow core of social networks, Andrew Keen shows us that the more electronically connected we become, the lonelier and less powerful we seem to be.

Mastering the VC Game Jeffrey Bussgang, 2010-04-29 Entrepreneurs who dream of building the next Amazon, Facebook, or Google can take advantage of one of the most powerful economic engines the world has ever known: venture capital. To do so, you need to woo, impress, and persuade venture capitalists to take a risk on an unproven idea. That task is challenge enough. But choosing the right investor can be harder still. Even if you manage to get backing, you want your VC to be a partner, not some adversary who will undermine your vision in order to make a quick return. Jeffrey Bussgang is one of a few people who have played on both sides of this high-stakes game. By his early thirties, he had helped build two successful start-ups—one went public, the other was acquired. Now he draws on his experience and unique perspective on the other side as a venture capitalist helping entrepreneurs bring their dreams to fruition. Bussgang offers detailed insights, colorful stories, and practical advice gathered from his own experience as well as from interviews with dozens of the most successful players on both sides of the game, including Twitter's Jack Dorsey and LinkedIn's Reid Hoffman. He reveals how to get noticed, perfect a pitch, and negotiate a partnership that works for everyone. An insider's guide to the secrets of the world venture capital, *Mastering the VC Game* will prove invaluable for entrepreneurs seeking capital and successful partnerships.

Facebook Nation Newton Lee, 2022-02-02 This book explores total information awareness empowered by social media. At the FBI Citizens Academy in February 2021, I asked the FBI about the January 6 Capitol riot organized on social media that led to the unprecedented ban of a sitting U.S. President by all major social networks. In March 2021, Facebook CEO Mark Zuckerberg, Google CEO Sundar Pichai, and Twitter CEO Jack Dorsey appeared before Congress to face criticism about their handling of misinformation and online extremism that culminated in the storming of Capitol Hill.

With more than three billion monthly active users, Facebook family of apps is by far the world's largest social network. Facebook as a nation is bigger than the top three most populous countries in the world: China, India, and the United States. Social media has enabled its users to inform and misinform the public, to appease and disrupt Wall Street, to mitigate and exacerbate the COVID-19 pandemic, and to unite and divide a country. Mark Zuckerberg once said, We exist at the intersection of technology and social issues. He should have heeded his own words. In October 2021, former Facebook manager-turned-whistleblower Frances Haugen testified at the U.S. Senate that Facebook's products harm children, stoke division, and weaken our democracy. This book offers discourse and practical advice on information and misinformation, cybersecurity and privacy issues, cryptocurrency and business intelligence, social media marketing and caveats, e-government and e-activism, as well as the pros and cons of total information awareness including the Edward Snowden leaks. Highly recommended. - T. D. Richardson, Choice Magazine A great book for social media experts. - Will M., AdWeek Parents in particular would be well advised to make this book compulsory reading for their teenage children... - David B. Henderson, ACM Computing Reviews

The Future of Journalism Bob Franklin, 2013-09-13 The future of journalism is hotly contested and highly uncertain reflecting developments in media technologies, shifting business strategies for online news, changing media organisational and regulatory structures, the fragmentation of audiences and a growing public concern about some aspects of tabloid journalism practices and reporting, as well as broader political, sociological and cultural changes. These developments have combined to impoverish the flow of existing revenues available to fund journalism, impact radically on traditional journalism professional practices, while simultaneously generating an increasingly frenzied search for sustainable and equivalent funding – and from a wide range of sources - to nurture and deliver quality journalism in the future. This book brings together journalists and distinguished academic specialists from around the globe to present the findings from their research and to discuss the future of journalism, the shifting quality of its products, its wide ranging sources of finance, as well as the economic and democratic consequences of the significant changes confronting Journalism. The Future of Journalism details the challenges facing the press in contemporary societies and provides essential reading for everyone interested in the role of journalism in shaping and sustaining literate, civil and democratic societies. This book consists of special issues from Journalism Studies and Journalism Practice.

