Aurora Burning Amie Kaufman,Jay Kristoff,2021-04-06 Our heroes are back . . . kind of. From the bestselling co-authors of the Illuminae Files comes the second book in the epic Aurora Cycle series about a squad of misfits, losers, and discipline cases who just might be the galaxy's best hope for survival. First, the bad news: An ancient evil--your standard consume-all-life-in-the-galaxy deal--is about to be unleashed. The good news? Squad 312 is here to save the day. As soon as they've just got to take care of a few small distractions first. Like the clan of gremps who are holding a serious grudge against the squad. And a bunch of illegit GIUTA agents with creepy flowers where their eyes used to be. Then there's Kal's long-lost sister, who's not exactly happy to see him. But with the reappearance of the colony ship that Auri was found on, new clues about Auri--and her powers as a Trigger--begin to come to light. And just in time. Because if Auri can't learn to master her powers, the squad going to be soooo dead. Shocking revelations, bank heists, mysterious gifts, inappropriately tight bodysuits, and an epic firefight will determine the fate of the Aurora Legion's most unforgettable heroes--and, you know, the rest of the galaxy.

Margaret Truman's Murder at the CDC Margaret Truman,Jon Land,2022-02-15 Murder and intrigue on the steps of the United States capital building pulls Robert Brixton into his most personal case yet, in Margaret Truman's Murder at the CDC 2017: A military transport on a secret run to dispose of its deadly contents vanishes without a trace. The present: A mass shooting on the steps of the Capitol nearly claims the life of Robert Brixton's grandson. No stranger to high-stakes investigations, Brixton embarks on a trail to uncover the motive behind the shooting. On the way he finds himself probing the attempted murder of the daughter his best friend, who works at the Washington offices of the CDC. The connection between the mass shooting and Alexandra's poisoning lies in that long-lost military transport that has been recovered by forces determined to change America forever. Those forces are led by radical separatist leader Deacon Frank Wilhyte, whose goal is nothing short of bringing on a second Civil War. Brixton joins forces with Kelly Lofton, a former Baltimore homicide detective. She has her own reasons for wanting to find the truth behind the shooting on the Capitol steps, and is the only person with the direct knowledge Brixton needs. But chasing the truth places them in the cross-hairs of both Wilhyte's legions and his Washington enablers. At the Publisher's request, this title is being sold without Digital Rights Management Software (DRM) applied.

Line War Neal Asher,2014-09-23 The Polity is under attack from a 'melded' AI entity with control of the lethal Jain technology, yet the attack seems to have no coherence. When one of Erebus's wormships kills millions on the world of Klurhammon, a high-tech agricultural world of no real tactical significance, agent Ian Cormac is sent to investigate, though he is secretly struggling to control a new ability no human being should possess . . . and beginning to question the motives of his AI masters. Further attacks and seemingly indiscriminate slaughter ensue, but only serve to bring some of the most dangerous individuals in the Polity into the war. Mr Crane, the indefatigable brass killing machine sets out for vengeance, while Orlandine, a vastly-augmented haiman who herself controls Jain technology, seeks a weapon of appalling power and finds allies from an ancient war. Meanwhile Mika, scientist and Dragon expert, is again kidnapped by that unfathomable alien entity and dragged into the heart of things: to wake the makers of Jain technology from their five-million-year slumber. But Erebus's attacks are not so indiscriminate, after all, and could very well herald the end of the Polity itself . . .

Galaxy Outlaws Mission Pack 4 J.S. Morin,2017-11-14 It's impossible to outrun your past, no matter how deep you drop in the astral. With the

weight of his conscience growing by the mission and a fiancée who makes him want to be a better man, Carl Ramsey decides to try his hand at being one of the good guys. But there's a long line of enemies who won't forget so easily. Mission 13: Mission Inadvisable The Mobius crew gets a job offer so vile they not only turn it down, they set out to stop the secretive crime lord doing the hiring. Along the way, they manage to accidentally double-cross an old friend. Sometimes, no matter what you try, you're destined to be on the wrong side of the law. Mission 14: Moral and Orbital Decay Mort's son is on the run from the Convocation. He's fled to a remote mining station and looking for a quick ride from his father's old crew. But when magic gets out of hand, suddenly everyone's more concerned about stopping the space station from crashing into a planet than finding a fugitive. Mission 15: Planet Hustlers Pirates capture the stunnji homeworld, and Rai Kub's people turn to Carl Ramsey to find a way to convince them to leave. Carl's plan? A lot of fast talking, subterfuge, and the crookedest game of poker ever played. The stakes: the fate of a refugee planet. Mission 16: Eternity or Bust When your bride-to-be makes a simple request, a smart man makes it happen. When your outlaw fiancée wants her wedding on Earth, where most of the galaxy's top law enforcement agencies are headquartered, it's going to take bribery, back room deals, and ratting out some old associates. But Carl won't be able to live with himself unless he gets his friends out of the jam he puts them in. Bonus Short Story: For Old Time's Sake With retirement in full force, the crew of the Mobius take on a decidedly low-key villain: the interlopers who're looking to ruin their gig hustling simulator combat for free meals. Black Ocean is a science fantasy series set in the 26th century. Do you wish there had been a second season of Firefly? Do you love the irreverent fun of Guardians of the Galaxy? Have you ever wondered how Star Wars would have turned out if Luke and Obi-wan had ditched the rebellion to become smugglers with Han and Chewie? Then Black Ocean is the series for you! Pick up your copy and aim to misbehave with the crew of the Mobius!

Siloam Chuck Cooper, 2019-02-21 After many years, a long-forgotten spring is discovered by a little boy, near the Oregon coast town of Safety Harbor. The indigenous people to whom it originally belonged, and who still live nearby, believe the waters of the spring have healing power. It was once used by their ancestors for such, until it was taken from them by white settlers, who eventually abandoned the area as the spring dried up. Now, in the present time, miracles are reported by those who visit the newly emergent spring. But, there are dark forces that want to claim ownership of

the spring in order to control its access, prevent its use for spiritual healing, and who are willing to destroy anyone who gets in the way of their agenda. The people of the larger Safety Harbor community, and their indigenous neighbors, are challenged to put themselves on the line, to risk their lives, if necessary, in order to preserve this gift that has been restored in their lifetimes. The story is filled with colorful characters and high drama, as a spiritual struggle unfolds before our eyes that will inspire all of us to take risks for that which is of ultimate spiritual significance.

The Internet of Women - Accelerating Culture Change Nada Anid, Monique J. Morrow, Laurie Cantileno, 2022-09-01 Female scientists, technologists, engineers, and mathematicians worldwide are making historic contributions to their fields. The modern workforce is closer to gender-equal than it has ever been, and many efforts are in place to support further progress. The Internet of Women provides an exciting look at personal narratives and case studies of female leaders and cultural shifts around the globe that illustrate this promising trend. From the United Nations' emphasis on girls and technology education in the SDGs (Sustainable Development Goals) to the increased female labor force in Zambia, a policy change that was inspired by the MDGs (UN Millennium Development Goals), The Internet of Women captures stunning examples of progress from around the world and men working hand in hand with women advocating for cultural change. Scholars and practitioners lament the lack of women leading and working in leading organizations in the technology industry. Gender equality and female participation in the tech field is critical to both developing and developed economies; nevertheless, this gap remains a global phenomenon. The lack of female leadership is particularly extreme at the highest echelons of leading technology organizations. Few publicly traded tech companies have female CEOs - in fact, most nations have zero female leadership in the tech industry. This gap does indicate a slow pace of progress for gender equality in tech employment. Women's pay still lags nearly a decade behind, according to the World Economic Forum, meaning that women's on average pay today is the equivalent to that of similarly qualified and similarly employed men in 2006. Without significant progress, the current rate of change will not lead to parity for 118 years, according to the World Economic Forum (WEF). However there's significant work being done to shift this tide. Take for instance Michelle Lee, the first female Under Secretary of Commerce for Intellectual Property and Director of the United States Patent and Trademark Office (USPTO), reflects on her childhood Girl Scout badge in sewing and cooking and how that memory inspired to create an IP badge that exposes young women to the process of invention. Social entrepreneur, investor, and Malala Fund co-founder Shiza Shahid shares her efforts beginning from mentoring young women in Pakistan to her current work directing more investment to women innovators around the globe. And Elizabeth Isele, a senior fellow in Social Innovation at Babson College, shares her research on women and ageism saying we need to retire the word retirement. The book is divided into six parts, each with unique areas of focus: • Millennials Leading: Exploring Challenges and Opportunities Facing the Next Generation of Women in Technology • Men and Women Empowering One Another • Bold Leadership: Women Changing the Culture of Investment and Entrepreneurship • Educating for the 21st Century • Breaking the Glass Ceiling: A Generation of Women Forging into Technology Leadership • Emerging Fields of Technology The Internet of Women gathers examples about the increasingly inclusive and progressive gender culture in technology from over 30 countries. Stories range from an entrepreneur in Dubai partnering with private and public sector entities to accelerate blockchain technology to a young British woman moving to Silicon Valley to launch an artificial intelligence platform and incubator. The book is intended for corporations, academic institutions, the private sector, government agencies, gender experts, and the general public, and its key benefit is to let the reader understand a path towards implementing diversity overall globally. It also showcases the strategies, tools, and tactical execution on how create cultural change in all parts of the world.

Educators play a significant role in the intellectual and social development of children and young adults. Next-generation teachers can only be as strong as their own educational foundation which serves to cultivate their knowledge of the learning process, uncover best practices in the field of education, and employ leadership abilities that will inspire students of all ages. Teacher Education: Concepts, Methodologies, Tools, and Applications explores the current state of pre-service teacher programs as well as continuing education initiatives for in-service educators. Emphasizing the growing role of technology in teacher skill development and training as well as key teaching methods and pedagogical developments, this multi-volume work compiles research essential to higher education professionals and administrators, educational software developers, and researchers studying pre-service and in-service teacher training.