TURKISH POLICY QUARTERLY - VOL. 19 - NO. 3 - FALL 2020 Anneli Ahonen, Rıdvan Duran, Brittany Beaulieu, Emine Etili, Gülin Çavuş, Yasin Beceni, Gürkan Özturan, Volha Damarad, Ovie Onagbeboma, 2020-12-01 The 75th issue of TPQ comes at a time when the world is still in the grips of the COVID-19 pandemic. While not a new phenomenon, the concurrent swell in digital disinformation and misinformation has complicated the public health response on both sides of the Atlantic, as well as further eroded democratic values. Our Fall 2020 issue focuses on key challenges related to disinformation and misinformation, featuring analyses on social media usage, data protection and privacy, fact-checking, and the future of disinformation in a post-COVID-19 world. We are honored to publish this special and timely issue in collaboration with our longstanding partner, Friedrich Naumann Foundation (FNF). Foreign interference and manipulation tactics have not only been polluting the digital space, but have also been threatening democratic societies, institutions, and values. Headlining the Fall 2020 issue, Anneli Ahonen, Head of the East StratCom Task Force at the European Union External Action Service, provides an overview of the EU's response to this worldwide threat through the cases of Ukraine and Belarus. The Task Force's efforts to counter disinformation are part and parcel of strengthening the EU's communication with its Eastern neighborhood, explains Ahonen. The author points to online campaigns such as #BeatCovid and EUvsDisinfo as having been particularly effective: the former has helped increase the rate of Ukrainians who see the EU as Ukraine's ally in the fight against COVID-19 from 10 to 32 percent, while the latter has played a vital role in

informing Belarusian journalists about Kremlin disinformation tactics in the context of post-election rallies. Concluding that societies are not helpless in the face of disinformation, Ahonen argues that the “infodemic” is an opportunity for democracies to increase their support of freedom of speech and independent, trustworthy media outlets. Discussing the state of print media in Turkey during the pandemic, General Director of the Press Bulletin Authority, Rıdvan Duran, elaborates on the support mechanisms the Turkish Government has provided to newspapers during this period. Highlighting the significant role of print media in the response to COVID-19, Duran argues that newspapers, despite their uncertain future, continue to be a reliable communication channel by providing accurate and fact-checked information during public crises. Therefore, as part of efforts to ensure newspapers’ survival during the pandemic, advertisement costs were determined as force majeure and debt payments were deferred, Duran explains. With the contentious 2020 US presidential election behind us, Brittany Beaulieu, visiting fellow at GMF, elucidates on the history of malign influence operations surrounding US elections, with a focus on the 2016 elections. US governmental bodies exposed the Kremlin’s interference campaigns and implemented deterrent policies, however Beaulieu argues that President Trump has undermined those efforts by not putting forward a coherent foreign interference policy. It is the question of whether the US can repair its institutional capacity that will determine its success in addressing foreign interference, Beaulieu concludes. Some of the other topics explored in this issue include data privacy rights, social media platforms’ efforts to curb online disinformation, the pivotal role fact-checkers play in combatting fake news in Turkey, and systemic racism within the nursing profession in Canada.

Memory, Conflict and New Media Ellen Rutten, Julie Fedor, Vera Zvereva, 2013-04-12 This book examines the online memory wars in post-Soviet states – where political conflicts take the shape of heated debates about the recent past, and especially World War II and Soviet socialism. To this day, former socialist states face the challenge of constructing national identities, producing national memories, and relating to the Soviet legacy. Their pasts are principally intertwined: changing readings of history in one country generate fierce reactions in others. In this transnational memory war, digital media form a pivotal discursive space – one that provides speakers with radically new commemorative tools. Uniting contributions by leading scholars in the

field, *Memory, Conflict and New Media* is the first book-length publication to analyse how new media serve as a site of political and national identity building in post-socialist states. The book also examines how the construction of online identity is irreversibly affected by thinking about the past in this geopolitical domain. By highlighting post-socialist memory's digital mediations and digital memory's transcultural scope, the volume succeeds in a twofold aim: to deepen and refine both (post-socialist) memory theory and digital-memory studies. This book will be of much interest to students of media studies, post-Soviet studies, Eastern European Politics, memory studies and International Relations in general.
